## IN THIS ISSUE

**{ Prevention and early screening are key components to health and wellness. With the changing seasons comes the need to prepare your practice and patients for increased activities outdoors and their overall total health. }**

*Our sale flyer features products in support of:*

- **Hepatitis Awareness**
- **Melanoma/Skin Cancer Detection**
- **High Blood Pressure/Stroke Awareness Education**
- **Infection Control**

We offer a wide variety of diagnostics and pharmaceuticals for treatment of hepatitis as well as other viral infections/diseases. In the area of skin cancer and melanoma detection we have the latest test equipment and support products for your in-office procedures. You will find a complete array of small equipment for your blood pressure testing, as well as supplies from gloves and paper products to infection control—all value priced to help you stay within budget while keeping your patients on the road to optimal health.

### **Henry Schein Brand Products**

Look for the Henry Schein Brand products throughout this flyer. You can rely on the Henry Schein Brand name for high quality products that provide extra value at reasonable prices. From exam room supplies, gloves, and rapid diagnostics to diagnostic equipment, you'll find diverse product options that help you achieve greater patient satisfaction, enhanced productivity, and increased revenue for your practice. Additionally, our product line has met our high standards to earn the Henry Schein Seal of Excellence – **your guarantee of satisfaction.**

### **Editorial Extras**

Take note of our special *MedicalTips* throughout this flyer. These *MedicalTips* provide information and insight into industry trends taking place within the ever changing health care profession. Also look for our *Ask The Expert* article featuring current topics of interest.

### **Celebrating 80 Years of Excellence**

Henry Schein is proud of its history. From a New York pharmacy to a Fortune 300 company—we are dedicated to serving our customers, supplier partners, investors, society and Team Schein.

# Henry Schein Medical is your reliable network of trusted advisors.

*Rely on Us for...*

## Expert Guidance

*Our knowledgeable team of trusted advisors is dedicated to collaborating with you to meet specific goals related to quality patient care; staff and team growth; and profitability.*

- Revenue Enhancement Tools
- Cost Containment Programs
- Staff Training and Team Building
- Practice Marketing
- Technology Solutions

## Price Integrity

*We have relationships at the local, regional, and national level—including all major GPOs—to help manage operating costs and drive value for your practice. Web-enabled reporting tools guarantee your pricing is accurate and consistent.*

## Guaranteed Fast Delivery

*All orders received by 5 PM local time are shipped the same day. Your products arrive within 24–48 hours.*

## Vaccines, Pharmaceuticals, and Diagnostics

*We supply every adult and pediatric vaccine recommended by the ACIP, advancing prevention and wellness in your patient community. We meet all of your flu vaccination needs with our Worry-Free Guarantee Influenza Program.*

*Our pharmaceutical and diagnostic solutions include brand names as well as a complete line of generics and Henry Schein Brand options for added value.*

## Highlights

## MEDICAL TIP

*Of all strokes, 87 percent are ischemic, 10 percent are intracerebral hemorrhage, and 3 percent are subarachnoid hemorrhage.*

Source: [www.cdc.gov](http://www.cdc.gov)

*About 70% of those with high blood pressure and took medication had their high blood pressure controlled. The control rate was 46.6% among all hypertensive patients.*

Source: [www.cdc.gov](http://www.cdc.gov)

*The risk of ischemic stroke in current smokers is about double of that of nonsmokers after adjustment for other risk factors.*

Source: [www.cdc.gov](http://www.cdc.gov)

### Everyday Table Paper Rolls

### MEDICAL TIP

#### Did you know?

*Skin cancer is the most common of all cancer types. More than 2 million skin cancers are diagnosed each year in the United States. That's more than cancers of the prostate, breast, lung, colon, uterus, ovaries, and pancreas combined. The number of skin cancer cases has been going up over the past few decades.*

Source: [www.cancer.org](http://www.cancer.org)

### Orthopedic Exam Shorts

## The *illusion* is **deceiving.**

See your chemical allergy for what it is.

Ansell chemical accelerator-free gloves end the *masquerade.*

Prepare to be shocked as we unveil the mysterious source behind your allergy problem. While many often think latex is the cause of their suffering – the cleverly disguised culprit is often the chemical accelerators used to harden and shape both latex and synthetic gloves. In fact, **80%** of reported glove associated contact dermatitis is attributed to chemical accelerators, also known as a Type IV allergy. Ansell has unmasked the true source of your suffering – and has taken measures to stop it. Only Ansell offers an entire line of premium exam and surgical gloves that are chemical accelerator-free and latex-free to keep uninvited chemical allergies out of your life. When it comes to recognizing and preventing chemical allergies, the masquerade is over. Let the celebration begin.

Visit [AnsellProtects.com](http://AnsellProtects.com) to have even *more revealed.*

## ASK THE EXPERTS:

### How To Educate Your Patients About Hepatitis

**Q: How often should testing for hepatitis be done?**

*A. Tyne, Nurse Practitioner, Las Vegas, NV.*

**A: Annual testing for hepatitis can be done during routine physicals when a blood test is administered.**

*Send in your practice-related questions to our panel of Team Schein experts @ [Xchange.editor@henryschein.com](mailto:Xchange.editor@henryschein.com)*

**Up to 5.3 million people**—2 percent of the U.S. population—are living with chronic hepatitis B or hepatitis C. These diseases are more common than HIV/AIDS in the U.S. Yet, because hepatitis B and hepatitis C often present no symptoms, most people who have them are unaware until they develop liver cancer or liver disease many years later.

Although May is Hepatitis Awareness Month, viral hepatitis needs more attention throughout the year. One of the main findings from the *Institute of Medicine (IOM) report* was that the public and health care professionals lacked knowledge and awareness about viral hepatitis.

The term “hepatitis” means inflammation of the liver, and it refers to a group of diseases, each caused by a unique virus. In the United States, the most common types of viral hepatitis are **Hepatitis A**, **Hepatitis B**, and **Hepatitis C**.

#### **3 important facts about viral hepatitis**

1. Two types of viral hepatitis, (*Hepatitis B* and *Hepatitis C*) can lead to chronic, life-long infections
2. Many people with chronic viral hepatitis do not know they're infected
3. Chronic viral hepatitis can lead to liver cancer

#### **Hepatitis B and Hepatitis C can lead to chronic, life-long infections**

Hepatitis B is a liver disease that results from infection with the Hepatitis B virus. When first infected, a person can develop an “acute” or short-term infection. Some people are able to clear the virus but for others, especially those infected at birth or as young children, the infection remains and leads to a “chronic,” or lifelong, illness. While Hepatitis B is vaccine preventable, many people became infected before the Hepatitis B vaccine was widely recommended for children and adults at risk.

Hepatitis C is a liver disease that results from infection with the Hepatitis C virus. Most people who become infected with the virus—up to 85%—go on to develop a chronic infection. For reasons that are not known, about 15%–25% of people will “clear” the virus without treatment.

#### **Many people with chronic viral hepatitis do not know they're infected**

Many people with chronic viral hepatitis do not have symptoms and do not know they are infected. Even though a person has no symptoms and may appear healthy, the virus can still be detected in the blood and damage to the liver can still be occurring. Symptoms of chronic viral hepatitis can take up to 30 years to develop, and damage to the liver can silently occur during this time.

