**GLOBAL REFLECTIONS**
A Green Program
For Healthcare Professionals®

 **HENRY SCHEIN®**

Henry Schein Embraces Environmental Stewardship and Offers Customers Opportunities to “Go Green”

At Henry Schein, protecting the richness and beauty of our planet is a key pillar of our commitment to “helping health happen.” Whether our Team Schein Members are finding new ways to conserve energy at the workplace or improving our facilities to receive LEED certification, we continue to support programs that reduce our carbon footprint and promote sustainability.

To help others “go green,” Henry Schein offers customers the opportunity to purchase environmentally friendly products for their practices through our Global Reflections Program. A portion of the proceeds from Global Reflections purchases is donated to the Henry Schein Cares Foundation in support of environmental causes.

Since 2012, the Henry Schein Cares Foundation has donated more than \$100,000 in grants to help support the **American Association of Dental Office Managers (AADOM) Green Leader Initiative**, which cultivates the development of continuing education aimed at promoting the “greening” of dental offices. Every year, AADOM, in conjunction with the Global Reflections Program, also recognizes a **“Green Leader,”** a pioneering practice manager who leads their team to “go green.”

*This year, AADOM and the Henry Schein Cares Foundation presented the **2015 Green Leader Award to Paulina Song** from **Dr. Hai Huong’s** practice, **Lake Merritt Dental**, in Oakland, California. Mrs. Song was recognized for her outstanding leadership in inspiring her team to reduce waste and pollution; conserve energy, water, and money; and incorporate a wellness-based and high-tech approach in the dental practice. Mrs. Song’s hard work helped her dental office receive California’s Climate Leader Award at the Cool California Small Business Award in 2014.*

**Natural Anticavity Fluoride
Toothpaste for Children
TOM'S OF MAINE**

All-natural toothpaste with the ADA Seal of Acceptance. Features naturally sourced sodium monofluorophosphate as its active ingredient to provide cavity protection, and calcium and silica to clean. Pure, fruit-flavor oils—not artificial sweeteners, dyes, preservatives, colors, or sparkles—are the basis for the kid-friendly appeal. No animal testing. Silly Strawberry flavor.

4.2 oz. TubeEach **2.99**

Specify:
Fluoride (798-0018)
Fluoride-Free (798-0016)

**Natural Anticavity Toothpaste
TOM'S OF MAINE**

Contains fluoride for cavity prevention, calcium for clean teeth, and whole spearmint oil for clean, fresh-feeling mouth. Has the ADA seal. Does not contain saccharin, artificial sweeteners, preservatives, colors, flavors, or animal ingredients. No animal testing. Spearmint flavor.

5.5 oz. Tube
(798-0014)Each **2.99**

**Natural Enamel Strength®
with Fluoride Toothpaste
TOM'S OF MAINE**

First ADA-accepted natural fluoride toothpaste. Protects and restores the enamel on your teeth. Builds protection against tooth sensitivity by blocking the pain that causes sensitivity, so you are free to eat what you want. All-natural formula in Peppermint flavor. Contains fluoride.

4 oz. Tube
(798-0040)Each **4.99**

**Natural Antiplaque Tartar Control
Plus Whitening Toothpaste
TOM'S OF MAINE**

Helps control plaque and tartar buildup and whitens teeth every time you brush, without artificial ingredients or harsh abrasives that can damage enamel. Silica removes stains that form on teeth over time, making teeth whiter. Does not contain saccharin, artificial sweeteners, preservatives, colors, flavors, or animal ingredients. No animal testing. Peppermint flavor. Fluoride-free.

Top Tips for a greener practice

1. "THINK GLOBALLY, ACT LOCALLY."

- It all starts with a mind-set. Every dental office is already "acting locally" by having a physical location relatively close to its patients, but is your office considering the larger impact of its business practices?
- When we think globally we recognize that our stewardship on the local level ripples out. You can't do everything, but you can do something! Patients will appreciate your leadership.

How to have the perfect chair-side manner:

ScanX digital PSPs provide exceptional comfort for ALL of your patients.

Even those with:
Small mouths, Large tori, Gag reflex

**30 times thinner than wired sensors!*

Trade-in your old Film Processor OR Scanner and purchase a **NEW ScanX Swift System (PN G8000) & Receive a \$250 Rebate!**

To order please contact your local Henry Schein Equipment Specialist. For more information, visit www.airtechniques.com

Terms and Conditions:

- Specials are valid in the U.S. and Canada from January 1, 2016 — June 30, 2016
- To redeem your rebate, please complete the online form and fax a copy of your invoice showing the purchase of a ScanX System to Air Techniques at 516-433-3831 or email it to pjenkins@airtechniques.com no later than 07/31/16
- Cannot be combined with any other offers.

