

## Impregnated Gauze Dressings

Impregnated wound dressings are an important part of traditional wound care. These products maintain a moist wound environment to promote healing or enhance wound drainage. Dukal's line of impregnated wound dressings include oil emulsion dressings, petrolatum gauze, and petrolatum gauze with xeroform. These dressings require a secondary dressing, like our gauze sponges, non-woven dressings, or non-adherent pads. For wounds with depth, Dukal's packing strips are available in both plain and iodoform.

### Petrolatum Dressings

- Provides soothing non-adherent protection with more convenience and less mess
- Promotes healing by maintaining a moist wound environment
- Clings and conforms to all body contours
- Reduces pain and trauma during dressing changes
- Decreases chances of skin maceration
- Available with Xeroform, a special deodorizing agent containing 3% bismuth tribomphenate

158-1199	273	Iodoform, 2" x 5 yd

## Oil Emulsion Dressings

- Made of a permeable knitted fabric that allows exudates to readily pass through to the second absorbent layer without adhering to granulation tissue
- Enhances wound drainage, supports a wound healing environment, and minimizes maceration
- Flexible and can be cut to size without tearing or unraveling

HS Item #	Dukal Item #	Description
156-8440	220	3" x 3"
124-8949	221	3" x 8"
