Exclusive Benefits for You and Your Practice

Best-in-Class Medical, Surgical & Pharmaceutical Purchasing Program

With the AMA's exclusive Medical Supply Program, Members have access to a comprehensive, high-quality, high-value portfolio of medical disposable, pharmaceutical, diagnostic, and equipment products.

Access to Henry Schein's Practice Solutions

Access an unrivaled portfolio of solutions designed to help your practice improve patient care and operational efficiency. Programs include free Rx Samples Service, DxRx Solutions, Privileges Rewards, and much more.

Enhance CPT Network

Obtain the most recent and accurate coding advice, including accessing knowledge database of over 5000 commonly asked coding questions, ability to search CPT codes/relative value by geographic location, and receive six free coding inquiries (\$480 value).

Personal Assistance from the AMA Practice Management Center

- Fair contract
- Accurate payment
- Practice efficiency
- Managing data and profile
- Establishing and updating fee schedules

National Managed Care Database

Learn how to analyze and negotiate contracts with insurers and ensure that managed care organizations comply with state law and regulations that protect your practice against unfair business practices.

Committed to the Health of Your Practice...

Trusted Advisor

Our knowledgeable Sales Consultants offer you the utmost attention and are specially trained to help identify ways to enhance your practice.

Price Integrity

We are highly competitive with our pricing. We strive to maintain prices, develop purchasing plans, and deliver the best value for your practice.

Guaranteed Fast Delivery

Orders received by 5pm local time are shipped the same day. Your products arrive within 24–48 hours in most areas.

Vaccine, Pharmaceutical & Diagnostic Solutions

We have relationships with major manufacturers and can supply every adult and pediatric vaccine recommended by the ACIP.

In addition, we can provide all of your flu vaccine needs with our Worry-Free Guarantee Flu Program!

Our pharmaceutical and diagnostic solutions include brand names as well as a complete line of generics and Henry Schein Brand options for added value.

Practice Solutions

We provide a complete array of services, from technology solutions to practice marketing, that are designed to help you achieve your practice goals.

We do  that!™

Co-pay or no co-pay? That is the confusing question

New rules about when to collect confound practices and patients alike. But there are ways to get paid when a practice is supposed to.

By EMILY BERRY, *American Medical News.*

Preventive care—a long list of services including mammograms, childhood vaccines and tobacco cessation counseling—for patients covered by private insurance is, in most cases, supposed to be covered without co-pays or coinsurance, thanks to the Patient Protection and Affordable Care Act.

The new rules apply to policies that took effect after Sept. 23, 2010. But some physicians and their patients find that, rather than smoothing out the preventive care process, the new regulations only worsen the confusion about whether a co-pay or coinsurance is due. Often, neither the patient nor anyone in the office knows the new rules.

Stephen Meyers, MD, is a family physician with Eagle Physicians, a large multisite, multispecialty group in Oak Ridge, N.C. He also writes a blog and maintains a Twitter stream and Facebook page as MedSavingsDoc, offering tips on how to save on health care.

The opportunity to provide preventive care with no out-of-pocket contribution might seem like a boon to his practice and a major topic for him online, but that hasn't been the case.

He makes it a habit to ask the 100 patients he sees each week why they're seeing him. "Usually it's something like, 'My wife sent me,'" he said. Thus far, not a single one has mentioned receiving preventive care without having to pay anything out of pocket.

"It amazes me," Dr. Meyers said. "It's like nothing occurred."

He said he felt his practice didn't get much outside help with figuring out the new rules. And his feeling isn't the only sign that the rules aren't catching on the way they were meant to.

Experts say physician practices will have to spend time contacting payers to figure out circumstances in which co-pays are due, and in some cases refunding money they have collected in error.

But, they say, taking the time to collect a co-pay at the right time could pay off. Patients will come for preventive care visits, and staff can be clear about when to collect that \$20 or \$30 co-pay, saving time and money having to chase it down.

PREVENTIVE CARE FINE PRINT

Physicians, health plans and consumer advocates hailed the new rules as a way to promote prevention and cut down on chronic illness. But so far, the reality has been mixed at best, as few patients seem to be either aware of the benefit or able to take advantage of it. Physicians also are confused about when to collect a co-pay, leaving some practices with refunds due to patients and others short on cash they could have collected rightfully.

