## Henry Schein Embraces Environmental Stewardship and Offers Customers Opportunities to "Go Green"

At Henry Schein, protecting the richness and beauty of our planet is a key pillar of our commitment to "helping health happen." Whether our Team Schein Members are finding new ways to conserve energy at the workplace, or improving our facilities to receive LEED certification, we continue to support programs that reduce our carbon footprint and promote sustainability.

To help others "go green," Henry Schein offers customers the opportunity to purchase environmentally-friendly products for their practices through our Global Reflections Program. A portion of the proceeds from Global Reflections purchases is donated to the Henry Schein Cares Foundation in support of environmental causes.

Since 2012, the Henry Schein Cares Foundation has supported, through educational grants, the **American Association of Dental Office Management's (AADOM) Green Leader Initiative**, which cultivates the development of continuing education aimed at promoting the "greening" of dental offices. Every year, AADOM, in conjunction with the Global Reflections Program, also recognizes a "**Green Leader**," a pioneering practice manager who leads their team to "go green."

This year, AADOM and the Henry Schein Cares Foundation presented the **2016 Green Leader Award** to **Claudia Paye, FAADOM** from **Woodpoint Dental, Brooklyn, NY**. Mrs. Paye was recognized for her outstanding leadership in inspiring her team to reduce waste, pollution; conserve energy, water, and money; and incorporate a sensible road for fellow teammates to do the same.

"Going green in our office has helped set both my coworkers and I apart from other practices. We are able to lead the way in our community and set an example of striving for more. For me, it is proof of one person's actions having a direct effect. We may sometimes feel that we cannot change or create change in others, but in our practice we made it our mission to "be that change" and strive to make our green efforts work. Our accomplishments have not gone unnoticed. Our patients feel the difference. Our staff feels rewarded. We look to the future with promise to keep improving and to keep our mission pure. Hopefully our actions will inspire and encourage others. I personally find this quote inspiring: "Your life amounts to no more than one drop in a limitless ocean. Yet, what is any ocean, but a multitude of drops?" ~Claudia Paye, FAADOM 2016 Green Leader

*Help your patients relax!*

**Nitrous Oxide/Oxygen Sedation**

**ClearView™  
Single-Use Nasal Mask**

(3 Sizes)

**ClearView™**  
SINGLE-USE NASAL MASKS

ClearView™ is a trademark of Crosstex International, Inc.

**The only nasal mask that actually demonstrates  
that your patient is breathing through their nose!**

- Clear outer mask shows slight fogging when patient breathes properly through nose, and allows view of nasal/facial seal of the soft inner mask
- Low profile expands clinical field of view, provides easier access to patient's mouth, and keeps patient from making mask adjustments to see activities, operator TV, etc.
- Appealing colors/scents delight and engage patients; unscented available
- Mask-in-mask design diminishes ambient nitrous oxide
- Single-use minimizes cross-contamination; saves staff time
- CO<sub>2</sub> Capnography version available to fulfill regulatory requirements
- Use with a variety of scavenging circuit brands

# Top Tips for a greener Practice

Dental practices, like all businesses, produce waste. According to the Eco-Dentistry Association, every year dental practices dispose of:

- 4.8 million lead foils
- 28 million liters of toxic X-ray fixers
- 3.7 tons of mercury waste
- 1.7 billion sterilization pouches
- 80 million chair barriers, light handle covers, and patient bibs

However, there are things you can do to reduce, eliminate, and help counter-balance this waste.

Here are some ways to help your dental office go green!

- 1. Go digital** – Going paperless can help you green up your office, as well as help save money and time. Using office management software such as Dentrix and inventory control programs like Aruba can help you cut paper use and stock room problems while also making your practice more efficient.
- 2. Cut down on chemicals** – Switching over to digital X-rays eliminates the need for development chemicals and lead foils, and they reduce radiation exposure for technicians between 75% to 90%. Another way to cut down on chemicals is to use steam sterilization for instruments.
- 3. Choose renewables** – Check to see if your utility company has a renewable energy option. Purchase products made from sustainable resources, too. Think fabric (not paper) lab coats, cork or bamboo floors, and bamboo toothbrushes as a giveaway item.

