## ChloraPrep™ Patient Preoperative Skin Preparation with Sterile Solution™

### BD

- Sterile solution: Patented sterilization process of the antiseptic solution achieves a minimum sterility assurance level (SAL) of 10-6
- Sterile delivery: The sterile, single-use applicator facilitates aseptic touchless technique by moving the clinician's hand away from the patient's skin, helping to reduce the risk of extrinsic contamination
- Proven efficacy: The FDA-approved dual antiseptic of 2% chlorhexidine gluconate (CHG) + 70% isopropyl alcohol (IPA) kills bacteria more effectively than single agents, providing both immediate and persistent activity
- Preoperative indication: The only CHG and IPA skin antiseptic to offer 2-log reduction for dry sites, and 3-log reduction for wet sites, on its entire portfolio

# New name, same trusted product

3M's healthcare business became a standalone company in 2024 — but the name on all of our products hasn't changed quite yet. Soon, the products you use will be updated with our new company name (Solventum) and fresh product packaging.

Our collaborative partnership with you isn't going anywhere. For more information, contact your local Henry Schein Medical Representative.

## Medical tapes and wraps

# Drive efficiency in your clinical practice and reduce tape SKUs

A choice that's critical to care. At Solventum, formerly 3M Health Care, we've made it easy to choose the right securement for each patient and application, with four classes of securement that can work harder and smarter.

### Non-adhesive

#### 3M™ Coban™ NL Non-Latex Self-Adherent Wrap\*

Non-adhesive securement for clinical applications such as blood draws, dressings, immobilization, securement for difficult to dress areas (head, fingers, toes) and support and mild compression for soft tissue injuries (i.e. strains, sprains).\*

### Multi-purpose

#### 3M™ Micropore™ S Surgical Tape\*

Multi-purpose securement for clinical applications such as blood draws, light-weight dressings, IV lines and tubing (secondary securement) and non-critical tubes.

### Flexible

#### 3M™ Medipore™ H Soft Cloth Surgical Tape

Flexible securement for clinical application such as dressing and added pressure, IV lines and tubing (secondary securement), when swelling or movement is anticipated, central venous catheters (secondary securement), chest tubes and surgical drain tubes.

### High-adhesion

#### 3M™ Durapore™ Surgical Tape

High-strength securement for clinical applications such as urinary catheters, nasogastric tubes, orogastric tubes and patient positioning.

## SURGICAL SENSITIVITY WITHOUT COMPROMISE

### PRECISION AND PROTECTION FOR DELICATE PROCEDURES

In delicate surgical procedures, reduced tactile sensitivity can compromise patient safety. To address this concern, GAMMEX™ PI Hybrid Micro surgical gloves features an ultra-thin design. They're up to 24% thinner than standard non-latex gloves, providing exceptional sensitivity and dexterity.

They are also designed with HYBRID™ Technology, delivering an enhanced, latex-like comfort and high durability. Surgical professionals can work on intricate tasks confidently, knowing they are well protected.

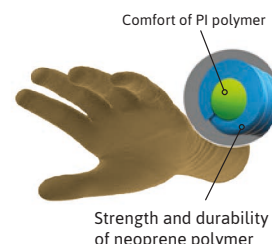

#### GAMMEX™ PI Hybrid Micro

Hybrid synthetic micro surgical gloves that is suitable for delicate procedures

- **Smooth with micro-textured finish:** Delivers secure grip and handling of instruments
- **HYBRID™ Technology:** Delivers latex-like comfort and high durability
- **Reduced allergy risks:** This synthetic blend material eliminates Type I latex allergy risks

### SOL-CARE™ Luer-Lock Syringes with Safety Needles

#### SOL-MILLENNIUM

Allows for single-handed activation of safety feature. Safety mechanism is an integrated part of the needle and provides an audible click to indicate safety activation. Can be used with any standard Luer-lock or slip-tip syringes. Bevel up needle allows for low-angle injections. Once activated, needle remains securely fastened via a double-lock mechanism.

## TOPICAL SKIN ADHESIVE - OCTYL

High-Strength 2-Octyl Cyanoacrylate Formulation

### Advantages

Rapid set time

Flexibility without a plasticizer

Ergonomic ampule designed for ease of handling and targeted application

Provides an effective microbial barrier and water-resistant protection

High tensile strength

Unique formulation will not solidify in ampule, allowing all .5 ml to be used

Gravity fed applicator delivery system - no need to squeeze ampule

Glass-free reservoir containing 0.5mL of Topical Skin Adhesive

Rigid sleeve helps prevent bending of applicator during adhesive application

Angled applicator tip changes color in the presence of adhesive

Perforation in the middle, allowing ease of adhesive flow

### Additional Information

Polymerization starts when adhesive comes in contact with tissue or fluid.

All 0.5 ml of adhesive can be used on the patient, as adhesive will not solidify in the ampule.

Topical Skin Adhesive will remain attached to the skin surface until natural cellular regeneration occurs (approx. 5-7 days). If needed, any standard adhesive remover product may be used to release the adhesive from the skin. Peel off the film, do not pull the skin apart.