Scan the QR code to register for your rebate online or visit <https://goo.gl/h43hT3>

TWIST A LITTLE CLOSER

| *With Hu-Friedy Swivel Inserts*

ROTATES AT THE RIGHT SPOT FOR ULTIMATE CONTROL

The **most unique insert of its kind**, Swivel delivers what your customers care about most: the best clinical outcomes for their patients. While competitors' inserts require a rotating handpiece for a similar effect, Hu-Friedy Swivel inserts twist right from the grip for superior efficiency, maneuverability and effectiveness. Now *that's* something to shout about.

How the best perform

SAVE 10%

Healthy Teeth & Gums Toothpaste

NATURAL DENTIST

Uses effective natural cleaning ingredients and provides maximum protection against cavities and acid erosion without SLS, artificial dyes, or artificial sweeteners.

5 oz. TubeEach **6.99**

- Specify:
- All-in-One Fluoride (679-0126)
- Fluoride-Free Peppermint Sage (679-0129)
- Whitening Peppermint Twist (679-0124)

Wicked Cool!™ Toothpaste For Tweens TOM'S OF MAINE

Fluoride toothpaste that features a mild mint flavor for tween kids (8+ years) who have outgrown fruit or bubblegum flavors but do not like the strong mint flavors in many adult toothpastes. It is ADA accepted to help prevent cavities, strengthens enamel, freshens breath, and has no artificial dyes, sweeteners, or flavors.

4.2 oz. Tube (798-0030).....Each **2.99**

SAVE 10%

Cavity Zapper® Toothpaste NATURAL DENTIST

Fluoride gel toothpaste that is naturally flavored and colored. Prevents cavities and does not contain sodium lauryl sulfate. Also reduces plaque buildup while removing stains, strengthens tooth enamel, and freshens breath.

5 oz. TubeEach **6.79**

- Specify:
- Berry Blast (679-0047)
- Groovy Grape (679-0137)

SAVE 10%

Healthy Teeth Fluoride Rinse NATURAL DENTIST

Strengthens tooth enamel to help prevent cavities. ADA accepted, alcohol-free, and no harsh ingredients. Once-daily regimen protects hard-to-reach tooth surfaces. Fresh Mint flavor provides long-lasting fresh breath and contains xylitol. Cruelty-free. Made in the USA. Fresh Mint flavor.

16.9 oz. Bottle (679-0116)Each **8.79**

SAVE UP TO \$10⁰⁰

Healthy Gums Mouth Rinse NATURAL DENTIST

Scientifically formulated blend of herbal ingredients for optimal gingival care. Reduces and prevents bleeding gums. Kills bad-breath germs, provides long-lasting fresh breath, and soothes and protects mouth and gingiva. Contains no alcohol, artificial dyes, or artificial flavors.

16.9 oz. BottleEach **8.79**

- Specify:
- Peppermint Twist (679-0115)
- Orange Zest (679-0130)

2.0 oz. Sample Packets—Peppermint Twist (679-0136)50/Case **75.99**

SAVE 10%

Cavity Zapper Fluoride Rinse NATURAL DENTIST

Fluoride formulation is ADA accepted to help strengthen teeth and fight cavities. The perfect solution for those with braces, because of its herbal blend with aloe vera to soothe irritations. Alcohol-free. Made in the USA. Berry Blast flavor.

16.9 oz. Bottle (679-0117)Each **8.79**

Top Tips for a greener practice

2. MAKE IT DIGITAL! MAKE IT NOW!

- Step one: are you using digital x-rays? If yes, continue reading. If no, please stop and order your system today. You'll join the majority of your dental colleagues that are saving thousands of dollars a year on lead foils and chemicals they don't have to worry about disposing of responsibly, all with staff time savings and better image quality.
- Step two: Is digital software running your practice? Nearly all your patients have a computer in their pocket that's as powerful as the one that put a human being on the moon; shouldn't your office be run by software and digital applications? Shouldn't you offer text message reminders? Now that everyone's 90-year old Aunt has a Facebook page, shouldn't your dental office?