## DISPOSABLES

**SafeGauze®  
Green  
Nonwoven  
Sponge**

**Medicom**

100% natural and offers premium softness. Eco-friendly alternative made from organically grown cotton. Completely free of toxic pesticides and insecticides. Forest Stewardship Council-certified lyocell. Non-sterile. 4-ply. Made in the USA.

## INFECTION CONTROL

**Vacuum Shock™  
Clean™/Fresh™ System**

**Palmero Healthcare**

Vacuum Shock™ keeps vacuum lines clean and extends pump life. Time-released tablet: use only 1 tablet every 3 months. Clinically proven to keep your vacuum lines free of odor-causing bacteria and functioning at peak efficiency. Vacuum Clean™ restores pressure, keeps vacuum lines clean, and extends pump life. Self-activating tablet releases powerful cleaning enzymes throughout the week. Use only 1 tablet each week. Neutral pH helps reduce dispersal of amalgam into sewer systems. Allows consistent vacuum suction and aseptis. Vacuum Fresh™ is a daily vacuum-line cleansing/deodorizing tablet for effective, end-of-day cleaning. Biodegradable, nontoxic, and noncaustic. Treats cuspidor and evacuation lines.

Vacuum Shock™ Tablets	(134-2375).....6 per Jar	<b>40.99</b>
Vacuum Clean™ Tablets	(134-4467).....45 per Jar	<b>39.99</b>
Vacuum Fresh™ Tablets	(134-6234).....20 per Tube	<b>29.79</b>
Shock & Clean Evacuation System Maintenance Kit	(134-9061).....Ea.	<b>73.99</b>
Contains: 2 jars of tablets (1 of each: Vacuum Shock & Vacuum Clean) & 1-16 oz. dispensing bottle.		

# Top Tips for a greener Practice

**4. Conserve energy** - Turn off lights and equipment when they are not in use. Install energy-efficient appliances, air conditioning, and heating. Think about replacing windows. You'll save on heating and cooling and let in more natural light.

**5. Recycle** - Put recycle bins everywhere that your staff may need them. Check with your waste management company to learn how to recycle items that don't get picked up on a regular basis (batteries, paint, electronics, etc.) You can even find programs that recycle dental instruments into industrial metal.

## INFECTION CONTROL (CONT'D)

### Bio-Pure® Evacuation System Cleaner Sable Industries

Restores and maintains evacuation system flow and function by actively breaking down and digesting organic waste. Noncorrosive, nonfoaming, and neutral pH. Eliminates trap cleaning and removes odor and sludge. Amalgam collector approved. 100% natural and environmentally friendly.

Refill  
(797-0006) ..... 6 oz. **63.29**

(797-0007) ..... 6 oz. **49.29**  
(797-0008) ..... 14 oz. **99.99**  
(797-0009) ..... 48 oz. **285.99**

Dispenser  
(797-0010) ..... Ea. **38.79**

### Enzymax Earth™ Hu-Friedy

Environmentally friendly product offers the same superior cleaning attributes as Enzymax®, but provides lower toxicity, less bioaccumulation potential, less toxic byproducts, and more rapid biodegradability and biodegradable surfactants, plus it contains enzyme stabilizers that are safer for the environment. Does not contain harsh chemicals such as alcohol, ammonia, phosphate, or VOCs, which can pollute indoor air. Multipurpose applications, including ultrasonic cleaner, evacuation cleaner, and presoak.