### HENRY SCHEIN® NON-FENESTRATED DRAPES

Poly-lined, Sterile, Tissue/Poly/Tissue

- Heat sealed along 2 outer edges to ensure a pinhole-free plastic layer that guarantees maximum protection against bacterial strike-through from below
- Features polyethylene lining between 2 layers of absorbent-strength tissue, virtually eliminating risk of bacterial migration and strike-through
- Using blue-tissue side up prevents glare
- All sterile fields are available in convenient dispenser boxes of 50 each

Blue, 18" x 26"

(900-4686) .....50/box

### HENRY SCHEIN® FENESTRATED DRAPES

Sterile, with 3"

Round Fenestration, Tissue/Poly/Tissue

- Allows access to the operative site while it protects surrounding area
- 3 round fenestration option is die cut and heat sealed, leaving a smooth, even edge that prevents linting
- Blue/white combination for antiglare
- Generously size
- Individually packed, 300 per case (6 dispensers of 50 each)
- Latex-free

Blue, 18" x 26"

(900-4685) .....50/box

### HENRY SCHEIN® DISPOSABLE BIOPSY PUNCH

Available in 9 different sizes from 1.5 mm to 8.0 mm. Sterile, individually pouched with a tamper-evident seal. Our disposable skin biopsy punches have beneficial properties not found with generic products.

Features include:

- Stainless steel ground blade
- Seamless punch
- Ergonomic blue handle

(penciclovir cream) 1%  
5g (Net Wt.)

## DON'T LET A COLD SORE RUIN YOUR SMILE.

Denavir® (penciclovir cream, 1%) is indicated for the treatment of recurrent herpes labialis (cold sores) in adults and children 12 years of age and older.

### Give your patients the confidence to manage cold sores.

With the same trusted mechanism of action as oral antivirals,<sup>1,2,3</sup> steroid-free Denavir provides topical relief and reduces the duration of pain associated with the lesion.<sup>1</sup> And it's well-tolerated.<sup>1</sup> In clinical trials, the most frequently reported negative side effects with Denavir and placebo, respectively, were headache (5.3% vs. 5.8%) and application site reaction (1.3% vs. 1.8%).<sup>1</sup> **Plus, eligible patients pay no more than \$15 with a money-saving coupon** (subject to eligibility restrictions and limitations).<sup>†</sup>

Visit [Denavir.com](http://Denavir.com) or call 1-888-DENAVIR (1-888-336-2847).

Denavir® (penciclovir cream, 1%) is indicated for the treatment of recurrent herpes labialis (cold sores) in adults and children 12 years of age and older.

### IMPORTANT SAFETY INFORMATION

Denavir should only be used on herpes labialis on the lips or face. Application to mucous membranes is not recommended. Denavir should not be used in patients with known hypersensitivity to the product or any of its ingredients.

There are no adequate and well-controlled Denavir studies in pregnant women; therefore, Denavir should be used during pregnancy only if clearly needed. There is no information on whether Denavir is excreted in human milk after topical administration; a decision whether to discontinue Denavir should take into account the importance of the drug to the mother. The effect of Denavir has not been established in immunocompromised patients. Denavir does not cure cold sores.

In clinical studies, the most common adverse reaction with Denavir was headache, which occurred in 5.3% of patients who received Denavir and 5.8% of patients who received placebo. Other adverse reactions with Denavir occurred in less than 2% of patients and included application site reaction, decreased sensitivity to touch/local anesthesia, taste perversion, and rash.

Other reported adverse reactions have included swelling of the mouth or throat, pain, alterations in sense of smell, abnormal touch sensation, itching, skin discoloration, and hives.

Denavir is available by prescription only. Please see the Full Prescribing Information on the back.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch), or call 1-800-FDA-1088.

<sup>†</sup>If a patient's co-pay or pharmacy bill exceeds \$15, they can present the certificate to the pharmacist for an instant rebate of up to a maximum of \$45 for each Denavir prescription. If their total out of pocket pharmacy bill exceeds \$60 for any single Denavir prescription, they will be responsible for the additional balance. Not valid with any other offer. **Subject to eligibility restrictions and limitations.** This offer is not valid for prescriptions reimbursed in whole or part by Medicaid, Medicare, or any other federal or state program (including any prescription drug programs). This offer is not valid in Massachusetts except for cash-paying patients, or where otherwise prohibited by law.

## Prescribing Information

### DESCRIPTION

Denavir contains penciclovir, an antiviral agent active against herpes viruses. Denavir is available for topical administration as a 1% white cream. Each gram of Denavir contains 10 mg of penciclovir and the following inactive ingredients: cetomacrogol 1000 BP, cetostearyl alcohol, mineral oil, propylene glycol, purified water and white petrolatum. Chemically, penciclovir is known as 9-[4-hydroxy-3-(hydroxymethyl) butyl]guanine. Its molecular formula is  $C_{10}H_{13}N_5O_2$ ; its molecular weight is 253.26. It is a synthetic acyclic guanine derivative and has the following structure:

Penciclovir is a white to pale yellow solid. At 20°C it has a solubility of 0.2 mg/mL in methanol, 1.3 mg/mL in propylene glycol, and 1.7 mg/mL in water. In aqueous buffer (pH 2) the solubility is 10.0 mg/mL.

Penciclovir is not hygroscopic. Its partition coefficient in n-octanol/water at pH 7.5 is 0.024 (logP = -1.62).

### CLINICAL PHARMACOLOGY

#### Microbiology

**Mechanism of Antiviral Activity:** The antiviral compound penciclovir has *in vitro* inhibitory activity against herpes simplex virus types 1 (HSV-1) and 2 (HSV-2). In cells infected with HSV-1 or HSV-2, viral thymidine kinase phosphorylates penciclovir to a monophosphate form which, in turn, is converted to penciclovir triphosphate by cellular kinases. *In vitro* studies demonstrate that penciclovir triphosphate inhibits HSV polymerase competitively with deoxyguanosine triphosphate. Consequently, herpes viral DNA synthesis and, therefore, replication are selectively inhibited.

**Antiviral Activity *In Vitro* and *In Vivo*:** In cell culture studies, penciclovir has antiviral activity against HSV-1 and HSV-2. Sensitivity test results, expressed as the concentration of the drug required to inhibit growth of the virus by 50% ( $IC_{50}$ ) or 99% ( $IC_{99}$ ) in cell culture, vary depending upon a number of factors, including the assay protocols. See Table 1.

Method of Assay	Virus Type	Cell Type	$IC_{50}$ (mcg/mL)	$IC_{99}$ (mcg/mL)
Plaque Reduction	HSV-1 (c.i.)	MRC-5	0.2-0.6	
	HSV-1 (c.i.)	WISH	0.04-0.5	
	HSV-2 (c.i.)	MRC-5	0.9-2.1	
	HSV-2 (c.i.)	WISH	0.1-0.8	
Virus Yield Reduction	HSV-1 (c.i.)	MRC-5		0.4-0.5
	HSV-2 (c.i.)	MRC-5		0.6-0.7
DNA Synthesis Inhibition	HSV-1 (SC16)	MRC-5	0.04	
	HSV-2 (MS)	MRC-5	0.05	

(c.i.) = clinical isolates. The latent state of any herpes virus is not known to respond to any antiviral therapy.

