**Adult &
Pediatric Flu
Vaccines
Available
Call Today!**

Flu vaccines are recommended for kids in preschool and elementary school to help keep them healthy. In fact, all children 6 months and older should get flu vaccines. Getting all of your children vaccinated—as well as other family members and caregivers—can help protect infants younger than 6 months old. Ask your family's doctor or nurse about getting flu shots or the nasal spray to protect against flu.

It's important to know that flu can be serious, even for healthy, young people. Preteens and teens are no exception. So older kids should get at least one flu vaccine every year.