(600-1756) ..... Gal. **83.99**

### Enzymax Earth™ PAX Hu-Friedy

Environmentally friendly product offers the same superior cleaning attributes as Enzymax® PAX, but provides lower toxicity, less bioaccumulation potential, less toxic byproducts, and more rapid biodegradability and biodegradable surfactants, plus it contains enzyme stabilizers that are safer for the environment. Dissolvable powder packets are the ultimate in convenience. Drop 1 packet into 1 gallon of warm water.

(600-1747) ..... 32 per Box **57.49**  
(600-1755) ..... 96 per Box **141.99**

### Sani-Treet Green® Enzyme Industries

Environmentally friendly enzymatic solution for evacuation-system cleaning and ultrasonic cleaning. It can also be used as an instrument presoak. It is compatible with amalgam separators. Anticorrosive, nonfoaming, biodegradable formula helps break down buildup of organic debris. Leaves a lemongrass/lavender scent.

(115-8012) ..... Gal. **78.99**

Uni-dose  
(115-1669) ..... 50 per Box **71.49**

### ReSURGE™ Instrument Cleaning Solution

#### Sultan Healthcare

Thoroughly cleans and helps protect instruments from harmful effects of everyday cleaning and sterilizing. Unique formulation breaks down protein soils faster; offers a neutral pH; contains corrosion inhibitors to prevent stains, spots, and rust; and helps preserve the instrument's passive layer. Environmentally friendly.

Unit Dose Packets  
Each ½-ounce packet makes 1 gallon.  
Makes 24 gallons.

(312-0113) ..... 24 per Box **57.99**

Metered Dose Bottle  
Makes 67 gallons.

(312-0114) ..... 33.8 oz. **95.99**

### Purit™ Clean-it Biotrol

General-purpose ultrasonic cleaner. Specifically formulated with nonionic surfactants to protect dental instruments. Environmentally preferable formula is biodegradable and contains no phosphates. Unique surfactant blend rapidly lifts soil, blood, tissue, and mucus from dental instruments.

One ounce makes 1 gallon.  
(247-0030) ..... 16 oz. **36.99**

### Clorox® Green Works® CLOROX®

Natural, eco-friendly, biodegradable cleaning products. Cleaning power from the most effective natural sources such as plant-derived cleaning agents, essential lemon oils, corn-based alcohol, earth-based minerals, and filtered water. Products have been recognized as safer products by the Environmental Protection Agency's Design for the Environment Program.

#### All-Purpose Cleaner

Cuts grease, grime and dirt just as well as traditional cleaners. Biodegradable plant-and-mineral formula leaves no harsh chemical fumes or residue. For use on counters, appliances, stainless steel, sealed granite, chrome sinks, and toilets.

(250-7910) ..... 32 oz. **9.49**

#### Bathroom Cleaner

Cleans soap scum, hard water and rust by using a biodegradable plant and mineral-based formula to cut through tough stains. For use on bathroom counters, sinks and tile. Free of harsh chemical fumes.

(250-9443) ..... 24 oz. **12.49**

# Quality. Efficiency. Value.

# Top Tips for a greener Practice

6. **Switch to post-consumer waste (PCW) paper, paper products, and packaging.** Whenever possible, skip paper entirely, but if you have to print, make sure you are using eco-friendly paper. Only PCW paper is made entirely from the paper we place in our recycling bins each day. Making PCW recycled paper uses 45% less energy and creates half the waste of the traditional papermaking process. Purchasing products labeled as 100% PCW ensures you are using papers with the least environmental impact

7. **Power your office with alternative energy** - In many areas of the country you can sign up to purchase "green power" from your current utility provider. Green power is generated from renewable energy sources, such as wind and solar power, geothermal, hydropower, and plant matter.

8. **Use compact-fluorescent (CFL) or LED lights** - CFL and LED lights both last significantly longer and use much less energy than conventional bulbs and can save you up to \$200 per bulb over time.