"Some physicians don't even know the change occurred," said Cheryl Gregg Fahrenholz, a practice management consultant whose company, Preferred Healthcare Solutions, is based in Bellbrook, Ohio. She said physicians traditionally rely on their staffs to know when to collect co-pays—but they're not sure, either. Part of the problem is that the rules allow for exceptions. Insurers may charge a co-pay for a preventive visit under a few circumstances:

- When the patient is enrolled in a "grandfathered" plan not subject to the health system reform law's mandates. A grandfathered plan is one that has made no changes to its benefits and thus is not subject to regulation under the health reform law.
- If the physician is out-of-network for the patient's plan.
- If services for another problem are provided during the same visit. This last exception has proven the most problematic, as the AMA predicted in a Sept. 17, 2010, letter to federal officials offering comments on the new regulations.

In its letter, the AMA warned federal officials that the rules as written might not take into account the "practical realities of how patients typically obtain preventive services."

The AMA advocated for the government to amend the rules so that a co-pay would never be required if the visit included a covered preventive care service, because most patients come to see their physician expecting to address both preventive care and acute problems during the same visit.

PREVENTIVE CARE IDEAL MEETS REALITY

The dilemma, as the AMA letter stated, is "if a physician performs a preventive medicine examination and a problem is identified, the physician must either handle the problem without compensation or require the patient to schedule another appointment to address the identified problem."

Instead, the AMA letter continued, insurers should absorb the difference. Health plans "must be required to assume the financial obligations of the cost-sharing requirements for preventive services which were previously the responsibility of the patient, rather than shift those responsibilities to physicians." Insurers should be prohibited from bundling those acute services into other preventive services.

Dr. Meyers said that even before the new rules, private payer policy made this very common. It presents an awkward choice for the physician: Ask the patient to return for another visit, or forgo compensation for care.

"It sometimes is a very delicate conversation," Dr. Meyers said. "It doesn't make sense to patients for you to say, 'You're here for this preventive visit, and I understand you have this problem, but I can't render that today. Either you'll be charged a co-pay you didn't expect, or I won't get paid.' Patients are not very sympathetic to that."

The AMA noted that insurers already commonly fail to recognize CPT modifier -25, which is used when a physician discovers and treats a problem during a visit for preventive care, or a different condition.

The AMA proposed amending the rules so that insurers must follow CPT coding conventions and recognize modifiers where they indicate that both preventive services and a specific separate problem were addressed during a single visit.

For now, however, the rules stand as they were laid out in the July 19, 2010 notice.

KNOWING WHEN TO COLLECT

Fahrenheit suggested a relatively low-tech solution to the dilemma of when to ask for a patient's out-of-pocket share: Use a spreadsheet.

She advised looking at the list of preventive services that are supposed to be covered under the new rule, pulling the ones most common for the practice – covered vaccinations for a pediatric practice, for example – and posting a list of those services at the reception desk where patients check in and out.

Those practices using an integrated electronic medical record and practice management system might be able to program in a prompt that will ask the person entering the patient's information a series of questions, then determine if a co-pay is due.

Either way, she said, both clinical and front-desk staff need to know the rules so they can determine when a problem treated during a preventive visit means that a patient who didn't originally owe a co-pay now owes one.

Susan Gliatis, practice management consultant for Central Ohio Practice Management in Columbus, Ohio, said sometimes there will be no way to avoid making a phone call to a patient's plan for clarification about what is covered.

That will be needed if the plan has not alerted physicians and patients as to what preventive care does not require a co-pay.

Practice management experts stress that it is important to refund even a \$10 co-pay if it's collected in error. It's acceptable to credit an account, but only for a patient seen on a regular basis who gives the practice permission to apply the co-pay amount to a balance or to his or her next visit.

In general, a practice has 30 days to refund money collected in error, Fahrenheit said.

WHAT TO TELL PATIENTS

Cindy Dunn, RN, a principal with the Medical Group Management Association's Health Care Consulting Group, recommended keeping patients informed in whatever way is practical, including posting details about the covered services on the practice's website.

