PROUD TO BE SERVING AMBULATORY SURGERY CENTERS

Spring 2016

Products, Resources and Services for Ambulatory Surgery Centers

To Order, Call: 1-800-P-SCHEIN 8am–8:30pm (et)
www.henryschein.com/surgiteam
Ambulatory Surgery Centers are a critical part of delivering health care. Surgery Center leaders are strained now more than ever to save time and costs while balancing quality of care and outcomes.*

Rely on Henry Schein

Henry Schein provides access to a network of products, services and solutions designed especially for Ambulatory Surgery Centers.

ASC Product Offering

Products and procedures go hand-in-hand, and Henry Schein has high-quality, affordable, just-in-time options for critical essentials. Focusing on your capital, medical/surgical and pharmaceutical preferences, Henry Schein is the trusted source for all of your single-use-disposable products, surgical packs, and Rx supplies.

ASC Expertise – Your Network of Trusted Advisors

Henry Schein Consultants are structured to support the urgency of the operating room. Our service model features national representation that works in concert to provide ASCs a differentiated level of support. Additionally, Henry Schein partners with branded suppliers to conduct procedural supply chain assessments. These assessments give ASC leaders the opportunity to review their ASC procedural workflows and revise procedural programs that enhance ASC organizational goals and requirements.

Supply Chain Efficiency

Henry Schein has partnered with IOS to bring you a robust multivendor ordering platform that allows you to manage ALL vendor transactions from one simple ordering portal. With our multivendor ordering system, you can create orders and receive remittances from hundreds of various medical supply and device companies. This is a comprehensive materials management platform designed specifically for the unique needs of an ASC.

Ambulatory Surgery Center Solutions

Whether you’re focused on multi-specialty or single specialty, Henry Schein provides a suite of relevant solutions to help proactively meet clinical, operational, and financial challenges.

CONNECT TO THE NETWORK

To learn more about Henry Schein’s network of solutions for ASCs, contact your Henry Schein Sales Consultant.

Introducing:

ChannelCheck™

3-in-1 Residual Soil Test Strips to Verify Cleaning of Flexible Endoscopes

ChannelCheck™ is the first product capable of testing virtually any lumened instrument for residual organic soils, including flexible endoscopes, no matter the channel size. ChannelCheck™ tests for three common organic soils at once: blood, protein and carbohydrates.

ChannelCheck Step-by-Step

1. Using at last a 20ml syringe, fill with 10ml of pre-packaged sterile water and 10ml of air. 2. Flush the water through the channels of the instrument. 3. Recapture Water in the Zip Lock Bag. 4. Dip the test strip into the recaptured water, being sure that all three pads are completely immersed. 5. Note the time for 10 seconds. 6. Dab the side of the test strip on a clean, absorbent surface to wipe away excess water. Wait 90 seconds, then compare the color of the pads to the results chart.

DuraBlue™ Single-Layer Sterilization Wraps
Designed with a simple cross-stitch bond pattern for clear visual feedback, allowing clinicians to verify that no breaches occurred during handling, storage, and/or sterilization activities. Made from polypropylene SMS (spunbond/meltblown/spunbond) material.

12” x 12” (988-0129) ............... 1000/case
15” x 15” (988-0130) ............... 1000/case
18” x 18” (988-0131) ............... 1000/case
20” x 20” (988-0132) ............... 1000/case
24” x 24” (988-0133) ............... 500/case
36” x 36” (988-0134) ............... 300/case

DuraBlue™ Dual-Layer Sterilization Wraps
Made with nonwoven 100% polypropylene SMS (spunbond/meltblown/spunbond) technology for superior strength and microbial protection. They offer increased durability because of a double-layer wrap design with a securely bonded seal on 3 sides. Easy-to-read ID printing on each individual wrap.