**Drug Resistance:** Penciclovir-resistant mutants of HSV can result from qualitative changes in viral thymidine kinase or DNA polymerase. The most commonly encountered acyclovir-resistant mutants that are deficient in viral thymidine kinase are also resistant to penciclovir.

#### Pharmacokinetics

Measurable penciclovir concentrations were not detected in plasma or urine of healthy male volunteers (n=12) following single or repeat application of the 1% cream at a dose of 180 mg penciclovir daily (approximately 67 times the estimated usual clinical dose).

**Pediatric Patients:** The systemic absorption of penciclovir following topical administration has not been evaluated in patients <18 years of age.

### CLINICAL TRIALS

Denavir was studied in two double-blind, placebo (vehicle)-controlled trials for the treatment of recurrent herpes labialis in which otherwise healthy adults were randomized to either Denavir or placebo. Therapy was to be initiated by the subjects within 1 hour of noticing signs or symptoms and continued for 4 days, with application of study medication every 2 hours while awake. In both studies, the mean duration of lesions was approximately one-half-day shorter in the subjects treated with Denavir (N=1,516) as compared to subjects treated with placebo (N=1,541) (approximately 4.5 days versus 5 days, respectively). The mean duration of lesion pain was also approximately one-half-day shorter in the Denavir group compared to the placebo group.

### INDICATIONS AND USAGE

Denavir (penciclovir cream) is indicated for the treatment of recurrent herpes labialis (cold sores) in adults and children 12 years of age and older.

### CONTRAINDICATIONS

Denavir is contraindicated in patients with known hypersensitivity to the product or any of its components.

### PRECAUTIONS

#### General

Denavir should only be used on herpes labialis on the lips and face. Because no data are available, application to human mucous membranes is not recommended. Particular care should be taken to avoid application in or near the eyes since it may cause irritation. Lesions that do not improve or that worsen on therapy should be evaluated for secondary bacterial infection. The effect of Denavir has not been established in immunocompromised patients.

#### Information for Patients

Denavir is a prescription topical cream for the treatment of cold sores (recurrent herpes labialis) that occur on the face and lips. It is not a cure for cold sores and not all patients respond to it. Do not use if you are allergic to Denavir (penciclovir) or any of the ingredients in Denavir cream. Before you use Denavir, tell your doctor if you are pregnant, planning to become pregnant, or are breast-feeding.

**Directions:** Wash your hands. Your face should be clean and dry. Apply a layer of Denavir cream to cover only the cold sore area or the area of tingling (or other symptoms) before the cold sore appears. Rub in the cream until it disappears. Apply the cream every 2 hours during waking hours for 4 days. Even though Denavir works at the blister stage, treatment should be started at the earliest sign of a cold sore (i.e., tingling, redness, itching, or bump). Wash your hands with soap and water after using Denavir cream. Store Denavir cream at room temperature (59°-86°F). Keep out of reach of children.

**Possible side effects:** Denavir cream was well tolerated in clinical studies in patients with cold sores. The most frequently reported side effect was headache. Common skin-related side effects of Denavir cream are application site reactions, local anesthesia, taste perversion, and rash.

#### Carcinogenesis, Mutagenesis, Impairment of Fertility

In clinical trials, systemic drug exposure following the topical administration of penciclovir cream was negligible, as the penciclovir content of all plasma and urine samples was below the limit of assay detection (0.1 mcg/mL and 10 mcg/mL,

respectively). However, for the purpose of inter-species dose comparisons presented in the following sections, an assumption of 100% absorption of penciclovir from the topically applied product has been used. Based on use of the maximal recommended topical dose of penciclovir of 0.05 mg/kg/day and an assumption of 100% absorption, the maximum theoretical plasma  $AUC_{0-24h}$  for penciclovir is approximately 0.129 mcg·hr/mL.

**Carcinogenesis:** Two-year carcinogenicity studies were conducted with famciclovir (the oral prodrug of penciclovir) in rats and mice. An increase in the incidence of mammary adenocarcinoma (a common tumor in female rats of the strain used) was seen in female rats receiving 600 mg/kg/day (approximately 395x the maximum theoretical human exposure to penciclovir following application of the topical product, based on area under the plasma concentration curve comparisons [24 hr  $AUC$ ]). No increases in tumor incidence were seen among male rats treated at doses up to 240 mg/kg/day (approximately 190x the maximum theoretical human  $AUC$  for penciclovir), or in male and female mice at doses up to 600 mg/kg/day (approximately 100x the maximum theoretical human  $AUC$  for penciclovir).

**Mutagenesis:** When tested *in vitro*, penciclovir did not cause an increase in gene mutation in the Ames assay using multiple strains of *S. typhimurium* or *E. coli* (at up to 20,000 mcg/plate), nor did it cause an increase in unscheduled DNA repair in mammalian HeLa S3 cells (at up to 5,000 mcg/mL). However, an increase in clastogenic responses was seen with penciclovir in the L5178Y mouse lymphoma cell assay (at doses  $\geq 1000$  mcg/mL) and, in human lymphocytes incubated *in vitro* at doses  $\geq 250$  mcg/mL. When tested *in vivo*, penciclovir caused an increase in micronuclei in mouse bone marrow following the intravenous administration of doses  $\geq 500$  mg/kg ( $\geq 810x$  the maximum human dose, based on body surface area conversion).

**Impairment of Fertility:** Testicular toxicity was observed in multiple animal species (rats and dogs) following repeated intravenous administration of penciclovir (160 mg/kg/day and 100 mg/kg/day, respectively, approximately 1155 and 3255x the maximum theoretical human  $AUC$ ). Testicular changes seen in both species included atrophy of the seminiferous tubules and reductions in epididymal sperm counts and/or an increased incidence of sperm with abnormal morphology or reduced motility. Adverse testicular effects were related to an increasing dose or duration of exposure to penciclovir. No adverse testicular or reproductive effects (fertility and reproductive function) were observed in rats after 10 to 13 weeks dosing at 80 mg/kg/day, or testicular effects in dogs after 13 weeks dosing at 30 mg/kg/day (575 and 845x the maximum theoretical human  $AUC$ , respectively). Intravenously administered penciclovir had no effect on fertility or reproductive performance in female rats at doses of up to 80 mg/kg/day (260x the maximum human dose [BSA]).

There was no evidence of any clinically significant effects on sperm count, motility or morphology in 2 placebo-controlled clinical trials of Famvir® (famciclovir [the oral prodrug of penciclovir], 250 mg b.i.d.; n=66) in immunocompetent men with recurrent genital herpes, when dosing and follow-up were maintained for 18 and 8 weeks, respectively (approximately 2 and 1 spermatogenic cycles in the human).