Practices should educate patients so they understand the new rules, she said. "There is going to be confusion, and I'm sure there will be refunds made."

She acknowledged that it can be awkward to tell a patient that preventive care will be covered without a co-pay but that if a problem pops up, they could be on the hook for \$20 or \$30. But that's exactly what she recommended. "Tell them, 'Hey, this is a preventive visit, so we can do a physical, but we can't address acute problems.'"

Fahrenheit said it's not necessary to "reinvent the wheel" when trying to get patients the correct information about the new rules. She advised visiting the Medicare or CMS websites for fact sheets that outline when preventive care should be available without any out-of-pocket expense.

Every practice should have a financial policy, and that can be amended to reflect the changes and alert patients to when they can expect to write a check and what will happen if they are owed a refund.

Gliatis said educating patients about preventive care coverage is a way to take advantage of a positive element of health system reform.

"They don't realize – this is trying to make you healthier," she said. "I would advise people, 'Understand what your policy covers. Every year, make a list of what's covered, or call up your insurance company and ask because it does change. Make yourself aware as a consumer.'"

Gliatis and Fahrenheit said the best possible physician response to the new rules is to use them to get patients in for preventive care. Fahrenheit recommended sending postcards to patients informing them of the change in the law (along with important exceptions), and inviting them to make an appointment for recommended preventive care.

Without some type of notification, patients do not know what their coverage is, and that risks lost revenue for the practice, she said.

Our most important ingredient is integrity.

Dedicated to helping your business thrive with our heritage of quality, reliable manufacturing, and customer-focused flexibility—so essential injectable medicines can reach the patients who need them, making the world a healthier place.

Denavir® (penciclovir cream, 1%) is indicated for the treatment of recurrent herpes labialis (cold sores) in adults and children 12 years of age and older.

*In *in vitro* studies.

**The systemic absorption of penciclovir following topical administration has not been evaluated in patients less than 18 years of age.¹

Please see Important Safety Information on back.

Denavir®
(penciclovir cream, 1%)

Denavir® (penciclovir cream, 1%) is indicated for the treatment of recurrent herpes labialis (cold sores) in adults and children 12 years of age and older.

IMPORTANT SAFETY INFORMATION

Denavir should only be used on herpes labialis on the lips or face. Application to mucous membranes is not recommended. *Denavir* should not be used in patients with known hypersensitivity to the product or any of its ingredients.

There are no adequate and well-controlled *Denavir* studies in pregnant women; therefore, *Denavir* should be used during pregnancy only if clearly needed. There is no information on whether *Denavir* is excreted in human milk after topical administration; a decision whether to discontinue *Denavir* should take into account the importance of the drug to the mother. The effect of *Denavir* has not been established in immunocompromised patients. *Denavir* does not cure cold sores.

In clinical studies, the most common adverse reaction with *Denavir* was headache, which occurred in 5.3% of patients who received *Denavir* and 5.8% of patients who received placebo. Other adverse reactions with *Denavir* occurred in less than 2% of patients and included application site reaction, decreased sensitivity to touch/local anesthesia, taste perversion, and rash.

Other reported adverse reactions have included swelling of the mouth or throat, pain, alterations in sense of smell, abnormal touch sensation, itching, skin discoloration, and hives.

***Denavir* is available by prescription only. Please see the Full Prescribing information.**

You are encouraged to report negative side effects of prescription drugs to the FDA. visit www.fda.gov/medwatch, or call 1-800-FDA-1088.

¹Subject to eligibility restrictions and limitations. This offer is not valid for prescriptions reimbursed in whole or in part by Medicaid, Medicare, or any other federal or state program (including any prescription drug programs). This offer is not valid in Massachusetts except for cash-paying patients, or where otherwise prohibited by law.

Reimbursement for Oral Exam and Fluoride Varnish Treatment in the Physician Office

Early childhood caries (ECC) or tooth decay is the single most prevalent chronic disease among young children. In fact, it is 5 times more common than asthma. 18% of children between 2 and 4, and 52% of children between 6 and 8 have tooth decay. ¹One reason is that, by age 2, children have seen a Primary Care Physician an average of 7 times for well child visits, but few have had well child dental visits.

