Applying a Promo Code

- Promotional pricing can be seen by applying promo codes from sales flyers, postcards, faxes, banner ads and e-blasts.
- Promo codes from banner ads and e-blasts are automatically applied.
- There are two ways to add Promo Codes on the My Order page:
  1. Add the promo code to the end of your item code before clicking Checkout
  2. Enter all item codes to your cart, and then enter your promo code into the Promotion Code field and click Apply.

Applying Additional Promo Codes

- Promo codes are often automatically applied to an entire order. To change promo codes for specific promo codes in your order:
  1. Click Apply the promo code on the line level next to the item number
  2. This will become a text field—type in the appropriate promo code and click Apply.