### Pregnancy

**Teratogenic Effects-Pregnancy Category B.** No adverse effects on the course and outcome of pregnancy or on fetal development were noted in rats and rabbits following the intravenous administration of penciclovir at doses of 80 and 60 mg/kg/day, respectively (estimated human equivalent doses of 13 and 18 mg/kg/day for the rat and rabbit, respectively, based on body surface area conversion; the body surface area doses being 260 and 355x the maximum recommended dose following topical application of the penciclovir cream). There are, however, no adequate and well-controlled studies in pregnant women. Because animal reproduction studies are not always predictive of human response, penciclovir should be used during pregnancy only if clearly needed.

### Nursing Mothers

There is no information on whether penciclovir is excreted in human milk after topical administration. However, following oral administration of famciclovir (the oral prodrug of penciclovir) to lactating rats, penciclovir was excreted in breast milk at concentrations higher than those seen in the plasma. Therefore, a decision should be made whether to discontinue the drug, taking into account the importance of the drug to the mother. There are no data on the safety of penciclovir in newborns.

### Pediatric Use

An open-label, uncontrolled trial with penciclovir cream 1% was conducted in 102 patients, ages 12-17 years, with recurrent herpes labialis. The frequency of adverse events was generally similar to the frequency previously reported for adult patients. Safety and effectiveness in pediatric patients less than 12 years of age have not been established.

### Geriatric Use

In 74 patients  $\geq 65$  years of age, the adverse events profile was comparable to that observed in younger patients.

### ADVERSE REACTIONS

In two double-blind, placebo-controlled trials, 1516 patients were treated with Denavir (penciclovir cream) and 1541 with placebo. The most frequently reported adverse event was headache, which occurred in 5.3% of the patients treated with Denavir and 5.8% of the placebo-treated patients. The rates of reported local adverse reactions are shown in Table 2 below. One or more local adverse reactions were reported by 2.7% of the patients treated with Denavir and 3.9% of placebo-treated patients.

Table 2—Local Adverse Reactions Reported in Phase III Trials

	Penciclovir n=1516 %	Placebo n=1541 %
Application site reaction	1.3	1.8
Hypesthesia/Local anesthesia	0.9	1.4
Taste perversion	0.2	0.3
Pruritus	0.0	0.3
Pain	0.0	0.1
Rash (erythematous)	0.1	0.1
Allergic reaction	0.0	0.1

Two studies, enrolling 108 healthy subjects, were conducted to evaluate the dermal tolerance of 5% penciclovir cream (a 5-fold higher concentration than the commercial formulation) compared to vehicle using repeated occluded patch testing methodology. The 5% penciclovir cream induced mild erythema in approximately one-half of the subjects exposed, an irritancy profile similar to the vehicle control in terms of severity and proportion of subjects with a response. No evidence of sensitization was observed.

### Post-Marketing Experience

The following events have been identified from worldwide post-marketing use of Denavir in treatment of recurrent herpes labialis (cold sores) in adults. These events have been chosen for inclusion due to a combination of their seriousness, frequency of reporting, or potential causal connection to Denavir cream.

**General:** Headache, oral/pharyngeal edema, parosmia.

**Skin:** Application site reactions, aggravated condition, decreased therapeutic response, erythematous rash, local edema, pain, paresthesia, pruritus, skin discoloration and urticaria.

### OVERDOSAGE

Since penciclovir is poorly absorbed following oral administration, adverse reactions related to penciclovir ingestion are unlikely. There is no information on overdose.

### DOSAGE AND ADMINISTRATION

Denavir should be applied every 2 hours during waking hours for a period of 4 days. Treatment should be started as early as possible (i.e., during the prodrome or when lesions appear).

### HOW SUPPLIED

Denavir is supplied in a 1.5 gram and 5 gram tube containing 10 mg of penciclovir per gram.

1.5 gram NDC 50816-624-01

5 gram NDC 50816-624-05

Store at controlled room temperature, 20°-25° C (68°-77°F) [see USP]

# FDA Cleared and Clinically Supported – Can your skin refrigerant say that?

Gebauer's Ethyl Chloride® topical anesthetic skin refrigerant is FDA cleared to instantly and temporarily control the pain associated with needle procedures and minor surgical procedures. That is why physicians have trusted Gebauer's Ethyl Chloride for more than 100 years.

## Control the pain of:

- Joint Injections
- Lidocaine Injections
- IV Starts and Venipuncture
- Incision and Drainage of Small Abscesses
- Minor Sports Injuries

## Important Risk and Safety Information for Gebauer's Ethyl Chloride:

Published clinical trial results support the use in children 3 years of age and older. Ethyl Chloride is **FLAMMABLE** and should never be used in the presence of an open flame or electrical cautery equipment. Inhalation should be avoided as it may produce narcotic and general anesthetic effects, and may produce deep anesthesia, fatal coma or cardiac arrest. Do not spray in eyes. Over spraying may cause frostbite. Freezing may alter skin pigmentation. The thawing process may be painful, and freezing may lower resistance to infection and delay healing. Cutaneous sensitization may occur, but appears to be extremely rare. Long-term exposure may cause liver or kidney damage. Rx Only.

## Control the pain of:

- Podiatric Blocks
- Ingrown Toenails
- Lancing Boils
- Skin Tag Removal

## See for Yourself

When used as intended, Gebauer's Ethyl Chloride, is extremely safe and effective. A significant body of clinical data supporting the safety and effectiveness of Gebauer's Ethyl Chloride has been published in a variety of peer reviewed clinical journals. To see for yourself visit: **[www.gebauer.com](http://www.gebauer.com)**

Despite high rates of reported pertussis  
in a recent decade, **vaccination** rates  
remain low.

{ The ACIP recommends  
Tdap vaccination for  
adults and adolescents,  
including  
healthcare providers }

- Adults 19–64 years of age should receive a single dose of the Tdap booster, especially adults who have or anticipate close contact with infants <12 months of age — When possible, women should receive Tdap before becoming pregnant
- Adolescents 11–18 years of age should receive the Tdap booster, with the preferred age of vaccination at the 11–12 year visit
- Health-care providers in hospitals or ambulatory-care settings who have direct patient contact should receive a single dose of Tdap
- Tdap is preferred to Td for tetanus prophylaxis in wound management Source: [www.cdc.gov](http://www.cdc.gov)

## MEDICAL TIP

### Can Viral Hepatitis Be Prevented?

Yes! Viral Hepatitis can be prevented.

- The best way to prevent Hepatitis A and Hepatitis B is by getting vaccinated.
- All children should be vaccinated against Hepatitis A and Hepatitis B.
- Many adults are at risk for Hepatitis A and/or Hepatitis B and should also be vaccinated.

### Hemocult® ICT Tests

Next-generation fecal occult blood test (FOBT) for colorectal cancer screening. Specific for human hemoglobin, this immunochemical test eliminates all diet and drug restrictions. Specific for lower GI bleeding, resulting in fewer false positives and a reduction in unnecessary invasive procedures.

- CLIA waived; easy test procedure
- Screening reimbursement code: G0328QW†

### #395066A, Screening Kit (834-3249).....ea

Contains: 1 box of 40 patient screening kits. Each patient screening kit contains: 1 dispensing envelope with patient instructions, 3 Hemocult ICT collection cards, 3 flushable collection tissues, 3 applicator sticks & 1 mailing pouch.

