www.henryschein.com/obgyn
The trusted name in pregnancy tests for over 15 years.

- Results in 5 minutes (serum), 3 minutes (urine).
- >99% sensitivity, specificity, accuracy.
- Room temperature storage with up to 21-month shelf life from date of manufacture.
- Available in two-color endpoint and two color plus/minus (+/-) endpoint versions for easy-to-read and interpret results.
- Highly sensitive assay with built-in controls ensures reliability.

Results you can depend on.

QuickVue® One-Step hCG Combo Tests
- 20 mIU sensitivity in urine, 10 mIU sensitivity in serum
- Results in 5 minutes for serum, 3 minutes for urine (CLIA waived urine only)
- 99% sensitivity, 99% specificity
- Room-temperature storage
- Built-in controls for CLIA compliance
- One-step ± endpoint

No more wet mounts...

Are you still relying on wet mount to diagnose trichomoniasis? The OSOM® Trichomonas Rapid Test is a rapid antigen test with 83% sensitivity versus culture and wet mount combined. The easy-to-read, two-color results appear within 10 minutes, and it’s the only CLIA-waived rapid test for trichomoniasis available. For more information, call us at 800-332-1042 or visit our website. No more wet mounts... awesome, yes, OSOM.

OSOM® hCG Combo Test
Urine/Serum Pregnancy Test
- CLIA waived for urine only
- Easy to read: black-and-white results
- Fast: one step; no reagents
- Sensitive: 10 mIU/mL serum, 20 mIU/mL urine
- Room-temperature storage; 24-month shelf life

#124, Combo Test
(327-9522) 25/box $25.00
#134, Urine Control
(327-6476) ea $22.09
#138, Serum Control
(611-1052) ea $24.99
CPT® Code: 81025† (Urine); 84703† (Serum)

OSOM® BVBLUE® Test
For Gardnerella vaginalis
The only CLIA-waived rapid test for detecting bacterial vaginosis, including gardnerella, bacteroides, prevotella, and mobilincus.
- Instant color change provides clear, easy-to-read results
- Sensitivity: 92.8% vs. Gram stain
- More sensitive and specific than wet mount
- One-minute hands-on time
- CLIA waived

#183, Test
(414-4170) 25/box $221.99
#184, Controls
(327-4106) ea $17.29
CPT® Code: 87905†

OSOM® Card Pregnancy Test
Easy-to-use, easy-to-read hCG cassette with black-and-white results.
- Results in as soon as 1 minute
- 20 mIU/mL sensitivity
- More than 99% accurate in clinical studies
- Easy to run: no-drop counting pipette
- CLIA waived

#102, Test
(327-0743) 25/box $33.49
#134, Urine Control
(327-6476) ea $22.09
CPT® Code: 81025†

OSOM® Trichomonas Rapid Test
The only CLIA-waived rapid test for Trichomonas infection. Detects antigen directly from vaginal swab.
- More sensitive than wet mount
- Easy-to-run dipstick
- Easy-to-read 2-color results
- Results in 10 minutes or less
- Included in CDC and ACOG guidelines
- Includes QC controls

#181, Test
(406-7631) 25/pkg $221.99
#182, Control
(611-1157) ea $25.49

Are you struggling with patient compliance when it comes to colorectal cancer screening?

InSure® FIT™ boosts compliance with a patented water-based collection method and 2 samples on a single card.

87% sensitivity for colorectal cancer
98% specificity
66% increase in patient compliance versus a guaiac-based fecal occult blood test (gFOBT) was found in one study
No handling/smearing of dry, solid fecal material
No dietary or medicinal restrictions

CPT Code* 82274 & Medicare Code G0328

Please visit DiagnosisCAST.com and click on ColonCancerWRAP for information on new advances in colon cancer screening (CME credit available).

Contact your sales representative or go to Insuretest.com for information and to order InSure® FIT™.

1. Cole SR, Young GP, Esterman A, Cadd A, Morcom J. A randomised trial of the impact of new faecal haemoglobin test technologies on population participation in screening for colorectal cancer. J Med Screen 2003;10:117-122. 2. Smith A, Young GP, Cole SR, Bampton P. Comparison of a brush-sampling fecal immunochemical test for hemoglobin with a sensitive guaiac-based fecal occult blood test in detection of colorectal neoplasia. Cancer 2006;107:2152-2159. The study was funded in part by Enterix Inc. (through Enterix Australia Pty. Ltd.), the manufacturer of InSure® FIT™. Enterix is now owned by Quest Diagnostics Incorporated. However, neither Enterix nor Quest Diagnostics participated in the data analysis or influenced the conclusions reached by the authors.

#90025, Combo Kit 25/35 (450-0008) ea Contains: 25 test strips, 1–9-mL bottle of run buffer & 35 patient collection kits.
#90010, Patient Collection, 10-Pack (450-0003) ea Each envelope contains: 1–2-day sample card, 2 brushes & specimen collection instructions.

Histofreezer® Portable Cryosurgical System

Portable cryosurgical system used by medical professionals to easily and inexpensively remove warts and other benign lesions. Clinically proven, effective, and easy-to-use treatment for adults and children older than 4 years. Lower cost per treatment than competing products—no à la carte costs and no freeze-thaw-freeze procedure is needed.

