

# Chairside Application Guide

## 4 Easy Steps:

### Dry

Lightly dry the tooth surface, with air or gauze

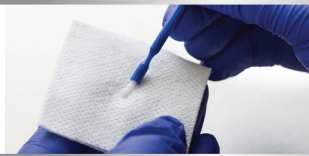

### Mix

Give the varnish a quick stir

### Apply

Paint a thin, even coating on the teeth

### Wipe

Wipe the brush on gauze before re-dipping (to keep the brush from getting too stiff)

### End Result

Dries to a natural enamel color

# Patient Directions after a PreviDent® Varnish Treatment

Immediately after the treatment, to achieve the maximum benefit, please follow these directions:

- For the next 6 hours, don't brush, floss or drink hot liquids.
- For the next 2 hours, eat only soft foods.

It's best to wait until tomorrow to return to your regular oral hygiene routine. If there is any of the varnish left on your teeth, brushing will take care of it. Your teeth will look and feel just like they did before treatment, but they will be protected by the fluoride varnish treatment.

**Dries to a natural enamel color!**

- Single-Use Design & Smooth Application
- Flavors Your Patients Will Love
- Contains Xylitol

## Colgate® PreviDent® Varnish (Rx Only) 5% Sodium Fluoride

Grape Bubble Gum 50 unit dose . . . . . (543-0148)

Raspberry 50 unit dose . . . . . (543-0121)

Mint 50 unit dose . . . . . (543-0120)

NEW Caramel Sundae 50 unit dose . . . . . (129-8852)

Mint 150 unit dose . . . . . (543-4811)

Raspberry 150 unit dose . . . . . (543-2267)

Important Safety Information: PreviDent® 5% Sodium Fluoride Varnish is a topical fluoride for the treatment of dentin and post operative sensitivity. The contraindications are ulcerative gingivitis and stomatitis. Edematous swellings and nausea have been reported only in rare instances in some fluoride varnish products, especially after application to extensive surfaces. Dyspnea, although extremely rare, has occurred in asthmatic children.