12” x 12” (988-0124) .......... 480 per Case
15” x 15” (988-0125) .......... 480 per Case
18” x 18” (988-0126) .......... 480 per Case
20” x 20” (988-0127) .......... 480 per Case
24” x 24” (988-0128) .......... 240 per Case
PROTECT YOUR PATIENTS & YOUR INSTRUMENTS

Integra™ Miltex®

7 Steps to Clean Instruments

1. PRE-TREAT
   Instruments must remain moist to avoid blood, mucus, or other bio burden, which may cause damage if allowed to dry on the instrument.
   • Enzymatic solutions with neutral pH are preferred to pre-soak/hold instruments
   • Never soak instruments overnight/weekend
   • Never use disinfectant as a “holding solution”

2. RINSE
   Rinse instruments for 30 seconds under warm distilled or demineralized water.
   Tap water may leave spots on instrument.

3. CLEAN
   An instrument may not be successfully sterilized if it is not completely clean. It is important that individuals cleaning instruments wear appropriate personal protective equipment (such as goggles or face shield, mask, gloves, and apron).
   Follow the steps below to ensure proper cleaning:
   • Separate dissimilar metals
   • Inspect for functionality
   • Apply stain remover (as needed)
   Accepted Cleaning Methods: Ultrasonic (most effective), Manual, Automatic Washers

4. RINSE AND DRY
   Rinse and dry instruments using surgical towels not treated with bleach or harmful chemicals.

5. LUBRICATE
   Lubricant should be non-silicone based and water soluble. Never use industrial lubes.
   **Lubrication:**
   • Maintains longevity
   • Helps prevent spotting, staining, corrosion, and sticking/tightness
   Lube all metal to metal contact:
   - Hinges, box locks, screws, and blades
   - Lubricate weekly or more often if possible
   **Types of Lubricant:**
   Milk = 30 second dip – no rinse
   Spray = no rinsing

6. PACKAGE – WRAP
   Before wrapping, check all instruments for functionality.
   • Separate dissimilar metals
   • Instruments must be in the open/unlocked position
   Hinges/box locks can fracture during heat expansion if closed.
   Wrap instruments in specialized bags, cassettes, surgical towels, or containers with an indicator inside.

7. STERILIZE
   • Autoclave – Recommended
   • Chemical/Cold Sterilization – Not Recommended
   • Dry Heat – Not Recommended

See pages 5–7 for Surgical Instruments.

SURGICAL GLOVES

Protexis™ Latex
Powder-Free Latex Surgeons’, Sterile

• Triple-dip coating technology integrates nitrile and latex for effortless donning and glove strength
• Independent thumb design allows for an anatomical fit and natural movement in the fingers, thumb, and palm
• Interlocking, beaded cuff design reduces roll down
• Color: Brown

Gloves ..................................................................50/box

Specify:
#2D72NS55X, 5½ .......................... (288-2061)
#2D72NS60X, 6 .......................... (118-2584)
#2D72NS65X, 6½ ........................ (118-2586)
#2D72NS70X, 7 .......................... (153-0404)
#2D72NS75X, 7½ ........................ (118-2587)
#2D72NS80X, 8 .......................... (118-2588)
#2D72NS85X, 8½ ........................ (301-0016)
#2D72NS90X, 9 .......................... (153-0403)

Protexis™ Latex with Neu-Thera®
Powder-Free Latex Surgeons’, Sterile

• Acts as a secondary skin barrier to protect against bloodborne pathogens and in a broad range of cases
• New-Thera® emollient coating enhances donnability as well as protecting, restoring, moisturizing, and soothing hands
• Independent thumb design allows for an anatomical fit and natural movement in the fingers, thumb, and palm
• Interlocking, beaded cuff design reduces roll down
• Meet all relevant FDA and ASTM standards
• Color: Khaki

Gloves ......................................................50/box

Specify:
#2D73TP55, 5½ .................................. (638-0005)
#2D73TP60, 6 .............................. (988-0199)
#2D73TP65, 6½ ........................... (988-0200)
#2D73TP70, 7 .............................. (288-2101)
#2D73TP75, 7½ ........................... (288-2102)
#2D73TP80, 8 .............................. (288-2103)
#2D73TP85, 8½ ........................... (988-0201)
#2D73TP90, 9 .............................. (288-1220)

