© 2019 Henry Schein, Inc. No copying without permission. Not responsible for typographical errors. To **guarantee special pricing/offers**, please include the three digit promo code **when ordering**. Note: Participating in a promotional discount program (e.g., points, discount redemptions or other special awards) is only permissible in accordance with discount program rules. By participation in such program, you agree that, to your knowledge, your practice complies with the program requirements. For HS promotions: This promotion offers a bundled discount. The cost of any "buy/get" (or "no charge") items is a discount applied to your other purchases on the same invoice. The reportable value (unit price) of the "no charge" item will be identified on the invoice. To calculate the applicable discount on the other items on the same invoice, divide the total value (unit price(s)) of any no-charge item(s) by the total value (extension price(s)) of all other items purchased on the same invoice, and apply the resulting percentage equally to each item to determine net prices. For manufacturer promotions: The prices stated in the invoice or statement may reflect a discount or be subject to a rebate. You must fully and accurately report this stated discount price, or if applicable, any net pricing, after giving effect to any rebates, to Medicare, Medicaid, Tricare and any other federal or state program upon request by any such program. Accordingly, you should retain these records. It is your responsibility to review any agreements or other documents applicable to these prices to determine if they are subject to a rebate.

Running a successful dental lab requires adequate resources and funding.

Henry Schein Financial Services offers flexible financing and leasing programs to help you expand your business or upgrade technology and equipment, so you can increase revenue, and improve operating efficiency.

How can you top a bestseller? By making it even better.

Next generation
dry milling: K5+

Finance as low as
\$563
for 84 months

Includes VHF K5+ and tool set

Now available
at Zahn Dental

With the new K5+ milling machine we have succeeded in making something great even better. How? By introducing an **ionizer** to neutralize static charge of acrylic chips and to improve the cleaning process. And by launching the ground-breaking **tool-free clamping** of blanks which makes the K5+ even easier to use – and a little more perfect than before.

Dry milling at its finest: vhf.com/K5

*Monthly payment based on \$36,490 purchase at 6.49% for 60 months with a 6-month deferral. All transactions are subject to the satisfaction of underwriting guidelines, credit approval, and documentation requirements, and not all applicants will qualify. Revolutionize Your Composites with GC and Gradia Plus

November 14, 2019

Time: 4:00–6:30pm EDT

Credits: 3 CE

Location: Henry Schein, Inc. 220 Bear Hill Road, Waltham, MA 02451

Spend the evening with GC master technician, Mr. Hoshi and Zahn Dental on how to fabricate lithium silicate restorations with LiSi Press without the hassle and fear of over firing, graying and slumping.

We will also review Gradia and Opti Glaze esthetic composite layering materials for finishing the gingiva on high performance polymers such as PEEK.

KULZER
MITSUBI CHEMICALS GROUP

Digitize Your Removable Workflow: Learn Design and Manufacturing Solutions

November 15, 2019

Location: Columbus, OH

Credits: 8 CE

Cost: \$150

Join Zahn Dental for a unique opportunity to discover how you can transition your Removable department from analog to digital and walk away with experience and confidence to take the leap forward into digital dentures and removable partial dentures.

- Vincent Verderosa MDT, CDT will open the course with a comprehensive look at the current state of digital dentures. It's manufacturing workflows and the material options available include the advantages of each process.
- 3Shape will demonstrate scanning and designing of a full denture and partial framework. This will be a step-by-step denture design process including tips for integrating these workflows into your lab.
- Kris Schermerhorn will give an in-depth explanation of Myerson's thermoplastic solutions. He will demonstrate a design and share processing techniques with a live demonstration of easy repair solutions using the Hot Shot gun.
- Kulzer will be demonstrating live printing onsite and walk us through a printed denture design, the printing and post-processing procedures using luting materials and customer stains.
- Roland will review the new updates with their mills and explain the options for milling thermoplastics and other material solutions including the proper tooling.

The Only One for Dental and Ortho

Lucitone 199® Denture Base Goes Digital!

Lucitone 199® Denture Base Discs

The Lucitone 199 Denture Base Disc enables the dental lab to produce a Dentsply Sirona Digital Denture in-house. The lab can design an upper or lower digital denture arch, mill it, bond it with Dentsply Sirona Premium Portrait® IPN® denture teeth, polish, and go.

Lucitone 199 is the industry benchmark for high strength, high-impact resistant denture base acrylic with over 40 years of clinical success.

- Produce digital dentures recognized for precision and better fit.
- Maintain dimensional stability under high-speed milling.
- Offer a cleaner, safer way to fabricate dentures in your lab.

For details, ask your Zahn Representative or call 1-800-496-9500.