Medical Guidelines

The American Academy of Pediatrics (AAP) recommends that pediatricians perform for all children an oral health risk assessment and establish a dental home by the age of 12 months. ²While AAP does not have a policy on fluoride varnish treatment, it notes that some child health professionals are administering fluoride varnish treatments. In addition, 35 states are reimbursing physicians for oral exams and fluoride varnish treatments through Medicaid.

Fluoride Varnish Treatment³

The procedure is relatively simple and takes a few minutes. Use 2 x 2 gauze to dry the child's teeth. Then apply the fluoride varnish to all tooth surfaces. Finally, provide post-treatment care instructions to parents. See manufacturers indications for use. For complete details, please see manufacturer's physician's directions.

Reimbursement for Oral Health Risk Assessment and Fluoride Varnish Treatment

Currently, Medicaid reimburses physicians for performing oral health assessment and/or fluoride varnish applications in approximately 35 states. Medicaid reimbursements for oral exams and/or fluoride varnish application range from \$9 to \$86.54.⁴ The procedure code for the fluoride varnish application is D-1203, D-1206, and D-0120; D-0145 for the oral exam.

To determine if your state qualifies and for reimbursement guidelines, please visit the following Web site:
<http://www.aap.org/oralhealth/pdf/OH-Reimbursement-Chart.pdf>

Getting started: Accepting EFT payments in the physician practice

The Patient Protection and Affordable Care Act requires the establishment of an electronic funds transfer (EFT) standard by July 1, 2012, which health insurers will be required to adopt and implement by Jan. 1, 2014.

Getting started: Accepting EFT payments in the physician practice The Patient Protection and Affordable Care Act requires the establishment of an electronic funds transfer (EFT) standard by July 1, 2012, which health insurers will be required to adopt and implement by Jan. 1, 2014.

Electronic funds transfers: HHS is required to adopt a final rule by Jan. 1, 2012, that would establish a standard for EFT. For physician practices, standardized EFT would greatly improve the claims payment process (Sec. 1104).

Operating rules for EFT and payment and remittance advice: HHS [the Department of Health and Human Services] is required to adopt, by July 1, 2012, a set of operating rules for electronic funds transfers (EFT) and the HIPAA transactions standards healthcare payment and remittance advice (allowing for automated reconciliation of the electronic payment with the remittance advice) (Sec. 1104).

EFT allows transfer of money between parties electronically. While payment by paper checks can be time-consuming and experience postal delays, EFT can be an efficient means of payment for physician practices. EFT can save your practice time by reducing manual administrative tasks, such as copying paper checks and traveling to the bank and waiting in line to make deposits.

Physician practices are now able to request that their claim payments are transferred through EFT to a bank account of their designation. Your practice should consider using EFT to further automate your claims management revenue cycle. Similarly, the health insurers you contract with might encourage you to both submit claims and receive payments electronically because these automated processes can result in significant administrative cost savings.

Steps for implementing EFT

The following are recommended steps for implementing EFT in your practice's claims management revenue cycle. Carefully reviewing these steps before you accept EFT payments in your practice can help you realize EFT efficiencies and avoid potential administrative headaches in the future.

Step 1: Determine which of the health insurers with which you contract offer EFT payments. If a current health insurer contract does not contain a provision authorizing EFT, you might have received an EFT authorization form from the health insurer in a separate mailing, or you might receive one after the contract is executed. You can also search the health insurer's Web site for EFT authorization forms or contact your health insurer representative. You might also consider accepting electronic remittance advice (ERA) as well.

Your practice should also review future or renewal contracts with health insurers for the addition of EFT provisions. If they do not offer EFT, you should ask why and when they plan to become compliant with any federal or state regulations.

Additional EFT resources

Consult the resource *"Questions to ask a health insurer before signing an EFT agreement"* for a checklist of questions to help you evaluate whether you should sign an EFT agreement with a health insurer.

Step 2: Determine how your practice will process EFT and ERA transactions. When a physician practice accepts EFT payments, the health insurer sends an explanation of benefits (EOB) or ERA to the physician practice via a HIPAA-compliant 835 electronic standard transaction or a paper EOB.