## MISCELLANEOUS

### Citrus II Beaumont

100% natural citrus doesn't just mask strong odors, it destroys them instantly. Works for any airborne odor. Nontoxic, hypoallergenic, and biodegradable, so it's even safe for asthmatics and allergy-sensitive people.

Pump Spray..... 7 oz. **12.99**

Specify:  
Original Blend (100-8671)  
Fresh Lemon (101-4657)

### Oxo-Biodegradable Plastic Bags Environmentally Friendly

Bags look and feel like regular plastic, and are just as durable. You will not notice a difference until the bag has been exposed to light or heat for prolonged periods of time. Degradation begins in about 2 years, depending on UV light and heat exposure. Fastest degradation occurs when they become litter. Usable for 5+ years if stored inside. Bags do not emit methane in landfills and will help reduce landfill volume, maximize capacity, and aid in compression. Recyclable, provided they have not degraded substantially. Bags conform to international standard ASTM D6954-04 for Plastics that Degrade in the Environment by a Combination of Oxidation and Biodegradation.

Small 7½" x 9"..... 100/PK **33.49**

Specify:  
Keep Your Smile Beautiful (367-4465)  
Teeth Getting Brushed (367-9892)

### Therapeutic Lip Balm

Aihu®

Therapeutic healing lip balm. Protects and moisturizes delicate skin tissue. Its concentrated therapeutic oils are infused with pure African shea butter.

(528-7013) ..... Ea. **13.49**

### Spa Hand Le Crèmes

Aihu®

Moisturizing hand lotion. Soften skin with olive oil rich in vitamin E and antioxidants. Coupled with the heated mules, provides patients with a wonderful spa-like hand treatment. Quick and easy application.

Lemongrass

(528-1490) ..... Ea. **21.29**

## Aquasil® Ultra+ Smart Wetting® Impression Material

*A new impression material focusing  
on key clinical benefits*

*By: Jason H. Goodchild, DMD*

Capturing a final impression is an indispensable step in the fabrication of indirect restorations. However, recent trends towards the use of retraction pastes which may not result in adequate sulcus width, faster setting materials to cut down on setting time, and lower cost materials with potentially inferior physical properties have created a confusing milieu for the clinician. Recently introduced Aquasil Ultra+ Smart Wetting Impression Material is an upgrade in the well-established Aquasil line of polyvinyl siloxane impression materials and has been specially designed to help clinicians in three key areas.

First, impression materials used intraorally need to work in the presence of moisture (*i.e., hydrophilic*) not just when cured but more importantly when they are uncured. To provide hydrophilicity where it's needed most - in the mouth - Aquasil Ultra+ material was designed with a market leading low contact angle as tested on uncured samples at intraoral relative humidity. For the clinician, this translates to improved accuracy of impressions, potentially leading to better fitting restorations that require less chairside adjustments.

Second, impression materials must be strong at the time of mouth removal to prevent the tearing of thin sections in the impression. Impression material syringed into a sulcus is already in thin cross sections. When adequate gingival retraction is not created around equi- and sub-gingival preparations (*in some cases where retraction paste is used instead of retraction cord*), impression material that is expressed into thin sulci is even more vulnerable. To prevent tearing of thin extensions of material and the loss of precious detail, Aquasil Ultra+ material was designed to feature market leading tear strength at both mouth removal and after 24 hours of setting. This benefit should provide confidence to the clinician that the material placed into the mouth will be completely retrieved, and also allow laboratory technicians the opportunity to create extremely accurate working models.

Third, no single impression material will satisfy the infinite number of clinical situations. For single-unit cases a fast set material may be ideal, but for larger prosthetic cases or removable denture impressions options for setting times and viscosities may be needed. Aquasil Ultra+ impression material offers five different viscosities (*xtra-light, light, medium, heavy, and rigid*), two setting times (fast and regular), and several delivery options (*digit® Targeted Delivery System, 50mL cartridges, and DECA™ 380mL cartridges*). With all the variations of Aquasil Ultra+, clinicians can match the most appropriate viscosity, timing, and delivery for each specific clinical situation.