Protexis™ Latex Micro
Powder-Free Latex Surgeons’, Sterile

• Designed for procedures where tactile sensitivity is the highest priority
• Provide excellent tactile response and a smooth, antislip finish
• Triple-dip coating technology integrates nitrile and latex for effortless donning and glove strength
• Excellent choice as an outer glove when double-gloving
• Independent thumb design allows for an anatomical fit and natural movement in the fingers, thumb, and palm
• Interlocking, beaded cuff design reduces roll down
• Color: Cream

Gloves .......................................................50/box

Specify:
#2D72NT55X, 5½ ............................ (582-4506)
#2D72NT60X, 6 ............................ (582-4507)
#2D72NT65X, 6½ .......................... (118-2591)
#2D72NT70X, 7 ............................ (288-2062)
#2D72NT75X, 7½ .......................... (288-2063)
#2D72NT80X, 8 ............................ (288-2064)
#2D72NT85X, 8½ .......................... (118-2595)
#2D72NT90X, 9 ............................ (118-2596)

Protexis™ Latex Classic
Powder-Free Latex Surgeons’, Sterile

• Manufactured with a low protein content
• Triple-dip coating technology integrates nitrile and latex for effortless donning and glove strength
• Independent thumb design allows for an anatomical fit and natural movement in the fingers, thumb, and palm
• Interlocking, beaded cuff design reduces roll down
• Color: Cream

NEW TO OUR PORTFOLIO OF TOPICAL SKIN ADHESIVES

FLEXIBLE SKIN ADHESIVE PACK WITH APPLICATOR TIPS

FLEXIBLE SKIN ADHESIVE with Applicator Tips

• Beveled Tip allows for a smoother, broader layer of skin adhesive
• Ampoule can be used with or without the tip
• The flexible skin adhesive provides BOTH the tensile strength of a Butyl formula and the flexibility of an Octyl formula

NEW!
Flexible Skin Adhesive Pack with Applicator Tips
(112-7158).....10 Ampoules w/tips/box
0.5mL Ampoule

All versions of our Topical Skin Adhesives are:

• FDA–approved liquid adhesive consisting of n-butyl-2 cyanoacrylate
• Highest bond strength of all topical tissue adhesives on the market
• Inhibits growth of bacteria
• Sterile, single-patient-use plastic ampoules

Leave your mark, while hardly leaving a mark.

The Original Barbed Suture, Introduced in 2007
Used in More Than 20 Million Surgical Cases
Studied in More Than 80 Clinical Papers

The Quill™ Device may help with:

• Faster wound closure 1
• More evenly distributed tension instead of single-point fixation
• Avoidance of knot-related complications
• Reduced tissue ‘recoil’ during suturing 2

Popular Quill™ Device codes:

Precision, versatility and safety working seamlessly together

- Exceptional LED lighting for clarity in exam and procedure
- Refined surgical energy equipment
- Accurate energy delivery through electrodes designed for your specialty applications
- Versatile mobile stands and electrosurgical accessories

Better care for your patients from exam to procedure

Contact your trusted Henry Schein representative to place an order.
Both are Made on the Same Principle…

Naturally Made to Last

When is stainless steel like a diamond? When you’re talking about the longevity offered by Blickman Stainless Steel Products. Blickman Built means your essential OR products, from Mayo Stands and Instrument Tables; to Case Carts and Warming Cabinets, are made to last. Look at every facet of our product’s features and you’ll see that’s why Blickman products are “Engineered For a Lifetime”.

Nezzie Ambulation Device
We’re solving a big problem with a small solution

REGULATORY CONCERNS ARE AT THE FOREFRONT OF YOUR BUSINESS and there is no greater solution than the CubexRx Mini™ to provide precise accountability and control of controlled substances.

The CubexRx Mini Narcotic Management Solution

- Improves regulatory compliance and pharmacy operations
- Controls access to a single item, decreasing diversion
- Improves profitability by increasing charge capture rates
- Provides detailed information on discrepancies and resolutions
- Protects against unauthorized access
- Reduces staff time associated with narcotic management
- Ability to automate the ordering process