If your practice is unable to receive a HIPAA-compliant 835 payment/remittance advice, you should ask the health insurer whether there are alternative ways to access, download or view the remittance advice via the health insurer's Web site. We encourage you to determine how you will be able to access this information and incorporate it into your practice's work flow before signing an EFT agreement with a health insurer.

Additional EFT resources

Consult the resource *"Considerations for processing EFT transactions in the physician practice"* to determine your practice's situation and how to best ensure that you are able to process EFT transactions.

Consult the resource *"Questions to ask a billing service before signing an EFT agreement"* and *"Questions to ask a clearinghouse before signing an EFT agreement"* to ensure that you are able to process EFT transactions if your practice uses either one or both of these kinds of vendors.

Step 3: Carefully review each health insurer's EFT agreement.

Review these agreements closely, especially to make sure that the health insurer or a third-party administrator is not allowed to take advantage by debiting or off-setting payment transactions without notice and your consent. Also be sure to evaluate the agreement's termination notice requirements prior to signing the EFT agreement.

Additional EFT resources

Consult the resource *"Questions to ask a health insurer before signing an EFT agreement"* for a checklist of questions—including questions about debits and prompt payment—to help you evaluate whether you should sign an EFT agreement with a health insurer.

Step 4: Determine your preferred EFT format. You can explore your options with your bank. The most common EFT format for health care is the National Automated Clearing House Association's (NACHA) standard CCD+. Be sure to confirm with both the health insurer and the bank that they are using the CCD+ format.

Caution: EFT agreements your practice enters into with health insurers will supersede the protections your bank has put in place. You should pay close attention to the enrollment provision related to the health insurer's ability to debit your account. When in doubt, share your EFT agreement with your bank to determine whether your account protections will be waived as a result of the agreement.

Additional EFT resources

Consult NACHA's Web site under "Healthcare Industry" for additional details about EFT formats in NACHA's "ACH Primer for Healthcare Payments: A Guide to Understanding EFT Payment Processing."

Consult the resource "Questions to ask a bank before signing an EFT agreement" for additional information about issues you should discuss with your bank before signing an EFT agreement.

Step 5: Request information from the health insurer regarding the EFT format they use. The health insurer's EFT format should be compatible with your bank. The most common EFT format for health care is the NACHA's standard CCD+. We encourage you to contact each health insurer for its preferred enrollment process.

Step 6: Submit enrollment forms. The health insurer will provide guidance and an EFT and/or ERA enrollment form. You are encouraged to contact each health insurer for its preferred enrollment process because they may vary. If you are contracted with a billing service or collection service, be sure to contact them first to determine how best to submit the required forms and documentation to the health insurer.

Terminating an EFT agreement or opting out

Before signing an EFT agreement, you should understand the EFT agreement's termination notice requirements. Health insurers' termination notice requirements and procedures may vary.

Some health insurers automatically consider contracted physicians as participants in the EFT program unless the physician opts out. Health insurers' opt-out processes may vary. For instance, one health insurer requires physicians to submit a letter by a given deadline. The letter must state that you do not wish to participate in the EFT program and your reason for not participating.

If the health insurer has not offered a clear opt-out procedure (and participation in an EFT program is not required in the health insurer's network agreement), you should notify the health insurer in writing immediately if you do not wish to participate in the EFT program.

Questions or concerns about practice management issues?

AMA members and their practice staff may e-mail the AMA Practice Management Center at practicemanagementcenter@ama-assn.org for assistance.

For additional information and resources, there are three easy ways to contact the AMA Practice Management Center:

- Call (800) 621-8335 and ask for the AMA Practice Management Center.
- Fax information to (312) 464-5541. Fax information to (312) 464-5541. To help us address your issue with an insurer, the AMA Practice Management Center may ask you to provide supporting documentation. If these materials contain protected health information (PHI)—defined as individually identifiable health information—please transmit the PHI to the AMA Practice Management Center through our secure FAX number: (312) 464-5468. By sharing PHI with the AMA, you agree to accept our business associate agreement.
- The AMA offers a library of resources like this one to help you make the most of key electronic standard transactions that can save your practice time, money and administrative hassles. Visit [HYPERLINK http://www.ama-assn.org/go/healthatclaim](http://www.ama-assn.org/go/healthatclaim) www.ama-assn.org/go/healthatclaim to access these resources today.

