Partnering for Her Health...With Henry Schein

Delivering optimal healthcare to the women who have placed their trust in you is always at the forefront of your professionalism. Each day, you work to provide them with the best services possible in Women's Health minimally invasive procedures, and preventive care to ensure that they are able to confidently pursue healthy, successful lives.

As a dedicated healthcare provider, you also cope with running a small business that demands your constant attention. At Henry Schein Medical, we understand the special challenges that you face. Our commitment is to offer you solutions that help you to maintain your practice's fiscal health, especially in today's economic climate. For over 75 years, we have built our reputation on developing innovative, cost-effective products and services to maximize your profitability and keep you competitive.

Our 2010 *Women's Health Quarterly Buying Guide* has been created exclusively for women's health practitioners. The *Guide* offers a customized selection of medical and surgical products, pharmaceuticals, and equipment. You'll also enjoy next-day delivery service and 99% fill rates that guarantee timely receipt of requested items—plus additional specialized offers and programs to keep your business running seamlessly. As a valid customer, you may also take advantage of our exclusive Women's Health buying program, where you will enjoy savings of up to 30% on the products featured in this guide.

Contact your Henry Schein Sales Consultant or log on to www.henryschein.com/obgyn to explore the many practice-building resources Henry Schein has to offer its valued women's health physicians. And ask your consultant how you can be enrolled in this Women's Health sales plan.

Only one pink glove truly protects.

Micro-Touch® | NitraFree™ | Nitrile Exam Gloves

FIGHT ALLERGIES AND SUPPORT BREAST CANCER RESEARCH EVERY TIME YOU WEAR IT.

Micro-Touch® NitraFree™ is unlike any other nitrile exam glove. It provides powerful protection against Type I latex allergies – and reduces the potential for Type IV chemical accelerator*-based allergies. It's also FDA approved for handling chemotherapy drugs. And every time you wear it, proceeds go to Susan G. Komen for the Cure®. No other pink glove does so much to protect healthcare practitioners – and women across the world.

For samples and more details, call us at **800-952-9916**, and to share your story about how you or your loved ones have been touched by breast cancer, visit ansell.com/powerofpink.

Globe Scientific, a leading producer of disposable laboratory plasticware and glassware offers an outstanding line of consumables designed for the most stringent laboratory protocols. With more than 26 years of experience and 500+ items to choose from, Globe Scientific's extensive line of products provides consistent high quality at considerable savings.

Put us to the test.

Ask your **Henry Schein Sales Representative** for **FREE** samples. For a complete listing of our product line, visit our website at: www.globescientific.com

Additional colors and slide styles are available. Please inquire!

Can you spot the difference between these two kits?

The answer is simple.

You can't... because there is no difference between the two kits. Quidel is committed to ensuring consistency from kit-to-kit and lot-to-lot to provide you with the same high-quality products that you have come to trust. The same quality that has made QuickVue the #1 selling hCG test in the professional market.¹

When to Start Screening

The American Cancer Society Recommends:

Cervical cancer screening should begin approximately three years after the onset of vaginal intercourse. Screening should begin no later than 21 years of age. After initiation of screening, cervical screening should be performed annually with conventional cervical cytology smears OR every two years using liquid-based cytology; at or after age 30, women who have had three consecutive, technically satisfactory normal/negative cytology results may be screened every two to three years (unless they are HIV+, or are immunocompromised by organ transplantation, chemotherapy, or chronic corticosteroid treatment). For more information on cervical cancer screening, visit www.cancer.org

Introducing the new Welch Allyn 590 Series KleenSpec® Vaginal Speculum with innovative Cordless Illumination System—an advancement in Women's Health that's nothing short of brilliant.

The Welch Allyn KleenSpec Vaginal Speculum and Illumination System has been totally redesigned to provide improved visualization of the exam area and the enhanced freedom of movement you need to perform a pelvic exam. And talk about brilliant innovations, the new cordless illumination system provides a whiter, brighter light—without a bulb, so you'll never have to worry about lamp replacement.

New 590 Series KleenSpec Vaginal Speculum

- New wider handle and flexible yoke for improved ergonomics, balance, maneuverability and flexibility
- Superior illumination provides a homogeneous spot and eliminates glare back
- Smooth, molded acrylic will not pinch or bind patient tissue
- Single-use speculum eliminates reprocessing and reduces chance of cross-contamination
- Compatible with the current and new illumination system

New KleenSpec Disposable Vaginal Specula 790 Series Illumination System

- Advanced LED light source for better visualization of the exam area
- No cord to get in the way or break during procedures
- Continuous on time of 80 minutes, recharge time of six hours with lithium ion battery technology
- Automatic on-off system—insert the specula for illumination and remove to turn light off

For more information about the Welch Allyn KleenSpec Disposable Vaginal Specula and Cordless Illumination System, please contact your Henry Schein sales representative or call Welch Allyn customer service at 1.800.535.6663 opt 3.