### #395067A, Test Kit (834-6389).....ea

Contains: 20 test devices & 1-1-mL bottle Hemocult ICT buffer (to be used with Hemocult ICT collection cards & patient screening kits).

### 2-Day Patient Screening Kit (237-0085) .....50/box

Contains: 1 dispensing envelope, 2 Hemocult ICT collection cards, 2 flushable collection tissues, 2 applicator sticks & 1 mailing pouch.

### ICON® 20 hCG

A rapid test for detecting hCG qualitatively.

#395097A  
(331-0431).....25/box

### ICON® 25 hCG Pregnancy Test

A one-step, rapid, combination serum/urine test designed for the early detection of pregnancy.

- 25 mIU/mL sensitivity, >99% specificity
  - 3-minute results for urine, 5-minute results for serum
  - Requires just 3 drops of specimen
  - CLIA waived for urine
- (254-2726) .....25/box

When quality is  
at the CORE of every  
decision you make...

**Trust Hemocult ICT**—the only Immunochemical fecal occult blood test clinically tested over an extended duration and proven to work. Our dry-slide process has provided excellent proven results for over 40 years.

**Excellent 14-day stability**—developed with dry-slide technology, which increases stability of the sample—allowing for multiple-day collection and necessary transit/development time.

**Higher sensitivity and specificity**—clinically proven to have a relative sensitivity of 100% and apparent specificity of 99.1%.

**No drug or dietary restrictions**—Hemocult ICT is specific to intact human hemoglobin—eliminating interactions from red meat, Vitamin C and other factors that lead to false positives.

**The right choice**—meeting the American Cancer Society and the U.S. Task Force for Colorectal Cancer (CRC) Foundation recommendation of multiple-day testing for CRC.

For information on developing a colorectal cancer screening program in your office, contact your Henry Schein representative today.

#256045, CLIA-waived BD Veritor™ System Flu A+B Kit (992-0002) .....30 tests/pkg

### MEDICAL TIP

Appropriate treatment of patients with respiratory illness depends on accurate and timely diagnosis. Early diagnosis of influenza can reduce the inappropriate use of antibiotics and provide the option of using antiviral therapy. However, because certain bacterial infections can produce symptoms similar to influenza, bacterial infections should be considered and appropriately treated, if suspected.

Influenza surveillance information and diagnostic testing can aid clinical judgment and help guide treatment decisions. The accuracy of clinical diagnosis of influenza on the basis of symptoms alone is limited because symptoms from illness caused by other pathogens can overlap considerably with influenza. Influenza surveillance by state and local health departments and CDC can provide information regarding the presence of influenza viruses in the community. Surveillance can also identify the predominant circulating types, influenza A subtypes, and strains of influenza.

CPT® Codes: 81000†/81001†/81002†/81003†

## SIEMENS

### CLINITEK® Microalbumin Test Strips

Test for semiquantitative determination of microalbumin/creatinine in urine. Semiquantitative tests for protein (2–4 mg/dl) and creatinine. Includes an A:C ratio result.

#2083

(147-4712).....25/btl

CPT® Codes: 82044†/82570†

Control Strips for urinalysis. 25 positive strips and 25 negative strips.

## MEDICAL TIP

*In 2005–2008, based on fasting glucose or A1c levels, 35% of U.S. adults aged 20 years or older had prediabetes (50% of those were aged 65 years or older). Applying this percentage to the entire U.S. population in 2010 yields an estimated 79 million Americans aged 20 years or older with prediabetes.*

# Precision Uroflowmetry System by

**HENRY SCHEIN®**  
MEDICAL

## What is the Flo-Med 1100 by Henry Schein?

It is a simple, non-invasive diagnostic screening device used to calculate the flow rate of urine over time. This aids in diagnosis of bladder and sphincter function as well as prostate conditions.

**112-5811 Flo-Med 1100 Uroflowmetry System**  
**112-5812 Flo-Med Disposables case of 24 sets**

- Easy to use (hygienic & convenient)
- Height adjustable
- Battery operated
- Wireless or hardwire capable
- CPT 51741
- Compact/portable
- One-touch technology
- Easy calibration
- PDF can easily be stored into an EHR

### System Requirements:

Windows 7, XP, Vista  
Hardwire compatible with PCL5 Printer

### (112-5811)

Precision Uroflowmetry System, 1 Unit

### (112-5812)

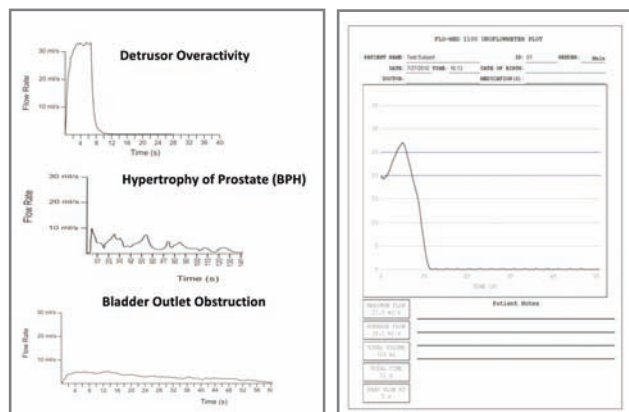

Cup & Funnel Disposables

Other accessories such as Laptops and printers are available separately.

### pHizatest™ Nitrazine Indicator Paper

Compare to NitraTest™  
Designed for the *in vitro* determination of body-fluid pH in the 4.5–7.5 range. Typically used to measure vaginal pH, including detecting amniotic fluid in late-term pregnancy, a sign of premature amniotic-sac rupture, nitrazine-indicator paper is also used to aid in diagnosing bacterial vaginosis, measuring ocular pH, and more. Packaged in a familiar, convenient, and easy-to-use dispenser and includes a color chart. Each roll provides approximately 100 tests.

(122-0181) .....ea  
CPT® Code 83986†

### Erado-Sol® Stain Remover

A fast and effective biological and chemical stain remover that removes most medical and histological stains from hands, plastic, glassware, lab coats, floors, and laboratory equipment and surfaces. Phosphate-free, biodegradable, and pH neutral (7–8). Easy to apply—simply rub in gently and stain is gone in a matter of seconds. Rinse with water.

Erado-Sol removes:

- Most medical and histological stains
- Wright stain • Fresh blood
- Iodine • Lugol's stain

#207-32, 32 oz  
(154-6143) .....ea

### Monse's (Rx) Solution

Formula to help control bleeding during biopsy, LLETZ, and laser procedures. Widely known as ferric-sulfate solution, it is less irritating than ferric-sulfate solution, owing to the smaller proportion of sulfuric acid. Convenient 8-mL, light-resistant amber glass vials for single usage. Includes applicators.