Getting the final impression done correctly is vital for many factors, and one of the keys to accomplishing it is picking the right impression material. Aquasil Ultra+ Smart Wetting Impression Material was designed with key clinical benefits to give clinicians the best chance for recording an outstanding impression.

# SONIC BOOM

## THE SOUND OF QUALITY

When energy waves are accelerated fast enough through the air it can achieve a sonic boom. This was the inspiration in the development of our latest ultra-thin Aurelia **Sonic® Nitrile Glove**. We've revolutionized how strength, comfort and tactile sensitivity come together to enhance your experience while your hands are moving at the speed of sound.

Free goods must be same brand as purchased.

## 1. LEED CERTIFICATION

- Each of our offices in Melville, NY achieved LEED (Leadership in Energy and Environment Design) Certification.
  - *This certification recognizes that our corporate offices have been designed to conserve energy and water, reduce waste and greenhouse gas emissions, and be safer and healthier for workers.*
  - *According to the U.S. Green Building Council, companies that participate in the LEED process demonstrate "leadership, innovation, environmental stewardship, and social responsibility."*

## 2. ENERGY REDUCTION

- We have made significant improvements to the energy efficiency of the lighting at our facilities.
  - *100% of the Henry Schein Dental Sales and Service Centers have energy efficient fluorescent lighting.*
  - *The Corporate Facilities team replaced all the metal halide parking lot light fixtures with technologically advanced LED site lighting in Melville, NY.*
  - *Motion-activated light sensors, installed throughout our offices, also significantly drive down energy consumption.*
  - *More than 28% reduction in energy consumption at U.S. distribution centers.*

## OFFICE SUPPLIES (CONT'D)

### Scotch® C38 Tape Dispenser Scotch®

#3MC38-BK

- Full foam-cushioned, weighted base makes for easy 1-hand operation
  - Made with 100% total recycled content
  - Tape sold separately
- Black  
(902-1231) ..... ea **5.49**

### Green Recycled Paper Clips Office Depot®

Contain a minimum of 50% postconsumer recycled content.

American Dental Association

abscessus was isolated from all water samples.

Best practices of infection prevention and control provide safety in the clinical environment and treatment protocols for patients and dental professionals. Exposure to poor water quality can pose a health risk for people and conflicts with universally accepted infection prevention protocols.

Recently, news broke reporting at least 50 children being hospitalized due to chronic infections after receiving treatment at an Anaheim, CA pediatric dental clinic. Following an investigation by the California state department of health, confirmation of the cause has been related to contaminated dental unit water with *Mycobacterium*. Dr. Eric Handler, the CA county's health officer, said in a statement "I'm requiring a complete replacement of the on-site water system so that we will remove the potential threat of infection." These outbreaks were caused by contaminated water used during pulpotomies, which introduced *Mycobacterium* into the chamber of the tooth during irrigation and drilling. *Mycobacterium* can cause severe infection among immunocompetent children, and because *Mycobacterium* is ubiquitous in the environment, it poses a contamination risk.

Similar to the issues identified in Southern California, 20 children were hospitalized after complications from receiving pulpotomies at a GA pediatric dental clinic earlier this year. The Georgia Department of Public Health stated "the source of infection has been determined to be contaminated water in dental units." According to the CDC MMWR, all water samples from the seven dental stations had bacterial counts above the recommended  $\leq 500$  colony-forming units (CFU)/mL (average = 91,333 CFU/mL); *M.*

Dental unit waterline contamination was first reported in 1963.<sup>1</sup> Research has shown microbial counts can reach  $>200,000$  CFU/mL within 5 days after installation of new dental unit water-lines<sup>2</sup> and contamination levels of up to 1 million CFU/mL of dental unit water have been documented.<sup>3,4</sup> In 2011, the fatal case of an 82-year-old otherwise healthy woman who developed Legionnaire's disease after a dental visit<sup>6</sup> was reported.