BD Affirm™ VP88

Microbial Identification System

The Problem:

Mixed vaginal infections.

One of every four vaginal infections are caused by two or more organisms: *Candida* species, *Gardnerella vaginalis* or *Trichomonas vaginalis*.

Failure to diagnose these common causes of vaginitis can carry significant risk for your patients. Trichomoniasis and bacterial vaginosis (BV) are associated with increased risk of HIV infection, delivering preterm, low birth weight babies and, if untreated, PID.^{1,2}

The Solution:

1 molecular test that detects & differentiates 3 organisms.

The BD Affirm™ VP88 system quickly identifies and differentiates three pathogens from one single test. The Affirm VP88 technology provides RNA accuracy to enable targeted therapies.

- Results in < 45 minutes
- Enables proper therapy, the first visit
- Unaffected by difficult specimens: menses, sperm or creams from self medication.³

Learn more about Affirm VP88 testing in your laboratory, call 800.553.3470.

Protect your patients
from infection

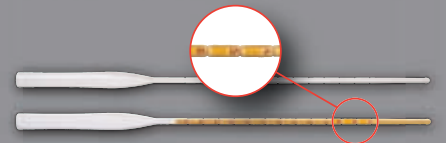

Single-use Tenaculum 356T

IUD Insertion Kit 935K

Endometrial Biopsy Kit 936K

Single-use Uterine Sound 906S

Single-Use Uterine Sound

Made from an advanced polymer material, the single-use Uterine Sound 906S offers a number of distinct advantages for your procedures—including ergonomic design, balanced flexibility and easy-to-read measurements.

#906S, Uterine Sound
(234-0003) 10/box

Single-Use Tenaculum

Made from an advanced composite material, the single-use Tenaculum 356T offers distinct advantages over the traditional stainless steel counterpart. Lighter in weight than stainless steel, the Tenaculum 356T increases patient comfort by putting less pressure upon the cervix. Its composition enables the instrument to flex and travel along the path of least resistance, potentially reducing pain and bleeding.

Patent No. D575,400. FDA approved.
#356T, Tenaculum
(234-0004) 10/box

Endometrial Biopsy Kit

Everything you need to quickly and safely perform an endometrial biopsy is included in the sterile, single-use kit.

Kit includes:

- Single-use Tenaculum 356T
- Single-use Uterine Sound 906S
- Single-use Endometrial Cell Sampler
- Swabsticks (2)
- Povidone-Iodine Solution
- Sterile Drape

#936K, Endometrial Biopsy Kit
(234-0005) ea

IUD Insertion Kit

Everything you need to quickly and safely perform an IUD insertion is included in the sterile, single-use kit.

Kit includes:

- Single-use Tenaculum 356T
- Single-use Uterine Sound 906S
- Single-use Scissors, 8.5"
- Swabsticks (3)
- Povidone-Iodine Solution
- Sterile Drape

#935K, IUD Insertion Kit
(234-0006) ea

Protecting Patients While Reducing Medical Costs: One OB/GYN's Perspective

In 1960, Dr. Albert Weiner was convicted and jailed on nineteen counts of manslaughter for injecting patients with syringes contaminated by hepatitis. Even though disposable syringes had been on the market for several years, most offices still used reusable needles and syringes at that time. In 2006, the VA hospital recalled hundreds of patients for serial HIV and Hepatitis testing due to improperly cleaned instruments. Sterilization of medical instruments is a serious business. Most doctors and office managers are totally unaware of this field.

I have been in the practice of OB/GYN for twenty four years in a practice founded by my father fifty four years ago. There have been many changes in our practice during this time. My father started using disposable needles in the early sixties, medical waste had to be disposed of in an appropriate manner, we stopped doing labs in the office due to onerous regulations, and OSHA developed specific guidelines for employee safety. What about sterilization of medical instruments? Essentially this is the final unregulated frontier.

Methods used for instrument sterilization in the Hospital, which are regulated, are expensive and time consuming. These procedures are virtually impossible to replicate in a clinical setting. However, our instruments in the office pose as much of a risk as those in the hospital.

In the OB/GYN office, our instruments are exposed to highly infection agents such as HPV, Herpes, Hepatitis, and HIV. We are reusing these instruments on patients and it is very important that we do not put them at risk. The surest way to make them safe is to make all these instruments disposable.

GYN Disposables was founded in 2005 to solve this problem. Our first product was the cervical tenaculum. We set out not only to do a disposable version, but to improve the design of this venerable gynecologic instrument. After multiple prototypes and extensive testing for regulatory approval, the first FDA approved, non-stainless cervical tenaculum was introduced in 2007. We found initial resistance. The tenaculum was designed so that the patient would experience less pain and

bleeding and is different from its metal predecessors. After their initial resistance to change, most users have begun to appreciate its benefits.

