Important facts that every Women's Healthcare Professional should consider:

- OB/GYNs are oftentimes the only physician many women see on a regular basis.
- You can help increase colorectal cancer screening rates and, thereby, help reduce deaths from one of the most preventable and treatable types of cancer.
- The American College of Obstetricians and Gynecologists encourages its members to educate women about the importance of routine colorectal cancer screening.

Beckman Coulter supports you with the CRC screening products and tools you need:

- Quality CRC screening products—Hemocult and Hemocult ICT (immunochemical) that are proven and trusted.
- Product education for your staff—complimentary in-service training videos, on-going webinars that offer free CEU credits, etc.
- Support in driving patient compliance—free patient discussion checklists, reminder tools, patient videos and more.

Together we can save lives.

LashesMD™ is an eyelash and eyebrow enhancer that is available to Henry Schein from Folicula Labs. This product sets itself apart from other lash enhancers due to its lack of prostaglandin, a lipid compound that can change eye color and darken the skin of the eyelids. Also, it is the first professional grade eyelash enhancer available without a prescription that produces pharmaceutical-grade results.

ACOG Endorses Guidelines on HPV Vaccination

The American College of Obstetricians and Gynecologists is adding its weight to recommendations that 11- and 12-year-old girls be vaccinated against human papillomavirus (HPV) and that "catch-up" shots are a good idea for unvaccinated teens and young women up to age 26.

In a new statement, ACOG's Committee on Adolescent Health Care also stressed that Pap smears are still necessary for women starting at 21, even if they've been vaccinated against HPV. Current vaccines do not protect against all viral strains, and vaccination does not clear preexisting infections. Source: ACOG Committee on Adolescent Health Care

GARDASIL®
[Human Papillomavirus Quadrivalent
(Types 6, 11, 16, and 18) Vaccine, Recombinant]

Gardasil® is a vaccine designed to target HPV types 16 and 18, which account for 70 percent of cervical cancers, and HPV types 6 and 11, which account for 90 percent of cases of genital warts. These four types also cause benign cervical changes that result in an "abnormal" pap test.