The goal of effective dental waterline treatment is to reduce the number of opportunistic microorganisms present in the water, thereby helping to break the chain of infection. Based on standards for potable drinking water by the Environmental Protection Agency, the American Public Health Association, the American Water Works Association, and the Centers for Disease Control and Prevention guide-lines (2003) state the number of bacteria in water used as a coolant/irrigant for nonsurgical dental procedures should be less than 500 CFU/mL.<sup>5</sup>

Water flowing through long and narrow dental unit waterlines (DUWL's) can harbor dangerous bacteria. When untreated, or improperly maintained, these contaminated DUWL's can potentially harm your patients, your staff and your practice's reputation.

*"Investigations studying the microbial colonization and composition of dental unit waterlines have demonstrated that the narrow hollow bore design of the tubing promotes water stagnation and bacterial accumulation."* Source: 2015 Dental Advisor: John A. Molinari, Ph.D. and Peri Nelson, B.S., *"The Need for Compliance in Waterline Maintenance"*

Chemical agents commercially available are designed to inactivate or remove biofilms or deter attachment of biofilm in new or cleaned systems.

The following options are available to address the biofilm with its resident microorganisms and optimize dental unit water quality:

- Self-contained water systems
- Chemical treatment protocols
- Slow-release cartridge devices
- Point-of-use filters
- Municipal water treatment systems

One innovative waterline disinfection cartridge system, available for municipal or bottled water, offers a continual slow release of elemental iodine. The DentaPure® cartridge is an effective multi-award winning, EPA registered microbiological dental unit water purifier that provides safe dental unit water for 365 days, or 240L of water if usage records are kept following installation - making compliance effortless. The DentaPure cartridge contains iodinated resin beads. As water flows through the cartridge it pulls elemental iodine from the resin into the water stream. From there the iodine efficiently controls any bacteria in the water. With no protein attached to the iodine, it poses no risk for allergies and any "unused" iodine evaporates into the air. Unlike hazardous heavy metal based cartridges, the used iodine cartridge can be simply disposed of in your regular trash. This simple system is EPA registered to provide water  $\leq 200$  CFU/mL ensuring that your practice meets or exceeds water quality standards.

## Aspen™ 50 Recycled Multipurpose Paper

### Boise®

- Weight: 20 Lb.
- Brightness: US 92
- Ideal use: Everyday copying and printing

## OFFICE SUPPLIES (CONT'D)

### 100% Recycled Low-Odor Dry-Erase Markers

#### Office Depot®

- Chisel point enables different line widths
- Wipes easily off of whiteboards, glass, and other nonporous writing surfaces
- Low-odor and certified AP nontoxic
- Barrel contains 100% recycled plastic with 50% postconsumer recycled content

Assorted Ink Colors

(906-2903) ..... 4 per Pack **4.79**

Black Ink

(905-8652) ..... 12 per Pack **14.49**

### Plastic Chisel Tip Highlighters

#### Office Depot®

- Durable chisel tip marks in a variety of line widths
- Large barrel provides a long-lasting ink supply
- Quick-drying formula resists smearing
- Certified AP nontoxic
- Barrel contains 100% total recycled plastic with 30% postconsumer recycled content

Assorted Ink Colors

(905-8654) ..... 12 per Pack **6.49**

Yellow Ink

(905-8653) ..... 12 per Pack **6.49**

### Pentel® R.S.V.P.® RT 59% Recycled Retractable Ballpoint Pens

#### Pentel®

- Medium point, 1.0mm
- Ergonomic barrel design with non-latex Comfort Zone™ grip
- Retractable tip protects pockets and purses
- Contains 59% total recycled content (excluding consumable content and refills)