To help launch the company, I received my MBA in 2006. The business of medicine is a serious matter. Most physicians have no training in business management. GYN Disposables in 2007 set out to aid the OB/GYN in running their practices more efficiently. "Better, Faster, Cheaper" is the mantra of lean health care. To facilitate this goal we have introduced two kits with more in development. These reduce dozens of chores better utilizing staff time and reducing cost.

GYN Disposables will continue to work with the women's healthcare provider to produce products which protect women from infections while reducing cost.

Surshield® Safety Blood Collection Sets

- Simple, one-handed activation
- Minimal steps for activation
- No change in needle insertion technique required
- Confirmation that needle is securely locked

Surshield Safety Blood Collection Sets have the soft, flexible, interlocking wings that readily conform to body's contour. The needles are bonded to the wings at just under a 3° downward angle, for less risk of vessel damage or occlusion of the lumen. The memory-free tubing reduces recoil during use and is both Latex- and DEHP-free.

Surshield® Safety Blood Collection Sets

Packed: 50/box, 10 boxes/case (500)

TRUE SOLUTIONS FOR YOU AND YOUR CUSTOMERS!

The TRUE Portfolio –
High Performance, No-Coding Diabetes Testing
At Low Acquisition Costs

Item#	Description
8900055	TRUEbalance™ 50 ct. Test Strip
8900056	TRUEbalance™ Meter Kit
8900034	TRUEtest™ 50 ct. Test Strip
8900020	TRUE2go™ Meter Kit
8900037	TRUEresult® Meter Kit

TRUEresult® and TRUE2go™ Blood Glucose Monitoring Systems

- Tiny, 0.5 microliter blood sample
- Results in as fast as 4 seconds
- Both systems utilize TRUEtest™ Strips featuring GoldSensor™ Laser Accuracy
- Covered by Medicare, Medicaid and many private insurance plans

TRUEbalance™ Blood Glucose Monitoring Systems

- Small, 1.0 microliter blood sample
- Accurate results in 10 seconds
- Utilizes TRUEbalance™ Test Strips featuring patented TRUEfill® technology
- Covered by Medicare and some Medicaid insurance plans

To order, contact Henry Schein at 800-P-Schein.

TRUEresult® | TRUE2go® | TRUEbalance®

Verruca Freeze®

Safe, Easy, and Effective Cryosurgery

Verruca Freeze® is a convenient and effective cryosurgical system for the treatment of superficial skin lesions. It uses a safe, non-flammable cryogen to quickly remove unwanted skin lesions by freezing at -70° C; it requires no anesthetic and creates minimal discomfort for patients.

Benefits

- Minimal patient discomfort
- No CFCs
- No anesthetic required
- Non-flammable (No HAZMAT fees)

Genital Lesion Treatment Options

Verruca Freeze®

Resolution Rate: Effective 91.5% after the first treatment and 100% after the second treatment

Side Effects: The procedure is bloodless and odorless, and the body does not absorb the medicine, so skin irritation and discomfort is very minimal.

Application of cryogen to the skin is easy to control by varying the spray time and using soft-tipped limiting cones or CryoBuds™. Applicators allow for isolation of the affected area only. This keeps healthy tissue safe.

Verruca Freeze® is optimal for large areas of warts because pain is minimal and treatment time for each lesion is quick.

vs.

Trichloroacetic (TCA) and Bichloroacetic Acid (BCA)

Effective 80%- 90% of the time

It is difficult to control how deeply the acid penetrates the skin. If the acid burns too deeply, skin irritation, and ulcers may occur.

If large areas of warts are being removed and multiple treatments are needed, doctors may not recommend TCA and BCA treatment because of the pain and burning.*

what you don't know about vaginitis.

Two of the most common causes of vaginitis are bacterial vaginosis (BV) and trichomoniasis. Both conditions are **treatable and preventable**. Since one-half of all cases are asymptomatic, if you rely on symptoms alone, you are placing your patients at risk for complications.

"We know that BV and trichomoniasis are associated with ascending infection, i.e., PID, endometritis, and postoperative infections. Other preventable health consequences can include increased risks of HIV infection, tubal damage, ectopic pregnancy, infertility, and cervical cancer. Studies show it is imperative that you diagnose and treat early.

"The Screen, Treat, and Prevent approach (STP) is an appropriate paradigm for **reducing suffering, sequelae, costs, and liabilities** caused by reproductive tract infections (RTIs). For the latest methods to Screen, Treat, and Prevent these conditions, call your Henry Schein representative. Your patients deserve it." *

***Dr. James McGregor, MDCM, is a visiting professor of clinical obstetrics and gynecology, division of maternal fetal medicine at the University of Southern California, Keck School of Medicine, Los Angeles, California.**