3. WHAT YOU DON'T USE, YOU DON'T PAY FOR.

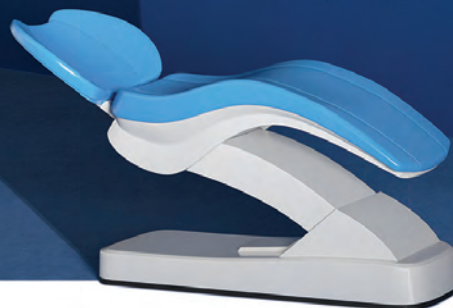

- Interested in reducing your power, water and waste management bills?
 - Convert to LED operatory lights and use less electricity and save on halogen bulbs
 - Shut off equipment every night and reduce your "phantom load"
 - Install a waterless, on-demand vacuum system and save almost 500 gallons of water a day, and reduce power consumption.
 - Communicate with specialists, insurance companies and vendors via email and reduce paper use and janitorial costs.

EvoraPro® Probiotics for Oral Care ORAGENICS

Supports dental and gingival health as it naturally whitens teeth and fights bacteria that cause bad breath. Each mint contains an extra-strength blend of patented ProBiora3® probiotics. These beneficial bacteria bind to teeth and go deep under the gingival margin; they crowd out undesirable bacteria to become the colonization center of a healthy, balanced oral microflora, necessary to sustain ongoing dental and gingival health.

Adult
(120-0952)90/Box **33.99**

Top Tips for a greener practice

4. KEEP THEM "IN-OFFICE."

- If you've been contemplating the shift to in-office restorations, now is the time. You'll save money and reduce waste by eliminating the need for impression materials and you'll see improved staff efficiencies and treatment acceptance (what patient wouldn't prefer quicker, goop-free impressions?)
- The carbon footprint of your office will be lower as you'll eliminate the environmental impact from your lab picking up models and delivering restorations, and the impact of patients having to return to the office for a seating appointment.

5. KEEP IT OUT OF THE WATER AND AIR.

- In 2014, the US EPA estimated the annual waste from placing and removing amalgam fillings at 31.4 tons, 9 tons of which is discharged by dental offices to local wastewater treatment facilities¹
- This is up from the EPA's earlier estimates that dental offices contributed 3.7 tons of heavy metal waste to local wastewater. Voluntary installation of an amalgam separator, and proper use of chairside traps and hazardous waste disposal would eliminate nearly all of this toxic waste

Pure and Simple: Dental Unit Waterline Compliance

Best practices of infection prevention and control provide safety in the clinical environment and treatment protocols for patients and dental professionals. Exposure to poor water quality can pose a health risk for people and conflicts with universally accepted infection prevention protocols. Noted most recently, in 2011 was the fatal case of an 82-year-old otherwise healthy woman who developed Legionnaire's disease after a dental visit¹. The goal of effective dental waterline treatment is to reduce the number of microorganisms present in the water, thereby helping to break the chain of infection.

Dental unit waterline contamination was first reported in 1963². Research has shown microbial counts can reach <200,000 CFU/mL within 5 days after installation of new dental unit waterlines³ and contamination levels

of up to 1 million CFU/mL of dental unit water have been documented^{4,5}. In 1995, the American Dental Association issued a statement encouraging improvement in the design of dental equipment to offer delivery of on the outgoing water quality levels used in non-surgical dental treatment with 200 CFU/mL or fewer⁶. Based on standards for potable drinking water by the Environmental Protection Agency, the American Public Health Association, and the American Water Works Association, the Centers for Disease Control and Prevention guidelines (2003) state the number of bacteria in water used as a coolant/irrigant for nonsurgical dental procedures should be less than 500 CFU/mL⁷.

The following options are available to address the biofilm with its resident microorganisms and optimize dental unit water quality:

- Self-contained water systems
- Point-of-use filters
- Chemical treatment protocols
- Municipal water treatment systems
- Slow-release cartridge devices

Point of use filters placed at the end of each waterline often have pores too large to effectively trap bacteria, as well as slowing the flow of water in the tubing which contributes to biofilm growth, and they provide additional surface area for microbial growth. There is an ongoing expense of filter replacement every 7 to 10 days.

Chemical agents available commercially are designed to inactivate and remove biofilms or deter attachment of biofilm in new or cleaned systems. Daily compliance with tablets, along with monthly shocking, and quarterly monitoring are key to these technique sensitive protocols. Of concern, residue from undissolved tablets is a potential source of

costly repairs to handpieces.

One innovative waterline disinfection cartridge system, available for municipal or bottled water, offers a continual slow release of iodinated resin. As water flows through the cartridge it pulls elemental iodine from the resin into the water stream. From there the iodine interacts, killing bacteria in the water. The cartridge is effective for one-year after being installed making compliance effortless. This simple system is FDA and EPA cleared to provide water under 200 CFU/mL with absolutely no testing requirement. With no protein attached to the iodine, it poses no risk for allergies and any "unused" iodine evaporates into the air. Unlike hazardous heavy metal based cartridges, the used iodine cartridge can be simply disposed of into the trash.