- Patented cryogenic delivery system: no messy or leaky cones
- Long shelf life, CFC-free, and ozone friendly
- Highly reimbursed through most insurance plans
- No HAZMAT fee
- All-inclusive kits: higher ROI for your practice

#36M1C1, 2mm Value Kit
Ideal for small and large lesions.
(810-0005) .................. ea
Contains: 36–72 applications per kit, 12–2mm applicators & 24–5mm applicators.

#1001-0293, #40T1C, 2mm Value Kit
Ideal for smaller lesions.
(810-0006) ................ ea
Contains: 40–80 applications per kit & 40–2mm applicators.

#60M2C, 2mm Economy Kit
Ideal for small and large lesions.
(810-0004) ................... ea
Contains: 60–120 applications per kit, 24–2mm applicators & 36–5mm applicators.

#1001-0294, #36F1C, 5mm Value Kit
Ideal for larger lesions and plantar warts.
(810-0007) .................. ea
Contains: 36–72 applications per kit & 36–5mm applicators.

OraQuick® HIV Rapid Tests

- Rapid human immunodeficiency virus (HIV) types 1 and 2 (antibody test is a single-use, qualitative immunobassay)
- Detects antibodies to HIV
- Only rapid HIV test for use with specimens for oral fluids, venipuncture whole blood, fingerstick whole blood, and plasma
- CLIA waived for specimens for oral fluids, venipuncture whole blood, and fingerstick whole blood only
- Simple, 2-step, oral-fluid procedure
- Reliable results in just 20 minutes
- Greater than 99% accuracy

pHizatest™ Nitrazine Indicator Paper

Compare to NitraTest™
Designed for the in vitro determination of body-fluid pH in the 4.5–7.5 range. Typically used to measure vaginal pH, including detecting amniotic fluid in late-term pregnancy, a sign of premature amniotic-sac rupture, nitrazine-indicator paper is also used to aid in diagnosing bacterial vaginosis, measuring ocular pH, and more. Packaged in a familiar, convenient, and easy-to-use dispenser and includes a color chart. Each roll provides approximately 100 tests.

- Economical
- Instant, easy-to-read results
- Reliable: manufacturer has made nitrazine-indicator paper for more than 50 years

TRUTOL® Glucose Tolerance
Screen for hyperglycemia (diabetes mellitus and gestational diabetes) and hypoglycemia (low blood sugar). Volume graduations are imprinted on the label to aid in dispensing. Pediatric dose chart lists precalculated dosage based on body weight.
The CLINITEK Status+ Analyzer for complete point-of-care urinalysis testing
Urinalysis, microalbumin for diabetes, early detection of kidney disease, and pregnancy testing
Answers for life.

SIEMENS DCA™ Vantage Analyzer
Point-of-care immunoassay analyzer for diabetes management. Provides precise and accurate quantitative test results for HbA1c in whole blood during a patient’s visit to help improve decision making. With a single urine sample, the analyzer also provides quantitative test results for low levels of albumin, creatinine, and A: C ratio in the physician’s office or clinic.

SIEMENS Multistix® 10S Pro Reagent Strips
More reliable tool for detecting kidney disease. Test for glucose, ketone, high protein, low protein, specific gravity, creatinine, pH, blood, nitrite, and leukocytes.
- Creatinine ratio to correct for varying urine concentrations
- Decreases false positive protein and false negative protein rates
- For over-65 patients and those with diabetes, CVD, or UTI
- Indication of a dilute requires patient to submit specimen, triggering another urine sample
- Automatic identification of strip configuration for Clinitek® 50 users

SIEMENS CLINITEK Status+ Urine Analyzer
Provides convenient point-of-care testing with improved data integrity for more confidence in the results. Simple, fast, and accurate testing produces a result in about 60 seconds. Status analyzer can process basic urine strips, ratio tests, and hCG cassette tests. Full alphanumeric keyboard, easy-to-use touch-screen display, and automatic strip identification make this unit convenient to use. Eliminates need for visual reading, timing errors, and transcription errors. Memory to store 950 patient records. Future-ready for EMR when you are.

- (3) 0.33 oz Post Peel Moisturizers (Step 4)
- (3) Rayon Applicators

INITIAL RESULTS in 2 WEEKS

LashesMD™ is an eyelash and eyebrow enhancer that is available to Henry Schein from Folicula Labs.
This product sets itself apart from other lash enhancers due to its lack of prostaglandin, a lipid compound that can change eye color and darken the skin of the eyelids. Also, it is the first professional grade eyelash enhancer available without a prescription that produces pharmaceutical-grade results.

ACOG Endorses Guidelines on HPV Vaccination

The American College of Obstetricians and Gynecologists is adding its weight to recommendations that 11- and 12-year-old girls be vaccinated against human papillomavirus (HPV) and that "catch-up" shots are a good idea for unvaccinated teens and young women up to age 26.

In a new statement, ACOG’s Committee on Adolescent Health Care also stressed that Pap smears are still necessary for women starting at 21, even if they’ve been vaccinated against HPV. Current vaccines do not protect against all viral strains, and vaccination does not clear preexisting infections. Source: ACOG Committee on Adolescent Health Care

Gardasil® is a vaccine designed to target HPV types 16 and 18, which account for 70 percent of cervical cancers, and HPV types 6 and 11, which account for 90 percent of cases of genital warts. These four types also cause benign cervical changes that result in an “abnormal” pap test. Source: www.merck.com
Adacel®
Tetanus Toxoid, Reduced Diphtheria Toxoid, and Acellular Pertussis Vaccine Adsorbed
0.5-mL SDV
(546-7789)..................10/pkg