Assorted Ink Colors

(905-8509) ..... 8 per Pack **9.99**

Black Ink

(905-8551) ..... 12 per Pack **14.79**

Blue Ink

(905-8552) ..... 12 per Pack **15.69**

### 100% Recycled Permanent Markers

#### Office Depot®

- Fine tip offers precise writing on most surfaces
- Permanent ink is water resistant and resists fading
- Dries quickly to help minimize smudging
- Convenient pocket clip
- Certified AP nontoxic
- Contains 100% total recycled content with 30% postconsumer recycled content

Assorted Ink Colors

(906-3517) ..... 5 per Pack **4.99**

Black Ink

(906-2386) ..... 12 per Pack **7.79**

### 100% Recycled Pen-Style Highlighters

#### Office Depot®

- Narrow chisel tip allows precise highlighting
- Odorless, nontoxic, bright fluorescent ink
- Pocket clip for convenience
- Contains 100% total recycled content with 30% postconsumer recycled content

Assorted Ink Colors

(906-3515) ..... 12 per Pack **6.99**

Yellow Ink

(906-3516) ..... 12 per Pack **6.99**

### Ecolutions Round Stic Ball Pens

#### BIC®

- Medium point, 1.0mm
- Round barrel is comfortable, flexible, and translucent
- Contains 74% postconsumer recycled content

Black Ink

(906-3510) ..... 50 per Pack **7.39**

Blue Ink

(906-3513) ..... 50 per Pack **7.39**

Red Ink

(906-3514) ..... 50 per Pack **7.39**

Henry Schein  
going green

## 3. HEATING AND AIR-CONDITIONING IMPROVEMENTS

- Over the past decade, the heating and air-conditioning technology at our operations has been upgraded to modern efficiency standards.

- Our Henry Schein Dental Sales and Service Centers use solar film on facilities' windows to control temperature and energy leakage.

- Melville East, one of the buildings at our headquarters, replaced outdated and inefficient fuel oil boilers with two new condensing style dual-fuel boilers for improved equipment efficiency.

- Melville West, a second building at our headquarters, added a "cool roof" membrane made of a single-ply, tri-polymer alloy with reflective characteristics, thereby reducing our reliance on air conditioning to control temperatures.

## 4. GREENHOUSE GAS EMISSION REDUCTION

- Henry Schein partners with transportation operations that participate in the EPA's "SmartWay" program, a public-private collaboration that helps us transport our goods in the cleanest, most efficient way possible in order to protect the environment and enhance the United States' energy security.

## 5. LEADERSHIP IN GREENER PURCHASING AWARD

- Henry Schein received a "Leadership in Greener Purchasing Award" from Office Depot.

- The award gave special recognition to Henry Schein for its leadership in purchasing of LEED-related products.

- Henry Schein was one of 28 award winners out of 17,000 Office Depot customers evaluated and recognized for its efforts.

Now available in caramel flavor  
and easy application packaging.

## Nupro® White Varnish

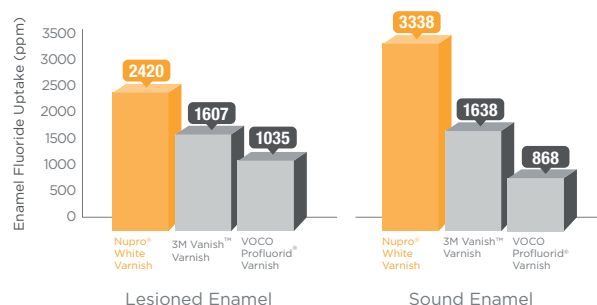

### A sweet new take on rapid fluoride release.<sup>2</sup>

- Uniquely formulated for hypersensitivity relief
- 2 hour wear time, so patients can quickly resume eating and drinking
- Releases more than 7 times the amount of fluoride than Vanish™ 5% Sodium Fluoride Varnish over a 2-hour period<sup>1</sup>
- Designed to be applied to wet tooth surface and formulated for no dripping or stringing to reduce potential mess
- White varnish is easy to see during application and sets to a clear finish
- Gluten, SLS, and dye free
- Now available in caramel, grape, raspberry, bubble gum, and mint flavors

Available in 2 packaging options for easy handling and clinician convenience

To request free samples or for more information, call 1.800.989.8826, email [nuposamples@dentsply.com](mailto:nuposamples@dentsply.com), or visit [nuprovarnish.com](http://nuprovarnish.com).