Effective dental unit waterline maintenance is a key component of an infection control program. Criteria for choosing a dental unit waterline treatment system includes ability to control microorganisms and biofilm at required standards, product and labor costs, safety to equipment and the environment, and ultimately compliance.

CDC Recommendations

- Flush lines at the start of the day and between patients for 20 - 30 seconds
- Establish a protocol to achieve and maintain water lines with less than 500 CFU/mL
- Strictly follow manufacturer's instructions and protocol for maintaining water quality
- Monitor water quality based on manufacturer instructions

ADA on Dental Unit Water Lines (2004)

- Dental unit water systems regularly maintained to deliver water of an optimal microbiologic quality
- Employ commercial devices to meet water quality standards of less than 200 CFU/mL
- Monitor Biological water quality
- Dental unit water systems must be maintained to deliver water of an optimal microbiologic quality
- Adopt the use of commercial devices to achieve the safe water quality standard of < 200 CFU/mL
- Use EPA-registered and FDA-cleared dental waterline treatment product or device according to manufacturer's directions.
- Strict adherence to water quality protocols
- Monitor water quality

**Henry Schein
going green**

1. LEED CERTIFICATION

- Each of our offices in Melville, NY achieved LEED (Leadership in Energy and Environment Design) Certification.
 - This certification recognizes that our corporate offices have been designed to conserve energy and water, reduce waste and greenhouse gas emissions, and be safer and healthier for workers.
 - According to the U.S. Green Building Council, companies that participate in the LEED process demonstrate "leadership, innovation, environmental stewardship and social responsibility."

2. ENERGY REDUCTION

- We have made significant improvements to the energy efficiency of the lighting at our facilities.
 - 100% of the Henry Schein Dental Sales and Service Centers have energy efficient fluorescent lighting.
 - Corporate Facilities team replaced all the metal halide parking lot light fixtures with technologically advanced LED site lighting in Melville, NY.
 - Motion-activated light sensors, installed throughout our offices, also significantly drive down energy consumption.
 - More than 28% reduction in energy consumption at U.S. distribution centers.

Henry Schein
going green

**3. HEATING AND
AIR-CONDITIONING
IMPROVEMENTS**

- Over the past decade, the heating and air-conditioning technology at our operations has been upgraded to modern efficiency standards.
 - Our Henry Schein Dental Sales and Service Centers use solar film on facilities' windows to control temperature and energy leakage.
 - Melville East, one of the buildings at our headquarters, replaced outdated and inefficient fuel oil boilers with two new condensing style dual-fuel boilers for improved equipment efficiency.
 - Melville West, a second building at our headquarters, added a "cool roof" membrane made of a single-ply, tri-polymer alloy with reflective characteristics, thereby reducing our reliance on air conditioning to control temperatures.

**4. GREENHOUSE GAS
EMISSION REDUCTION**

- Henry Schein partners with transportation operations that participate in the EPA's "SmartWay" program, a public-private collaboration that helps us transport our goods in the cleanest, most efficient way possible in order to protect the environment and enhance the United States' energy security.

**5. LEADERSHIP IN
GREENER PURCHASING
AWARD**

- Henry Schein received a "Leadership in Greener Purchasing Award" from Office Depot.
 - The award gave special recognition to Henry Schein for its leadership in purchasing of LEED-related products.
 - Henry Schein was one of 28 award winners out of 17,000 Office Depot customers evaluated and recognized for its efforts.

Henry Schein
going green

6. RECYCLING

- In our facilities' throughout the world, we have programs to recycle aluminum, glass, computers, electronic equipment, printers, and toner cartridges.
 - Team Schein Members are encouraged to bring in old cellphones, un-needed cellphone chargers, as well as cellphone and electronic cables to be safely recycled.
 - Separate waste containers have been placed at each desk in our buildings to allow for the separation of trash and paper.
 - Corrugated cardboard accumulated from packing materials are collected during the day and evenings by our housekeeping staff and deposited into an on-site compactor.
 - Our lamp recycling program reduces the negative impact associated with the disposal of mercury-containing fluorescent lamps.
 - At distribution centers, we are especially diligent about recycling all materials. Nearly 50,000 metric tons of materials were recycled at U.S. distribution centers.