## Surgical Sutures

From a Name You Can Trust.

*Maxima® Sutures by Henry Schein®*

### POLYLITH CARD

Helps reduce moisture content, an advantage with absorbable suture materials that degrade by hydrolysis.

### NEEDLE PARK

Two needle parks to accommodate a wide range of needle types, sizes, and double-arm sutures. Needle park also protects needles from damage.

### RACETRACK FEATURES AND BENEFITS

### LARGER DIAMETER

Larger overall diameter to ensure less suture memory and minimize the number of suture rotations around track.

### PRESS-PUSH NEEDLE LIFT

The tab, when pressed from behind, lifts for easy needle removal.

- Silicone-coated 300 series stainless needles give finer point geometry for superior penetration
- Precision needles are strong enough to resist bending, yet ductile enough to resist breaking
- Racetrack packaging helps reduce material memory as the suture is released from the track
- Large breadth of suture and needle combination for a range of surgeries
- Significant cost savings for your clinic compared to the leading brand

## ePM 10A Configured Patient Monitor MINDRAY

Exceptional user interface and enhanced parameter functionality, delivering a monitoring solution to fit multiple care environments. Immediate and measurable benefits of the smartphone-like user interface that delivers 98% of all common monitoring functions with just 2 gestures, reducing time clinicians spend navigating monitor functions, and more time on what matters most: patient care. Advanced monitoring options include 3- and 5-lead ECG, SpO<sub>2</sub>, NIBP, respiration, and temperature supporting multiple clinical workflows. ePM 10A has a compact, ergonomic design that is perfectly suited for healthcare facilities managing a steady flow of patients daily. Add optional CO<sub>2</sub> capability to aid clinicians to identify signs of patient deterioration due to respiratory distress. Manufactured with industry-leading plastics that stand up to the most stringent medical-grade cleaners. The concealed grab-and-go handle eliminates hard-to-clean crevices and eases clinical workflow while on the move. Flexible mounting options for bedside and transport.

## trophon<sup>®</sup>2 Ultrasound Probe Disinfection Device NANOSONICS

This fully enclosed, automated high-level disinfection (HLD) system streamlines workflow with a simple, fast, and integrated solution. Designed specifically for patient examination rooms, the trophon2 enables efficient point-of-care reprocessing.

Key features include:

- Enhanced user compliance and audit readiness through automation, with comprehensive data capture throughout the reprocessing workflow
- AcuTrace<sup>®</sup> RFID technology that records operator, probe, and cycle data to ensure and demonstrate compliance
- A printer that generates labels with AcuTrace inputs and disinfection results
- The ability to download disinfection records to a USB
- An enclosed system with an easy-close door that seals automatically
- A safe-to-handle disinfection cartridge operable with gloves
- No special ventilation requirements
- Environmentally friendly design for safe and easy disposal
- Compatible with more than 1,300 ultrasound probes; approved and endorsed by 26 probe manufacturers

## Midmark M11<sup>®</sup> Steam Sterilizer MIDMARK

The M11 is engineered with user-friendly features to simplify compliance, streamline cycle operations, and enhance device care tracking. These improvements help minimize transcription and documentation errors, which can account for up to 56% of sterilization issues. Automated mechanical monitoring and chemical indicator reporting not only save time but also facilitate easier staff training, instilling confidence in the sterilization process.

Key features:

- 5" fingerprint-resistant touchscreen allows for easy navigation of cycle setup and other operations, even while wearing gloves. Users can choose between light and dark modes to suit their preferences.
- Stay prepared for audits with built-in reminders, notifications, and user authentication. The sterilizer offers unlimited storage for routine care events throughout its lifespan, along with automated cycle recordkeeping.

#M11-050, 115 Volt  
(148-3221).....ea

- Midmark sterilizers are built to last, with an upgraded chamber design that extends the device's life to 25,000 cycles. This can reduce the need for maintenance by both users and certified technicians by more than half.
- Height: 18.6" (47.2 cm), Width: 17.8" (45.2 cm)
- Chamber dimensions: 11" x 18" (27.9 cm x 45.7 cm)

## Vistacool<sup>™</sup> Direct-to-Drain Cooling System for Autoclave Wastewater MIDMARK

Efficiently cools sterilizer wastewater before safely directing it to the drain. This non-electric, self-monitoring, and self-regulating system allows users to focus more on patient care and less on equipment maintenance.

Key benefits:

- Eliminates the need to handle hot wastewater tanks, preventing potential injuries and avoiding damage to cabinetry from spills or overflows
- Prevents scalding hot wastewater from damaging plumbing with built-in backflow prevention that meets or exceeds local plumbing codes
- Automates a time-consuming task with a simple, self-monitored system, reducing the need for manual intervention
- Dimensions (including fittings): 4"W x 13"L x 17"H (10.2 cm x 33.1 cm x 43.2 cm)
- Tank volume: 3 gal (11.4 liter)
