Complete your dental restoration solution with the DWX-4W Wet Dental Mill.
CAM Software Included

Purchase of the DWX-4W includes MillBox Roland Edition by CIMsystem. This open-architecture CAM software accepts all STL file types and supports the milling of relevant materials and features a user-friendly interface and simple workflow that promotes a short learning curve. Its features include automatic nesting and placement options to help maximize efficiency and pre-defined milling procedures for direct software-to-mill functionality without interruption during tool path calculation. Milling procedures for direct software-to-mill functionality without interruption during tool path calculation.

CAM Software Partners:

In addition to MillBox Roland Edition by CIMsystem, open architecture software partners include the following:

- CAM Software Included
  - Peace-of-Mind, Reliability and Support

The DWX-4W offers unmatched reliability and post-sales support that includes Roland Care Premium with a two-year warranty. We also provide online video, educational support and certified service engineers to keep your machine running smoothly.

High-Performance Jaeger DentaDrive Spindle
The DWX-4W's high-performance 60,000 RPM Jaeger DentaDrive spindle supports precision milling. It's equipped to mill pin-type blocks, including glass ceramics and composite resin - acclaimed in the industry for their superior strength and aesthetics. Materials can be finished with a short finishing time, dramatically reducing labor and production time.

Multi-Axes Milling
4-axis simultaneous grinding enables the DWX-4W to accomplish difficult undercuts and produce highly detailed anatomy. The rigid ball screw-driven 4-axis control allows for smooth, high-precision machining. With its multi-pin clamp, it can mill up to three different pin-type materials continuously, enabling production of three different patient prosthetics in a single production run. It also features an Automatic Tool Changer (ATC) that auto-changes grinding burs without interrupting the production process.

User-Friendly Operation
Even novice users can quickly set up the DWX-4W and begin creating prosthetics the same day the machine arrives. Features to enhance user experience include:

- Simple one-button design.
- Color-coded LED status lights signal current job progress.
- Fully integrated pump and coolant system with water filtration for maintaining a clean and efficient workspace.
- The Virtual Machine Panel (VPanel) allows users to configure settings from their computer, send CAM data to the DWX-4W for production, and track milling progress.

Economical Open Architecture
Open architecture allows the DWX-4W to work with the latest materials and CAD/CAM software so you're never limited by older technology. If you already have a production solution, it works seamlessly with your existing scanner and compatible CAD/CAM software without the need to rely on a single source for materials.

Combine DWX Devices for a Complete Dental Solution
Pair the DWX-51D and DWX-4W for the most flexible and productive dry and wet milling solution. Using both dry and wet DWX devices gives you the technology and confidence to take on the maximum amount of glass ceramics and zirconia restorations. In contrast to dry and wet combo devices, a dedicated DWX dry and wet solution eliminates the switch back-and-forth through processes and the hours of cleaning in-between jobs.

Peace-of-Mind, Reliability and Support
The DWX-4W offers unmatched reliability and post-sales support that includes Roland Care Premium with a two-year warranty. We also provide online video, educational support and certified service engineers to keep your machine running smoothly.

Fail-safe cooling system prevents overheating, and the water collection filtration system prevents clogging.
Complete your dental restoration solution with the DWX-4W Wet Dental Mill.

**DWX-4W Highlights:**
- Simultaneous 4-axis milling of glass ceramics and composite resin
- High-performance Jaeger DentaDrive spindle
- Multi pin-clamp to mill up to three different pin-type materials continuously
- 4-station Automatic Tool Changer switches burs for a more continuous operation and detailed anatomy
- Color LED machine status light
- Easy VPanel operation to track tool life and machine calibration
- Connect up to four DWX devices to one computer
- Fully integrated pump and coolant system
- Automatic machine calibration
- Pair the DWX-iD and DWX-4W for the most flexible and productive dry and wet solution
- Roland Care Premium warranty included
- Made in Japan

**Specifications**
- **Cutable material:** Glass ceramics, Composite resin
- **Loadable component shape**
  - Width: Maximum 3.15 in (80 mm)
  - Depth: Maximum 0.79 in (20 mm)
  - Height: Maximum 0.79 in (20 mm)
- **Operating speed:** 0.34 to 70.9 in/min. (8 to 1800 mm/min.)
- **Spindle motor:** Jaeger High Frequency spindle
- **Spindle speed:** 15,000 to 60,000 rpm
- **Rotary axis travel angle:** ±360°
- **Number of burs housed:** 4
- **Attachable bur:** Shank diameter: 2 mm (Dedicated milling bur for wet grinding)
- **Compatible compressed air:** 0.7 to 10.0 MPa
- **Interface:** USB
- **Power requirements:** AC 100 to 240 V ±10%, 50/60 Hz, 1.9 A (overvoltage category II, IEC 60664-1)
- **Power consumption:** Approx. 200 W
- **Operating noise:** During operation 70 dB (A) or less (when not cutting)
- **External dimensions:** Width x Depth x Height 18.9 x 21.2 x 23.6 in. (480 x 538 x 599 mm)
- **Weight:** 116.8 lbs. (53 kg)

**Inclusion items**
- Power cord, USB cable, Drain hoses, Detection pin, Dedicated milling burs, Automatic correction jig, Measuring cup, Hexagonal screwdriver, Hexagonal wrench, Mounting screws, Setup guide, Daily maintenance card, Roland Software Package CD, Spindle maintenance kit

**System requirements for USB connection**
- **Operating system:** Windows® 7/8/8.1/10 (32 or 64 bit)
- **USB cable:** Use the included USB cable

**Options**
- **Collet (model #ZC-3JD):** Replacement spindle collet
- **Additive (model #ZAH-100D):** Additive for coolant 1000 ml
- **Filter for coolant tank (model #Z-FCLD):** Replacement filter for coolant tank
- **Grinding bur (model #ZGB-125D):** r1.25mm milling bur for wet grinding
- **Grinding bur (model #ZGB-50D):** r0.50mm milling bur for wet grinding
- **Grinding bur (model #ZGB-25D):** r0.25mm milling bur for wet grinding

The all-new DWX-4W Wet Dental Mill.
