The OtoClear® Ear Irrigation Tip was developed to safely and thoroughly clear the ear canal of wax and debris. It is designed to conveniently attach to the Ear Lavage System for high use facilities, and the Spray Wash Kit for low use facilities. OtoClear Ear Irrigation Tips are also compatible with the Tabletop Waterpik® and standard luer lock syringes.

**PROBLEM:**
For years, ears have been irrigated by a single stream of fluid directed toward the tympanic membrane. This can cause pain, TM perforations and a great big mess.

**SOLUTION:**
The OtoClear® ear irrigation tip directs three streams of water to the ear canal wall eliminating high velocity impaction of the TM. Its flared tip design eliminates the fear of over insertion and helps reduce backsplash when fully inserted into the ear.

**RESULTS:**
A simple method for safely irrigating ears and eliminating the frustrating mess.

**PRODUCT OFFERING**
- #7200 - 40 single-patient tips per box
- #7245 - Portable Waterpik®
- #7280 - Ear Lavage System
- #7290 - OtoClear Spray Wash Kit
- #3700 - Ear Irrigation Basins (box of 3)
OtoClear® Ear Irrigation Tip

OtoClear® Ear Irrigation Systems

OtoClear Tips were designed for compatibility with multiple delivery devices. With each delivery device, OtoClear delivers predictable effectiveness and is the ultimate in safe ear irrigation.

#7280
Ear Lavage System
Recommended for high volume facilities
- A completely portable irrigation delivery device that can be used for procedures anywhere in or out of the office.
- Provides effective, pulsed irrigation.
- One-touch High and Low settings.
- Proven safety & effectiveness. (Children's Hospital of Pittsburgh Study)
- Rechargeable battery.
- 210ml self-contained water reservoir.

System Includes:
- 1 Portable Waterpik®
- 40 OtoClear Tips
- 1 Ear Basin

#7290
OtoClear Spray Wash Kit
Recommended for low volume facilities
- Delivers greater volume compared to syringes or other manual devices.
- Efficient design allows for two-handed procedure.

Kit Includes:
- 1 Spray Wash Bottle
- 20 OtoClear Tips
- 1 Ear Basin

Usage Instructions

Insert OtoClear tip fully into the ear canal. The flared design of the OtoClear tip protects against over-insertion.

Begin irrigation. Note: The OtoClear tip directs the water towards the walls of the ear canal creating a turbulent lavage that effectively dislodges the cerumen. The exit portals control backsplash and deliver the effluent into the basin.

When procedure is complete, remove and dispose of the single-use OtoClear tip.

Thoroughly read the complete directions before using the OtoClear Ear Irrigation tip. Do not perform irrigation if perforations or tympanostomy tubes are present or suspected. Discontinue irrigation immediately if bleeding, irritation or other trauma to the ear canal or tympanic membrane occurs. Hard or impacted wax may require a cerumenolytic agent.