Visit www.ama-assn.org/go/pmalerts to sign up for free AMA Practice Management Alerts, which help you stay up to date on unfair payer practices, ways to counter these practices, and practice management resources and tools.

The Practice Management Center is a resource of the AMA Private Sector Advocacy unit.

THE WORRY-FREE GUARANTEE PROGRAM IS BACK

for the **2011–2012 Flu Season**
and is **BETTER than EVER!**

The Benefits...

- ✓ Guaranteed delivery as early as 09/30/2011
- ✓ Payment terms as late as January 2012
- ✓ Up to 5000 Bonus Privileges Points
- ✓ Complementary Flu Tool Kit
- ✓ Exclusive discounts on ancillary and companion items during the flu season
- ✓ Security – A program with a proven 100% on-time delivery and fill rate for the past 4 years!

GSK FluLaval® (18 years of age and older)	Sanofi Pasteur Fluzone® (6 months of age and older)
Novartis Fluvirin® (4 years of age and older)	Sanofi Pasteur Fluzone® High Dose (65 years of age and older)

We Will Beat Any Competitor's Offer on Flu Vaccine*

CALL YOUR SALES CONSULTANT TODAY FOR MORE INFORMATION!

Visit our Flu Resource Center for more information about Influenza – www.henryschein.com/flu

*Proof of valid offer may be required.

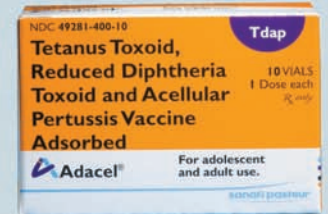

Despite high rates of reported pertussis in a recent decade, **vaccination rates remain low.**

{

The ACIP recommends Tdap vaccination for adults and adolescents, including healthcare providers

}

- Adults 19–64 years of age should receive a single dose of the Tdap booster, especially adults who have or anticipate close contact with infants <12 months of age
— When possible, women should receive Tdap before becoming pregnant
- Adolescents 11–18 years of age should receive the Tdap booster, with the preferred age of vaccination at the 11–12 year visit
- Health-care providers in hospitals or ambulatory-care settings who have direct patient contact should receive a single dose of Tdap
- Tdap is preferred to Td for tetanus prophylaxis in wound management Source: www.cdc.gov

Care with Confidence: It's easy with TIDI

Present a professional image, put patients at ease, and provide reliable infection control—all with disposable convenience. Specify single-use products from TIDI Products.

Leak-proof poly backing adds super strength for extra barrier protection and reduced cleanup time.

Convenient perforated tear-off feature keeps changes neat.

Exam Table Paper

The ultimate in strength *and* softness, these table paper options are ideal for any exam, including those that involve fluids.

- Leak-proof poly backing for super strength and fast, easy cleanup
- Crepe and embossed crepe options for extra softness and quiet comfort
- Optional perforations every 30 inches for neat, convenient changing

CODE	DESCRIPTION	COLOR	SIZE	CASE QTY.
895-3911	Embossed crepe, perforated	White	18" x 100'	12
895-6321	Embossed crepe, perforated	White	21" x 100'	12
895-1155	Crepe, perforated	White	18" x 125'	9
895-8433	Crepe, perforated	White	21" x 125'	9
101-2506	Crepe, non-perforated	White	18" x 125'	12
101-2219	Crepe, non-perforated	White	21" x 125'	12

Exam Gowns

Provide the ultimate in cloth-like strength and softness for comfort and coverage. Excellent for extended wear and longer procedures.

- Two-ply, scrim-reinforced tissue is strong, soft and warm
- Sewn shoulders and sewn or reinforced necklines add strength and assure modesty
- Nonwoven ties at the waist and neck, and full-cut designs in a range of sizes, offer a perfect fit for ample coverage and modesty

CODE	DESCRIPTION	COLOR	SIZE	CASE QTY.
859-5168	XL	Light blue	30" girth x 42" length	50
859-7465	2XL	Light blue	72" girth x 44" length	25

MEDICAL TIP

The trusted surface disinfectant with the 3-minute kill time on TB – now fragrance-free. Ideal for respiratory sensitive health care workers and patients.