8-mL Unidose Vial  
(812-0005) .....12/box

### Lugol's (Rx) Solution

- Used for staining cervical and vaginal mucosa during colposcopic evaluations of abnormal Pap smears
- Less painful or irritating than alcoholic solutions when applied to cuts
- Potassium iodide added to increase the solubility of the iodine

#0111-8, 8-mL Unidose Vials  
(812-0004) .....12/box

Disposable Cryosurgical Device

**Clinically effective direct spray of liquid nitrous oxide (-89°C/ -127°F) in a convenient and economical device.**

- Colder and more effective than canister-based disposable systems
- Precise, concentrated spray
- Usually resolves most lesions in a single-office visit
- Average treatment time is 10 seconds
- Precise, concentrated spray, no accessories required
- FDA approved for a broad range of non-malignant lesions
- Unit does not contact patient
- Shelf-life of 2 years un-activated, at least 6 months activated
- Non-flammable, disposable
- High revenue stream, pays for itself in about 3 treatments

(378-0286) **CryOmega**

Disposable cryosurgical unit containing 16g nitrous oxide (N<sub>2</sub>O) cartridge

CryOmega is a registered trademark of CryoConcepts, LP. U.S. and International Patents Pending.

## MEDICAL TIP

### How Serious Is Viral Hepatitis?

Over time, about 15% to 25% of people with chronic hepatitis develop serious liver problems, including liver damage, cirrhosis, liver failure, and liver cancer. With early detection, many people can get lifesaving care and treatment that can limit disease progression, prevent cancer deaths, and help break the cycle of unknowingly transmitting the virus to others.

### MEDICAL TIP

*The American Cancer Society estimates that about 68,130 new melanomas will be diagnosed in the United States during 2011 (about 38,870 in men; 29,260 in women). Incidence rates for melanoma have been increasing for at least 30 years. In recent years, the increases have been most pronounced in young white women and in older white men.*

Source: [www.cancer.org](http://www.cancer.org)

*Cancer of the skin is by far the most common of all cancers. Melanoma accounts for less than 5% of skin cancer cases but causes a large majority of skin cancer deaths.*

Source: [www.cancer.org](http://www.cancer.org)

## VERRUCA-FREEZE®

Safe, Easy & Effective Cryosurgery  
[www.verrucafreeze.com](http://www.verrucafreeze.com)

Verruca Freeze® is one of the coldest portable cryosurgical systems available making it extremely effective on Warts, Plantar Warts, Skin Tags, Molluscum, Condyloma & more. A 3-6 second spray of cryogen, freezing for 30 seconds, makes it a quick, easy and effective form of cryosurgery.

Choose from 2 Different Sizes of Kits & 3 Sizes of Replacement Canisters. All products can be purchased individually and be replaced as needed.

- ✓ Treat Up To 21 Types Of Skin Lesions!
- ✓ Flexible Purchasing Options!
- ✓ Minimum 5 Year Shelf Life!
- ✓ Freezes Down To -70°C!
- ✓ High Reimbursement Rates!

### Piccolo® Point-of-Care Chemistry Analyzer Accessories

The first broad-menu clinical chemistry analyzer designed for near-patient testing. *Basic Panel* contains BUN, Ca, Cl<sup>-</sup>, CRE, GLU, K<sup>+</sup>, Na<sup>+</sup>, and tCO<sub>2</sub>.

*Comprehensive Panel* contains ALB, ALP, ALT, AST, BUN, Ca, Cl<sup>-</sup>, CRE, GLU, K<sup>+</sup>, Na<sup>+</sup>, TBIL, tCO<sub>2</sub>, and TP. *Lipid Panel* contains CHOL, CHOL/HDL (calculated), HDL, LDL (calculated), TRIG, and VLDL (calculated).

- General chemistry, liver, electrolyte, BMP, CMP, lipid, renal, and hepatic panels available
- No daily controls, calibrators, or maintenance
- Intelligent Quality Control (iQCT) verifies correct performance
- No special training required
- 0.1cc whole blood, serum, or plasma
- Single-use reagent discs
- Compact and portable
- Built-in QC and calibration
- Lipid panel is CLIA waived
- Whole blood, serum, or plasma
- Less than 2 minutes hands-on
- Results in under 13 minutes

#1100-0000, Accessory Kit  
(106-6368) .....ea

Contains: 1-0.1cc Minipette, 1-96-pack of disposable Minipette tips, 1 operator's manual, training CD, 1 power cord, 1 power supply, 10 lithium-heparin tubes, 1 screwdriver & 2-12-packs of results cards.

### CoaguChek XS® Test Strips

For XS and XS Plus Meters  
(891-7593) .....48/box  
Contains: 24 strips per bottle, 2 bottles per box.

### LeadCare® II Analyzer

- Accurate, On-the-Spot Lead Testing
- CLIA-waived, reimbursable test
- Perform blood-lead measurements with only 2 drops of blood
- Accuracy and sensitivity of a reference lab test (from capillary or venous blood sample)
- Two-drop sample size requires only a finger stick; allows combination of LeadCare II with other tests
- In-office immediate results in 3 minutes

### CLA-1™ Luminometer

This compact luminometer automatically prints a complete report that lists the tested allergens and the severity of the patient's response to each. Easy to use, the system is the simplest, quickest, and most convenient allergy testing method available today. It can analyze up to 180 allergens in 8 minutes.

#905013  
(680-1614) .....ea

### CoaguChek XS® Plus System

Built-in QC and Data Management for Point-of-Care Anticoagulation Testing

This system has the same features as the CoaguChek® XS system but offers updated QC and data-management capabilities for healthcare professionals at the point of care.

- Stores 500 patient and/or QC results
- Operator and QC lockout capabilities
- Code chip programming
- Data storage for up to 60 code chips
- Moderately complex

10-Box Starter Kit  
(109-3345) .....ea

Contains: CoaguChek® XS Plus Analyzer, 10 boxes (480 total) of CoaguChek XS PT test strips & CoaguChek lancets.

CPT® Code: 83655†

### CoaguChek XS® System

PT/INR Monitoring Solution

The next generation in point-of-care prothrombotin (PT) and international normalized ratio (INR) testing, this new system uses exclusive smart technology to help ensure accurate results and offers the flexibility and control that health care professionals need to confidently manage a wide range of anticoagulated patients. It is the only system to perform onboard quality control and determine patient results in a single-test chamber.

- CLIA waived
- Neutralizes therapeutic levels of heparin and LMWH
- INR corrected for hematocrit within specified range; manage a broad array of patients with a single device
- Small sample size (10 µL) for easy dosing
- Strip allows dosing from either top or side for simple blood application
- Small, battery-powered, handheld meter for portability and efficiency
- Onboard controls; no external QC necessary
- Auto-on with strip insertion and auto-off capabilities
- 18-month strip shelf life; no refrigeration needed

XS® System  
(891-0581) .....ea

(108-1861) .....ea  
Contains: XS Analyzer, 3 boxes of CoaguChek XS PT strips (144 total) & CoaguChek Lancets.

5-Box Starter Kit  
(108-7757) .....ea  
Contains: XS Analyzer, 5 boxes of CoaguChek XS PT test strips (240 total) & CoaguChek Lancets.

10-Box Starter Kit  
(108-2228) .....ea  
Contains: XS Analyzer, 10 boxes of CoaguChek XS PT test strips (480 total) & CoaguChek Lancets.