Nupro® White Varnish fluoride uptake vs 3M Vanish™ Varnish and VOCO Profluorid® Varnish\*

\*In an enamel fluoride uptake study, varnish was applied to sound, polished enamel specimens. These specimens were each paired with a specimen that had an artificial incipient lesion formed, and the lesioned enamel was not treated with varnish. The paired specimens were immersed into artificial saliva for 5 minutes, after which they were placed in fresh artificial saliva; this procedure was repeated at 15 minutes, 30 minutes, 1 hour, and 4 hours, and the specimens remained in artificial saliva for a total of 24 hours. After 24 hours, remaining surface varnish was removed. One layer of enamel was removed from each specimen and fluoride content was measured. Nupro® White Varnish had significantly more fluoride uptake into both sound and lesioned enamel than VOCO Profluorid® Varnish and 3M Vanish™ Varnish.

## 21st Century Local Anesthesia - The Wand STA, A Computer-Controlled Local Anesthesia System

Milestone Scientific Inc., Wand Dental, Inc. manufacturers of the original Wand®, have introduced the Wand STA™ System as an alternative to the 165 year-old technology of the traditional dental syringe . The Wand STA is a computer-controlled local anesthetic delivery instrument designed to improve the injection process for both the dentist and patient. The Wand STA produces a precise, consistent flow of anesthetic below the patient's pain threshold.

The Wand STA incorporates a plastic, light-weight, ergonomically-designed handpiece that offers the dentist unprecedented control of a bonded needle attached to the handpiece. The handpieces are available in three sizes of needles, which will allow all traditional and newly discovered innovative injections. A dentist can even shorten the plastic handpiece, making it invisible to patients who are fearful regarding the injection process.

The Wand STA allows dentists to administer Intraligamentary Injections with confidence and comfort as the it's unique feature, Dynamic Pressure Sensing (DPS), delivers audio and visual feedback during the injection – enabling dentists to administer a more comfortable, more precise injection for their patient. DPS confirms proper needle placement and monitors the delivery of anesthesia below the patient's pain threshold. Dentists and their patients love the Wand STA because there is no collateral numbness of the lip, face, or tongue after the procedure. The ability to anesthetize a single tooth is a tremendous enhancement to any dental practice. For example, patients who have to return to work can do so without having their lip and tongue numb. It's something they'll appreciate and remember!

Some dentists and patients get anxious during palatal injections, which can be difficult to administer and can be painful to the patient. With the Wand STA, you can offer innovative, comfortable palatal injections, such as the AMSA and P-ASA, using a pre-puncture technique – followed by delivery of a controlled flow of anesthetic below the patient's pain threshold. These successful palatal injections anesthetize multiple teeth and related gingival tissues without producing collateral numbness to the patient's lip or face. These are great injections for Cosmetic Dentistry allowing immediate assessment of the patient's smile line.

STA stands for single tooth anesthesia, but dentists shouldn't limit their use of the Wand STA. You can use it to deliver every type of injection. If you've been missing your mandibular block injections, the Wand STA can be the solution to achieving more success. Since a bi-rotational insertion technique can be utilized with the Wand Handpiece, the Wand STA needle doesn't deflect the way a traditional dental syringe needle does. Without needle deflection, the needle will arrive closer to the injection site, which produces a faster onset and a more accurate and successful block injection.

The Wand STA has many other features, such as Cruise Control and Multi-Cartridge. It's the best way to give an injection. Try it; you and your patients will love it.
