OUTFIT YOUR PRACTICE.

LEVELS OF COSMETIC MEDICAL CARE

1 NONINVASIVE

2 MINIMALLY INVASIVE

3 MODERATELY INVASIVE

4 SURGICAL

AESTHETICS
The **American Society of Plastic Surgery** has identified 4 Levels of Cosmetic Medical Care performed in thousands of medical practices and medspas in the United States. The key therapies and procedures for each level include:

**Level 1: Noninvasive cosmetic procedures**—or spa treatments—are therapeutic and relaxing, designed primarily to reduce blemishes and revitalize and protect the skin.

Common Treatments include:

- Facials
- Body Wraps
- Cellulite Treatment
- Massages
- Hydro Therapy

**Level 2: Minimally invasive treatments** even out our skin tone, increase cell turnover, promote cell growth, remove unsightly veins or abnormal hair growth, and stimulate collagen production to help the skin retain its softness and reduce the appearance of lines and wrinkles.

Common procedures include:

- Intense Pulsed Light, or IPL®
- Light skin peels
- Hair removal
- Microdermabrasion
- Spider vein treatment
- Treatment of leg veins

**Level 3: Moderately invasive procedures**, while nonsurgical, are neither risk-free nor a substitute for plastic surgery.

Common procedures include:

- Injection therapy with Botox®, soft tissue fillers
- Deep chemical peels
- Laser skin resurfacing
- Nonsurgical skin tightening

**Level 4: Surgical or invasive procedures** reposition our tissue and restore lost volume to rejuvenate our faces. Body contouring can reduce fat deposits, lift sagging skin, and shape our arms, hips, and thighs.

The most common surgical procedures can be grouped in 3 categories:

1. Face (surgical repositioning and volume restoration)
   - Facial rejuvenation—eyelid surgery, forehead lift, facelift, and neck lift
   - Facial implants
   - Ear surgery
2. Breast — breast lifts, augmentations, and reductions
3. Body Contouring — liposuction, tummy tucks, and arm, thigh, and body lifts

110-5429 Dukal® Take-Home Kit
Perfect for home care after small incisions! The take-home wound care kit gives your patients the necessary products to care for Mohs procedures, small incisions, biopsies, removals and a number of other small–skin procedures. The back has a section to place a standard Avery® address label with care instructions and your practice information for a personal touch!

Sterile Take–Home Wound Care Kits, 50 Kits/Box
Each kit contains:
- 5 Antibiotic Ointments
- 6 Alcohol Prep Pads
- 5 Non-woven Gauze Sponges
- 5 Fabric Adhesive Strips
- 5 Fabric Spot Bandages

Violet Skincare,™ Inc. has developed this protocol in steps, it is not measured in weeks. Maintenance and aftercare are the keys to any procedure. Healing time depends on the individual. Aftercare cannot be rushed. Let your patient’s skin be your guide. All procedures yield best results when used along with these aftercare programs.