**BIOSITE**  
NEW DIMENSIONS IN DIAGNOSIS

### Triage® BNP Test

The only CLIA-waived blood test measuring B-type natriuretic peptide (BNP). Cardiac hormone produced by the heart ventricles in response to ventricular volume expansion and pressure overload. CLIA waived for use with whole-blood samples. Rapid, objective point-of-care immunoassay is used:

- As an aid in the diagnosis and severity of CHF
- For the risk stratification of patients with ACS and HF

- #98000XR, BNP Test (131-7507) .....25/box
- #98013XR, BNP Control Set, Level 1 (5 Level 1) (219-6429) .....ea
- #98014XR, BNP Control Set, Level 2 (5 Level 2) (219-6475) .....ea
- #98015XR, BNP Calibration Verification Control Kit (1 per Level, 5 Levels) (131-9669) .....ea
- #98200, BNP Reagent for Beckman Coulter Immunoanalyzers (104-4059) .....100/box
- #98201, BNP QC Controls for Beckman Coulter Immunoanalyzers (478-8086) .....ea
- #98202, BNP Calibrator for Beckman Coulter Immunoanalyzers (640-1104) .....ea

**BIOSITE**  
NEW DIMENSIONS IN DIAGNOSIS

### Triage® Cardiac Panel

Measures 3 key cardiac markers: myoglobin, CK-MB, and troponin I.

- Easy to use, with results in approximately 15 minutes
- Results read by Triage® MeterPro™ meter
- Whole blood or plasma

- #97000HS (131-1964) .....25/box

**HemoSense**

### INRatio2® Monitor

Allows you to obtain a prothrombin time (PT) and international normalized ratio (INR) result using 1 drop of blood from a fingerstick.

- CLIA waived
- Easy to use
- Single-button operation
- 1-step auto turn-on with strip insertion
- Larger LCD screen and easy-to-read digits
- Small, 1-drop (15 µL), sample size
- Wider test-strip area for easier sample application
- Test results in under 1 minute
- Test strips do not require refrigeration
- 2-channel, on-board quality control runs on every test
- No need for external liquid quality control or extra strips
- Test strips are individually wrapped and stored at room temperature

- INRatio2 Professional Monitor Kit (111-3837) .....ea

- #INR2QS1 Quick Start #1 (111-3840) .....ea

Contains: analyzer, 1 box of 48 INRatio test strips, 50 Unistik® single-use lancets, 100 alcohol pads & 250 gauze brick pads.

- #INR2QS3 Quick Start #3 (111-3844) .....ea

Contains: analyzer, 3 boxes of 48 INRatio test strips (144 total), 150 Unistik® single-use lancets, 200 alcohol pads & 250 gauze brick pads.

- #INR2QS5 QuickStart #5 (111-6578) .....ea

Contains: analyzer, 5 boxes of 48 INRatio test strips (240 total), 250 Unistik® single-use lancets, 300 alcohol pads, 5 boxes of capillary tubes & 500 gauze brick pads.

- #INR2-6PK 6-Box Promo (112-3230) .....ea

Contains: analyzer, 6 boxes of 48 INRatio test strips (288 total), 10 single-use lancets & 10 capillary tubes.  
CPT® Code: #85610QW†

**CHOLESTECH**

### Cholestech LDX® System

Complete Lipid Profile, Glucose Lab-accurate lipid profile, glucose, ALT, AST, and hs-CRP results in about 5 minutes\* from a simple fingerstick. Allows provider to get results while patient is still in office—provider can counsel and intervene face-to-face. This improves patient compliance and increases control and management of heart disease and diabetes. Reimbursable by Medicare and most private payers.

- CLIA waived\*\*
- Procedure saves time and enhances productivity
- Small, tough, and portable
- Eliminates anxiety of venipuncture; requires only a fingerstick
- On-the-spot adjustment of therapy and improved patient compliance
- Accuracy comparable to laboratory tests
- Saves time: fewer follow-up visits required
- Enhances compliance through teachable moments between healthcare providers and patients

- #10-959, Analyzer (738-2917) .....ea

Contains: 1 of ea: analyzer, printer, power supply, starter pack, optics check cassette, printer cable, user's manual, procedure manual & training video. Starter pack contains 200 lancets, 200 capillary tubes, 200 capillary plungers, 1 Minipette pipette, 50 pipette tips, 1 accessory tray & 1 fingerstick tip pad.

- \*6-minute results for hs-CRP.
- \*\*Except hs-CRP.

- #10-986, Test for TC (420-7892) .....10/box
- #10-987, Test for TC and HDL Panel (600-5779) .....10/box

- #10-990, Test for TC, HDL, and Glucose Panel (600-5781) .....10/box

The Henry Schein LabTeam is a highly trained group of Clinical Laboratory Specialists offering expert lab consultation and analysis to assist your practice in advancing patient care, maximizing revenues, and cost containment.

❖ **A broad portfolio of the leading laboratory systems available in the market, offering you the best solution for your individual practice needs.**

*As a distributor of a wide selection of the leading Laboratory Systems, a Henry Schein Clinical Laboratory Specialist offers you the best solution for your practice from the industry instead of just one brand.*

❖ **Financial analysis for capital purchases of laboratory equipment providing select recommendations and advantageous acquisition programs.**

*A Henry Schein Clinical Lab Specialist will evaluate your current testing volumes to provide you a financial analysis to maximize your Laboratory solutions. In addition, Henry Schein Financial Services offers financial solutions to help you acquire the system your practice needs.*

❖ **Testing and volume analysis to maximize your lab efficiency.**

*Our Clinical Lab Specialists can provide laboratory design and planning assistance to help you maximize your lab testing and revenues.*

❖ **Professional consultation for CLIA certification.**

*The Henry Schein Lab Team can provide access to Laboratory consultants to help your in office achieve CLIA certification and OSHA compliance.*

❖ **Knowledgeable, ongoing customer support from our dedicated Laboratory support group.**

*Our dedicated and experienced laboratory customer service will ensure that your ongoing ordering of consumables and reagents needs are efficiently satisfied.*

❖ **Laboratory custom solutions are available based on customer needs.**

*Lot sequestering for reagents, calibrators, and controls are available for selected systems to keep your laboratory working smoothly.*

*Contact Henry Schein today for a comprehensive laboratory solution analysis with a Clinical Laboratory Specialist!*

### Assurance 50® "Fade-Resistant" Papers

Single Channel, Red Grid

Unique line of thermal recording media. Look and feel is similar to standard thermal charts, but difference is in acid-free base paper and patented chemical thermal coatings. Combination of these 2 elements works to deliver 50 years of ECG image life without worry or fading. Thermal chart contaminants such as UV light, PVC, alcohol, adhesive tape, and electrode creams are no longer of concern. No special care or handling is required. Guarantee clear, indelible original records, year after year.

### MEDICAL TIP

*Most cases of Lyme disease can be treated successfully with a few weeks of antibiotics. Steps to prevent Lyme disease include using insect repellent, removing ticks promptly, applying pesticides, and reducing tick habitat. The ticks that transmit Lyme disease can occasionally transmit other tickborne diseases as well.*

GE Healthcare

# Clinically connected. Simply smart.

imagination at work

**NEW!** CS v6.6 Diagnostic System from GE Healthcare is more than a software program—it is a data acquisition and management solution that transforms a PC into an advanced diagnostic system. So a clinician can easily acquire, analyze, store, and transport resting ECG, exercise stress tests, ambulatory blood pressure, and spirometry measurements.

