ASC Expertise – Your Network of Trusted Advisors
Henry Schein Consultants are structured to support the urgency of the operating room. Our service model features national representation that works in concert to provide ASCs a differentiated level of support. Additionally, Henry Schein partners with branded suppliers to conduct procedural supply chain assessments. These assessments give ASC leaders the opportunity to review their ASC procedural workflows and revise procedural programs that enhance ASC organizational goals and requirements.

“The number one differentiator of Henry Schein is responsiveness.”
Henry Schein ASC Customer
Supply Chain Efficiency

Henry Schein has partnered with IOS to bring you a robust multivendor ordering platform that allows you to manage ALL vendor transactions from one simple ordering portal. With our multivendor ordering system, you can create orders and receive remittances from hundreds of various medical supply and device companies. This is a comprehensive materials management platform designed specifically for the unique needs of an ASC.