Meet the Micro-Touches.

Just like your staff, no two are alike. One is sensitive.
One has allergies. One needs extra protection.
And you're the one that has to keep them all happy and productive.

So many **personalities**. Same family **values**.

Micro-Touch® NitraFree™

Provides an allergy solution for those with Type I allergies and helps with Type IV allergies. This pink exam glove is made of next generation nitrile material for greater comfort & fit.

Micro-Touch® Nitrile

Features an advanced stretch formulation providing ultimate comfort and fit. This product also offers eco-conscious packaging with more gloves to a box to reduce packaging waste.

Micro-Touch® Smooth Nitrile

Anti-slip, smooth finish provides excellent tactile sensitivity and protection to meet the daily needs of the healthcare professional.

Micro-Touch® Nitrile E.P.®

Offers a 12" extended cuff that provides extra protection over the wrist and arm for healthcare professionals in high-risk clinical settings.

Micro-Touch® Nitra-Tex® Sterile Singles + Pairs

A sterile nitrile offering with a 12" extended cuff for when a sterile examination glove is required or preferred.

COMPLIANCE

Are you struggling with patient compliance when it comes to colorectal cancer screening?

For more information, see Product List PAGE 31

InSure® FIT™ boosts compliance¹ with a patented water-based collection method and 2 samples on a single card.

- 87% sensitivity for colorectal cancer^{2,3}
- 98% specificity³
- 66% increase in patient compliance versus a guaiac-based fecal occult blood test (gFOBT) was found in one study¹
- No handling/smearing of dry, solid fecal material³
- No dietary or medicinal restrictions³
- CPT Code* 82274 & Medicare Code G0328

Please visit DiagnosisCAST.com and click on ColonCancerWRAP for information on new advances in colon cancer screening (CME credit available).

Contact your sales representative or go to Insuretest.com for information and to order InSure® FIT™.

InSure® FIT™
Fecal Immunochemical Test

Colorectal Cancer Screening
That's Easier to Live With

1. Cole SR, Young GP, Esterman A, Cadd A, Morcom J. A randomised trial of the impact of new faecal haemoglobin test technologies on population participation in screening for colorectal cancer. *J Med Screen* 2003;10:117-122. 2. Smith A, Young GP, Cole SR, Bampton P. Comparison of a brush-sampling faecal immunochemical test for hemoglobin with a sensitive guaiac-based faecal occult blood test in detection of colorectal neoplasia. *Cancer* 2006;107:2152-2159. The study was funded in part by Enterix Inc. (through Enterix Australia Pty Ltd.), the manufacturer of InSure® FIT™. Enterix is now owned by Quest Diagnostics Incorporated. However, neither Enterix nor Quest Diagnostics participated in the data analysis or influenced the conclusions reached by the authors. 3. InSure® FIT™ Fecal Immunochemical Test Immunoassay for human hemoglobin in stool. Product Instructions. Enterix Inc., Edison, NJ.

Manufactured by Enterix Inc., Edison, NJ 08837 USA, a Quest Diagnostics Company. For more information about InSure® FIT™, please visit www.insuretest.com. Integra™ Miltex®

A New CryoSurgery Solution

Integra Miltex CryoSolutions™ is an innovative yet simple device for delivery of high performance liquefied Nitrous Oxide which allows the clinician to pinpoint the treatment site for rapid freezing and efficacious destruction of unwanted tissue.

Features	Benefits
Lightweight and portable with pinpoint accuracy	Lesions are precisely targeted
Nitrous oxide will not evaporate from cartridge	Always ready to use
Glass tips	Fully autoclavable
Rapid freezing (-127°F) controlled dispensing temperature	Controlled dispensing temperature reduces treatment time and patient discomfort
A low \$1.50 cost per patient application	Compared to the higher cost of chemical agents
Complete 3 year guarantee	If anything goes wrong with your CryoSolutions unit, we will repair or replace at no charge