Clinically precise. Functionally simple. Completely connected to the demands of a practice and the needs of patients. All in a few easy steps.

Connecting hearts and minds.

### #703 Digital Column Scale

High-Capacity Scale

With very high capacity and BMI function. Extremely robust, precise, and stable: with a capacity of 550 lb, a large but low platform and the integrated BMI function, this column scale has the prerequisites for the diagnosis and therapy of heavyweight patients. The energy-saving battery operation—up to 16,000 weighings with just one set of batteries—means that this scale can be used anywhere, as it is not dependent on AC power.

- Includes seca #220 measuring rod
- Capacity: 550 lb/250 kg
- Graduation: 0.2 lb/100 g
- Functions: TARE, HOLD, BMI, kg/lb/sts switch over
- Transport casters
- Optional adapter set: RS 232 seca #460 (600-5578) .....ea

## seca

### #769 Electronic Column Scale with BMI Function and Height Rod

Versatile, low-maintenance, battery-operated scale is perfect for your patients. Moves easily on transport casters. Nonslip platform surface guarantees a safe foothold.

- Capacity: 450 lb
- Graduation: 0.2 lb
- Functions: automatic switch off, tare, hold, BMI, and lb/kg switch over
- Transport casters
- Base dimensions 3"H x 11½"W x 11¾"D
- Runs on 4 AA batteries
- (108-3824) .....ea

## seca

### #216 Accu-Hite Stadiometer

From its built-in leveling bubble to its handsome design, this stadiometer has long been the stadiometer of choice. It features a headpiece that comes with a lock knob for measurement accuracy and safety. Plus, readings can be taken in feet, inches, and centimeters.

- Measuring range: 24"–83" (61–212 cm)
- Graduations: ⅛" (1 mm)
- (266-5011) .....ea

## seca

### #222 Mechanical Telescopic Stadiometer

This full-length model is wall mounted, extends to the floor, and comes with a foot plate for increased stability. Additionally, this stadiometer—made from sturdy anodized aluminum—has an additional 4" head plate to ensure further accuracy. Because it telescopes up to eye level, readings will become easier.

- Measuring range: 2½" – 90½"/6 cm – 230 cm
- Graduations: ⅛" x 1 mm
- (266-8199) .....ea

## Efficiency and Capacity like you've never seen before.

Midmark 625 Barrier-Free® Examination Tables – where unprecedented efficiency and increased capacity come together to support evolving needs in the exam room.

Increased speed comfortably positions patients 40% quicker than the industry standard exam tables, increasing efficiency in your practice.

And, with a 650-pound weight capacity, you no longer need to be concerned with changing patient demographics.

For more information, call 1-866-257-2322 or visit [midmark.com/ScheinMaySale](http://midmark.com/ScheinMaySale).

### **AED Pro® Automated External Defibrillator**

This external defibrillator provides advanced capabilities for BLS and ALS users with innovative Real CPR Help® technology for rate and depth of chest compressions. The See-Thru CPR® capability filters CPR chest compressions, displaying the underlying cardiac rhythm. The AED Pro is unmatched in its ruggedness and durability and is ideal for any environment.

- Available as semiautomatic only or semiautomatic with manual override for ALS professionals
- Built-in internal memory and external USB memory technology allows expanded data storage capacity and maximum flexibility for data management and transfer
- Electrodes and battery compatibility with ZOLL M Series®, E Series®, and R Series® professional defibrillators
- ECG monitoring with 3-lead cable and high-quality display
- Unrivaled battery options (long-life disposable or rechargeable) that meet specific needs

(869-6270) .....ea

### **ZOLL AED Plus®**

Bringing Lifesaving Defibrillation to Everyone

The only AED with CPR feedback and an ECG waveform. By supporting CPR as well as defibrillation, this device can help every unresponsive victim. Features Real CPR Help®, a tool that is able to actually see what user is doing and provides audio and visual prompts to help them do it with confidence and clarity.

- Provides a one-piece electrode for accurate placement
- Uses consumer lithium batteries that are easy to replace, long-lasting, and inexpensive

Complete Unit

### SureTemp® Plus 690 Electronic Thermometer

Combines the speed of ear thermometry with the accuracy and reliability of traditional oral thermometry. Takes fast, 4–6-second oral temperatures, 10-second pediatric axillary and rectal temperatures, and 15-second adult axillary temperatures.

- Accurate to within  $\pm 0.2^\circ\text{F}$  ( $0.1^\circ\text{C}$ )
- Interchangeable, removable probe wells to reduce the risk of cross contamination
- Large LCD that can display temperatures in Fahrenheit or Celsius
- Last-temperature recall
- Mode selection and recall buttons
- Four different temperature modes
- Convenient storage for 25 probe covers

(977-0545) .....ea

Contains: universal desk charger, #11720 coaxial ophthalmoscope, #23810 MacroView™ otoscope & 2-#71670 nicad handles.

## Discover Why More Than 50% Of Your Patients Would Benefit From In-office DXA Scanning!

### Improved Patient Care. Increased Revenue Opportunities.

Enhance your Primary Care Physician practice with the Discovery™ bone densitometry system from Hologic. DXA scanning is a vital link for many patients as determining the status of an individual's bone mineral density (BMD) can be a critical factor for proper diagnosis and treatment.

### Patients at Risk in Your Practice:

- All postmenopausal women.
- Patient taking prescribed drugs that induce bone loss (proton pump inhibitors, serotonin reuptake inhibitors, steroids, and tamoxifen).
- Women aged 65 and over.
- Men past the age of 70 or men under 70 whom are at risk of osteoporosis.

In-office bone densitometry can be a dynamic solution to lagging financials. It could afford you the possibility of an exceptional return on investment (ROI) and provide an opportunity for you to grow your practice through stabilized reimbursement to achieve long-term success.\*

Hologic's Discovery systems can evaluate your patients for osteoporosis, obesity, and cardiovascular risk.

**Learn how bone densitometry can impact your practice today by calling your Henry Schein representative.**

## MEDICAL BREAKTHROUGH FOR LOWER BACK PAIN

### DDS 500 LUMBAR TRACTION

Disc Disease Solutions, Inc. introduces a revolutionary approach in the treatment of lower back and radiating pain due to spinal disease and injuries.

The function of the DDS 500 is scientific, precise and very simple. Spinal traction is created as the brace inflates. The vertical air cell expansion mechanism decreases the axial loading while increasing the intervertebral disc space by anchoring up underneath the rib cage pushing upwards, and down against the pelvic girdle pushing downwards. This action stretches the torso vertically, diverting the weight bearing forces away and reducing the pressure within the lumbar spine region, significantly reducing pain levels while assisting active-rehabilitation.

- *Thin and lightweight and offers a high degree of mobility.*
- *Assists with active-rehabilitation and can be discreetly worn under clothing.*
- *Provides pain relief for patients with Herniated and Bulging Discs, Muscle Spasms, Degenerative Disc Disease, Sciatica, Spondylolysis and Spinal Stenosis.*
- *Also available in cervical*

*Add DDS to your line of products and earn extra income!*