7. eMSDS

- In March 2013 Henry Schein unveiled a new option on our website where customers can retrieve their MSDS sheets and save them to their hard drive.
 - They can search for MSDS by order date range, invoice number, order number, item number or manufacturer item number.
 - A pilot group of 10,000 accounts are no longer receiving printed MSDS with their orders and instead are receiving messages on their paperwork to go to their online account and retrieve their MSDS.
 - As a result, we are saving over 15,000 pieces of paper a week. We expect to have over 70,000 accounts converted to eMSDS by year's end and expect to suppress printing of over 2 million pieces of paper a year while giving our customers an easier and greener way to find and save the documents they need.

Soothe-Guard Air® Lead-Free Protective Aprons

DENTSPLY RINN

25% lighter. Easy to clean. Environmentally friendly, as it requires no special disposable procedure.

ClearView Single-Use Nasal Hoods ACCUTRON

Single-use nasal hood-in-hood for the delivery of nitrous-oxide conscious sedation. The only nasal hood that demonstrates "breathing through the nose" respiration (condensation appears in the clear hood). Offers a low profile for expanded field of view. Soft inner hood creates a good seal around the patient's nose and helps minimize ambient nitrous oxide. Fits other brands of scavenging circuits. Available in a variety of scents and colors. Recyclable and is not made with natural rubber latex.

Unscented Grey (128-0415)
Outlaw Orange (128-0416)
French Vanilla (128-0417)
Fresh Mint (128-0418)

A-dec began with a simple idea: Make the best better.

An invention and a dream.

More than 50 years ago, Ken and Joan Austin founded A-dec with an invention and a dream: to better the world of dentistry. Even back then, the Austins knew that every successful product required a tremendous amount of perspective from the dentist. They worked in partnership with engineers, designers and dental professionals, developing products that revolutionized dentistry. Ever since, the A-dec story has been one of quality through caring, one product at a time.

That will never change.

Every part matters.

A-dec builds simple, intuitive products that are made to last. And last. With the continuous mission to build the best better, they perfect every part that goes into an A-dec solution. They know that every part matters, across the entire line of products. They don't mind sharing that fact, either. On regularly scheduled tours to the facility, dealers and

their dentists are invited behind the scenes for a close-up look at how products are made—and the extreme testing they must endure in the laboratory, as they are tested beyond fail to identify potential weak spots years down the road.

A legacy of caring.

A-dec's commitment to quality is absolute, and customer support is taken just as seriously. Technically trained, on-site Customer Service Representatives answer the phones. Educated to help with everything from explaining how to clean chairs and maintain handpieces, to troubleshooting while on a video chat, doctors will never be left without an answer or support. With encyclopedia-like knowledge, the care team can literally answer questions about every A-dec product, including equipment that hasn't appeared in a catalog in more than 25 years. That's saying something, because A-dec's products range from handpieces and motors, to chairs, furniture, delivery systems and infection control solutions. A-dec is one of the largest dental equipment manufacturers in the world, but even though their reach extends more than 100 countries, they still operate on the ethical philosophies and principals that were founded in the company's beginning.

The A-dec vision has not only helped revolutionize the world of dentistry, it has created a legacy of caring. When you are dedicated to improvement and committed to the well-being of dentists, it makes a difference. And that will never change.

**Citrus II
BEAUMONT**

100% natural citrus doesn't just mask strong odors, it destroys them instantly. Works for any airborne odor. Nontoxic, hypoallergenic, and biodegradable, so it's even safe for asthmatics and allergy-sensitive people.

Pump Spray7 oz. **12.99**

Specify:
Original Blend (100-8671)
Fresh Lemon (101-4657)

Oxo-Biodegradable Plastic Bags

Bags look and feel like regular plastic, and are just as durable. You will not notice a difference until the bag has been exposed to light or heat for prolonged periods of time. Degradation begins in about 2 years, depending on UV light and heat exposure. Fastest degradation occurs when they become litter. Usable for 5+ years if stored inside. Bags do not emit methane in landfills and will help reduce landfill volume, maximize capacity, and aid in compression. Recyclable, provided they have not degraded substantially. Bags conform to international standard ASTM D6954-04 for Plastics that Degrade in the Environment by a Combination of Oxidation and Biodegradation.

Small 7½" x 9"100/Pack **27.99**

Specify:
Keep Your Smile Beautiful (367-4465)
Teeth Getting Brushed (367-9892)

Lemongrass (528-1490)Each **21.29**

In 1989, Smead realized we could have great impact on the environment by diverting used paper from landfills and re-using it in the manufacture of filing products. Today, every Smead-branded paper product we make contains post-consumer recycled material. Hundreds of our items meet or exceed the progressive requirements used by government agencies and corporations when choosing earth-friendly office supplies. At Smead, keeping the world organized also means keeping the world sustainable.
