In the testing laboratory, the eSwab cap is unscrewed and removed, the swab applicator stick is securely attached to the cap. This feature (available only on the 480C) allows the operator to conveniently remove the swab and perform various microbiology analyses using the tube cap as a handle to hold and manipulate the swab.
NEW LIQUID BASED TRANSPORT FOR MICROBIOLOGY

Each COPAN ESwab comprises of a 1 mL of Liquid Amies and a flocked swab.
COPAN ESwab is the only liquid-based, multipurpose, open platform, collection and preservation system that maintains viability of aerobic, anaerobic and fastidious bacteria for up to 48 hours at refrigerator and room temperature.
Elutes all the specimen into solution.
Amplifies your culture and assay sensitivity!

FLOQSwabs™ use short fiber strands which create a thin absorbent layer. The entire sample stays close to the surface for fast and complete elution.

ABOUT COPAN FLOQSwabs™

MULTIPURPOSE COPAN ESWAB WORKS FOR:

- Automation
- Gram Stains
- Traditional Bacteriology Culture
- Rapid Antigen Tests*
- Molecular Assays*

At COPAN, we make specimen collection and preservation as easy as we can for our partners, physicians, nurses and laboratorians alike.
Because when they can do their job efficiently, we know that we did our job efficiently.

* Self validation required
In the testing laboratory, the eSwab cap is unscrewed and removed, the swab applicator stick is securely attached to the cap. This feature (available only on the 480C) allows the operator to conveniently remove the swab and perform various microbiology analyses using the tube cap as a handle to hold and manipulate the swab.
