

**Infection Prevention and Control Outbreak Preparedness**

Raising awareness of risk factors and measures people can take to protect themselves is the only way to reduce illness. Early recognition is critical to controlling the spread of Ebola virus disease (EVD). Consequently, healthcare personnel should review infection control policies and procedures with strict adherence to Standard and Transmission-based Precautions.

Ebola Preparedness Helpful Check List is intended to provide practical and specific product suggestions to ensure your healthcare facility has what it needs to protect your patients and staff from EVD or other emerging infectious diseases.
